from the Second World Carl H. McMillan,1987-06-18

Technology in Comecon Jozef Wilczynski,1974 *Multinationals*
Khrushchev in the Kremlin Jeremy Smith,Melanie Ilic,2011-01-25

This book presents a new picture of the politics economics and process of government in the Soviet Union under the leadership of Nikita Khrushchev Based in large part on original research in recently declassified archive collections the book examines the full complexity of government including formal and informal political relationships economic reforms and nationality relations in the national republics of the USSR the treatment of political dissent economic progress through technological innovation relations with the Eastern bloc corruption and deceit in the economy and the reform of the railways and construction sectors The book re evaluates the Khrushchev era as one which represented a significant departure from the Stalin years introducing a number of policy changes that only came to fruition later whilst still suffering from many of the limitations imposed by the Stalinist system Unlike many other studies which consider the subject from the perspective of the Cold War and superpower relations this book provides an overview of the internal development of the Soviet Union in this period locating it in the broader context of Soviet history This is the companion volume to the Jeremy Smith and Melanie Ilic s previous edited collection *Soviet State and Society under Nikita Khrushchev* Routledge 2009 Development of Computer

Technology in COMECON Countries B. Silhan,FOREIGN TECHNOLOGY DIV WRIGHT-PATTERSON AFB OHIO.,1975 In recent years the development of computer technology in the COMECON countries has accelerated This development is demonstrated in the application of computers in classical areas of their application but also in the use of computers in new areas New information and control systems of increasing complexity are now in use and the use of these systems are discussed *Technology Export From The Socialist Countries* Jan Monkiewicz,Jan Maciejewicz,2019-07-11 Only since the 1970s have the East European Socialist countries known collectively as Comecon participated in the international exchange of technology as exporters In this book Drs Monkiewicz and Maciejewicz analyze the technology export performance of the Comecon countries They begin by defining the nature of technology as a commodity analyzing the structural characteristics of the international market and outlining both the cost and benefits of technology export Later chapters provide an overview of Comecon technological policies in the 1970s with particular attention to the export import factor and Comecon regional technological cooperation In depth analysis is presented through case studies of the experiences of Poland and Czechoslovakia The book concludes with a discussion of the implications of technology export by socialist countries particularly its potential impact on existing global patterns of technological dependence and domination *Diffusion of New Technologies in the Post-Communist World* Y.M. Rabkin,2013-03-11 The end of this century has witnessed dramatic changes in morality history and geography These changes were felt throughout the world and also across the entire gamut of professional concerns Even relatively remote and seemingly insulated activities such as science and technology have

experienced and up to a point contributed to these dramatic changes This volume presents a series of views on the effect of these changes on science and technology and more specifically on the international diffusion of new technologies These views come from a variety of fields among them history and sociology of science political science information sciences marketing Yet most authors share an interest in science policy studies which permeates this collection It would be fair to say that this volume belongs to the intellectual domain known as STS i e studies in Science Technology and Society The authors come from nine countries and their contributions are expected to reflect this diversity It is well known that the dominant lingua franca in the end of the 20th century is Broken English with the possible exception of a minority of native English speakers some of whom fail to learn this new language An attempt was therefore made throughout this volume to conform to a certain standard of English usage and at the same time to preserve the local flavour of expression and the stylistic and cultural dimensions of each chapter

Technological Innovation, Globalization and the Cold War Wolfgang Mueller, Peter Svik, 2022-11-24 This volume focuses on the interconnections between the Cold War technological innovation and globalization Although the consequences of globalization have received ample attention in both academia and the public discourse only limited attention has so far been given to the factors that instigated various waves of this process This holds particularly true for the period following World War II during which a struggle between the two global blocs fanned not only technological innovations but also their transfer This volume is dedicated to examining the links between the Cold War and this phase in the history of globalization a phase that gradually made the world despite high levels of international tension more and more inter related More specifically it anchors a very contemporary phenomenon to its historical context and pinpoints how the varied and multi layered East West interactions helped to induce and foster the globalization processes Emphasizing technology and its cross bloc flows as well as several levels of actors including states private companies and individuals this volume reflects an important shift towards transnationalism which has occurred in the historiography in the recent years This book will be of interest to students of Cold War Studies science and technology studies and International Relations

A Source Book on Socialist International Organizations William Elliott Butler, 1978-01-01 Reference book comprising texts of international agreements protocol and meeting regulations charters laws convention and institutional framework etc Of international organizations in socialist countries focuses on legal aspects and activities of the Warsaw Treaty Organization and CMEA and considers organizations involved in economic integration banking scientific cooperation telecommunications etc Bibliography pp 165 to 170 and references

East Germany, a Country Study Eugene K. Keefe, 1982

The Digital Flood James W. Cortada, 2012-09-27 The history of how computers spread to over 20 nations globally in less than six decades exploring economic political social and technological reasons and consequences It is based on extensive research into primary and secondary sources and concludes with a discussion of implications for key players in the globalized economy

World Economy and Its Main Development Tendencies J. Nyilas, 2013-06-29 A great many socio

economic events of the utmost importance have taken place in rapid succession in the historically short period of hardly more than three decades After the Second World War the pace of socio economic progress has experienced an unprecedented acceleration This is nothing new in itself Social formations and the corresponding productive forces prior w socialism had also followed each other at a rapidly increasing rate Acceleration can also be witnessed in the accumulation of human knowledge in the fields of science and technology Parallel with the development of the productive forces the growth of population has been exponential More than one and a half thousand years were needed for the world population to double since the beginning of our era whereas it takes now less than 40 years The emergence of capitalism the appearance of mechanized mass production brought about a radical change in the general progress of human civilization It opened up the machine age The classics of Marxism highly appreciated the new power and labour machines and the resulting growth in production and stated that the productive forces created under capitalism had far surpassed those brought about by all earlier societies taken together This is true even though the technology of that time looked upon in hindsight had produced hardly more than primitive steam engines and simple labour machines which have by now become for the most part relics of technical history NATO Review ,1977 A History of Eastern Europe Robert Bideleux,Ian Jeffries,2006-04-10 A History of Eastern Europe Crisis and Change is a wide ranging single volume history of the lands between the lands which have lain between Germany Italy and the Tsarist and Soviet empires Bideleux and Jeffries examine the problems that have bedevilled this troubled region during its imperial past the interwar period under fascism under communism and since 1989 While mainly focusing on the modern era and on the effects of ethnic nationalism fascism and communism the book also offers original striking and revisionist coverage of ancient and medieval times the Hussite Revolution the Renaissance the Reformation and the Counter Reformation the legacies of Byzantium the Ottoman Empire and the Hapsburg Empire the rise and decline of the Polish Lithuanian Commonwealth the impact of the region s powerful Russian and Germanic neighbours rival concepts of Central and Eastern Europe the 1920s land reforms and the 1930s Depression Providing a thematic historical survey and analysis of the formative processes of change which have played the paramount roles in shaping the development of the region A History of Eastern Europe itself will play a paramount role in the studies of European historians

New Energies Stephen G. Gross,Andrew Needham,2023-02-28 Over the past 250 years energy transitions have occurred repeatedly the rise of coal in the nineteenth century the explosion of oil in the twentieth century the nuclear utopianism of the 1950s and 1960s These transitions have been as revolutionary as any political or economic upheaval and they required changes in infrastructure and behavior Yet new energies never wholly replace old ones This volume historicizes energy production and consumption while demonstrating how energy use has reshaped everything from social life and economic organization to political governance It foregrounds the importance of energy for big historical questions about capitalism democracy inequality the environment and identity and it argues that energy systems themselves merit attention as key

agents of historical change Given the urgency of climate change and the central position that energy plays in causing and potentially solving global warming this volume engages history as a discipline in the debate over what may be most monumental energy transition of all time the shift away from fossil fuels Fossil Energy Update ,1982 **COMECON's Mineral Development Potential and Its Implications for Canada** N. M. Switucha,Canada. Minerals,1979 **Hearings, Reports and Prints of the Senate Committee on Governmental Affairs** United States. Congress. Senate. Committee on Governmental Affairs,1977 **Technology Transfer in the Developing Countries** Manas Chatterji,2016-07-27 The objective of this book is to present the problems and possibilities of transferring technology from the developed countries to the developing countries to raise their standard of living It develops the conceptual issues legal ramifications empirical testing of mathematical models and case studies of different industries in many countries It contains articles by distinguished scholars in the field practitioners and government officials It is an important supplement to the hands on approach used by many private industries and national and international organizations The unique feature of this book is that it is multidisciplinary and that it has a balanced combination of abstract theoretical approaches and practical considerations

Health Care in the Soviet Union and Eastern Europe Michael Kaser,2024-11-26 Health Care in the Soviet Union and Eastern Europe 1976 examines the systems of health care in the Communist countries of the Eastern Bloc Many enjoyed comprehensive free health care established with the Communist takeovers and transition to planned economies as they moved from an agrarian to an industrialised system This book traces their beginnings and development and offers comparisons between each of them as well as with the West

Reviewing **Technology In Comecon**: Unlocking the Spellbinding Force of Linguistics
