Technology Knowledge Transfer In China:

Brazil and China in Knowledge and Policy Transfer Osmany Porto de Oliveira, Giulia C. Romano, 2022-10-01 This book examines knowledge and policy transfer from the perspectives of Brazil and China. It assesses how these two nations have emerged as providers of ideas and models that contribute to the global offer of public policies. With a variety of case studies in areas such as health, food security, and infrastructure, the volume offers new insights into the distinct levels through which knowledge and policy transfers take place, including the local, regional, national, and supranational. It develops a multidimensional framework of analysis that considers the agents, objects, and mechanisms for knowledge and policy transfer, as well as the structures and timings within which they operate. Unlike previous studies on policy transfer, which largely focus on North-North and North-South learning processes, this book offers an innovative approach to this area of study. By reflecting on the experiences of these two rising powers, it provides fresh insights on the future of knowledge and policy transfer as global power dynamics shift. This interdisciplinary study will appeal to students and scholars of policy transfer, development studies, international relations, and public policy.

Geography Of Technology Transfer In China: A Glocal Network Approach Chengliang Liu, 2023-12-06 The majority of technology transfer studies done today are derived from Economics and Management Sciences, and there are relatively few studies that examine the geographical concerns of technology transfer from a glocal perspective. *Geography of Technology Transfer in China* fills the gap by aiming to discover the geographical character of technology transfer and its determinants from the interaction in both global and local scales, which involves the study of innovation geography, economic geography, urban economics, and regional economics. The chapters included in this book present a clear structure of a series of studies performed both theoretically and empirically. The research begins by constructing an analytic framework for urban technology transfer study and abstracts the study target from technological innovation subjects to cities, along with establishing the structure system, the dimension system, and the effect system of urban technology transfer research. This then develops an initial conceptual framework for urban technology transfer research. In addition, it analyses the hierarchy of China's urban technology innovation system and the segmentation of the technology transfer market from the perspective of technology transfer. All in all, the book aspires to depict the spatial evolution of China's technological innovation system and technology transfer system from a city size perspective, thereby realising the spatial scale of technology transfer study.

China's Drive for the Technology Frontier Yin Li, 2022-07-07 China has become an innovation powerhouse in high-tech industries, but the widely held view assumes the Chinese model is built on technological borrowing and state capitalism. This book debunks the myths surrounding the Chinese model with a fresh take on China's strategies for technological innovation. The central argument is that indigenous innovation plays a critical role in transforming the Chinese high-tech industry. Like any successfully industrialized nation in history, indigenous innovation in China allows industrial enterprises to assimilate knowledge developed elsewhere, utilize

science and technology resources and human capabilities accumulated in the country and eventually approach the technological frontier The question is how do Chinese businesses and governments engage in indigenous innovation Employing the social conditions of innovative enterprise framework developed by William Lazonick and colleagues this book analyzes how the interaction of strategy organization and finance in leading Chinese high tech firms underpinned by national institutions enables indigenous innovation with Chinese characteristics It features detailed case studies of two critical high tech industries the telecom equipment industry and the semiconductor industry and within them the business histories of leading Chinese innovators The in depth look into China s experience in indigenous innovation provides valuable lessons for advanced and emerging economies China's Highway of Information and Communication Technology J. Yu,R.

Technology and Knowledge Transfer in China Richard Li-Hua,2004 Examines and addresses the key elements of how to achieve successful technology transfer **China's Science and Technology Sector and the Forces of Globalisation**

Elspeth Thomson,Jon Sigurdson,2008 China s booming economy has drawn both admiration and fear from the rest of the world With its ability to churn out high quality goods at low prices China has become known as the OC factory of the worldOCO To better understand China s development and modernisation since the 1978 reforms it is necessary to analyse its policies on importing technologies and developing indigenous ones The articles in this volume paint a comprehensive picture of the attempts by the Chinese government to adopt and foster science and technology the successes of the policies and the continuing challenges *China's Quest for Foreign Technology* William C. Hannas,Didi Kirsten Tatlow,2020-09-22 This book

analyzes China s foreign technology acquisition activity and how this has helped its rapid rise to superpower status Since 1949 China has operated a vast and unique system of foreign technology spotting and transfer aimed at accelerating civilian and military development reducing the cost of basic research and shoring up its power domestically and abroad without running the political risks borne by liberal societies as a basis for their creative developments While discounted in some circles as derivative and consigned to perpetual catch up mode China s hybrid system of legal illegal and extralegal import of foreign technology combined with its indigenous efforts is the authors believe enormously effective and must be taken seriously Accordingly in this volume 17 international specialists combine their scholarship to portray the system s structure and functioning in heretofore unseen detail using primary Chinese sources to demonstrate the perniciousness of the problem in a manner not likely to be controverted The book concludes with a series of recommendations culled from the authors interactions with experts worldwide This book will be of much interest to students of Chinese politics US foreign policy intelligence studies science and technology studies and International Relations in general *China-Africa Science,*

Competitiveness of Chinese Firms R. Li-Hua, 2014-11-05 This book addresses the multi facet competitiveness of firms in China from an angle of strategic management of technology and innovation The Chinese vanguard companies have been excellent in identifying strategic position and appropriately making strategic decisions and effectively making strategy in action

China and the Knowledge Economy Carl J. Dahlman, Jean-Eric Aubert, 2001 Annotation Argues that in order to address the growing economic social and political pressures of the 21st Century China will have to build solid foundations for a knowledge based economy by updating the economic and institutional regime upgrading education and learning and building information infrastructure

Technology Transfer Between the US, China and Taiwan Douglas B. Fuller, Murray A. Rubinstein, 2013-06-26 Examining the flow of technical knowledge between the US Taiwan and Mainland China over the last sixty five years this book shows that the technical knowledge that has moved between these states is vast and varied It includes the invention and production of industrial goods as well as knowledge of the patterns of corporate organization and management Indeed this diversity is reflected in the process itself which is driven both by returning expatriates with knowledge acquired overseas and by successful government intervention in acquiring technology from multinational firms Technology Transfer Between the US China and Taiwan engages with the evolving debates on the merits importance and feasibility of technology transfer in the process of economic development globally and uses the example of Taiwan to show that multinational corporations can indeed play a positive role in economic development Further it reveals the underlying tension between international cooperation and nationalism which inevitably accompanies international exchanges as well as the delicate balancing act required between knowledge acquisition and dangerous levels of dependency and the beneficial role of the US in East Asia s technological development With contributors from disciplines ranging from history geography urban planning sociology political science and electrical engineering this multi disciplinary book will be of great interest to students and scholars working across a broad range of subjects including Taiwan studies Chinese studies economics business studies and development studies

China's Capitalism Tobias ten Brink, 2019-02-14 Since 1978 the end of the Mao era economic growth in China has outperformed every previous economic expansion in modern history While the largest Western economies continue to struggle with the effects of the deepest recession since World War II the People s Republic of China still enjoys

growth rates that are massive in comparison In the country's smog choked cities a chaotic climate of buying and selling prevails Tireless expansion and inventiveness join forces with an attitude of national euphoria in which anything seems possible No longer merely the workshop of the world China is poised to become a global engine for innovation In China's Capitalism Tobias ten Brink considers the history of the socioeconomic order that has emerged in the People's Republic With empirical evidence and a theoretical foundation based in comparative and international political economy ten Brink analyzes the main characteristics of China's socioeconomic system over time identifies the key dynamics shaping this system's structure and discusses current trends in further capitalist development He argues that hegemonic state business alliances mostly at the local level relative homogeneity of party state elites the maintenance of a low wage regime and unanticipated coincidences between domestic and global processes are the driving forces behind China's rise He also surveys the limits to the state's influence over economic and social developments such as industrial overcapacity and social conflict Ten Brink's framework reveals how combinations of three heterogeneous actors party state institutions firms and workers led to China's distinctive form of capitalism Presenting a coherent and historically nuanced portrait China's Capitalism is essential reading for anyone interested in the socioeconomic order of the People's Republic and the significant challenges facing its continuing development

Marketing Competences and Strategic Flexibility in China Y. Wang, R. Li-Hua, 2006-12-01 Today's China presents a unique setting for organizations Through an examination of current Chinese business this book addresses its business culture and environment In particular it considers how firms build distinctive capabilities of organizational learning and strategic flexibility to achieve superior customer focused performance *Globalized Knowledge Flows and Chinese Social Theory* Xiaoying Qi, 2014-01-21 This book considers the nature and possibilities of conceptual change and transformation under conditions of globalization especially with regard to Chinese social and cultural concepts It argues that the influence of globalization promotes the spread of West European and American social science concepts and methods at the expense of local concepts and approaches and at the same time paradoxically provides opportunities for the incorporation of local concepts including Chinese concepts into Western or mainstream social science

China in the World Economy Organisation for Economic Co-operation and Development, 2003 Drawing on the OECD's statistical database the experience of OECD countries and the work of the OECD's China programme this book provides a guide to all aspects of China's economy and the domestic policy challenges ahead as China adapts to WTO membership
