## **Technology As Symptom And Dream:**

Technology as Symptom and Dream Robert Romanyshyn, 2003-09-02 Robert Romanyshyn's latest book shows how the development of linear perspective vision has altered our relationship with the world and led to our increasing alienation

**Technology as Symptom and Dream** Robert Romanyshyn, 2003-09-02 The development of linear perspective in the 15th century represented a radical transformation in the European's sense of the world the body and the self Robert Romanyshyn's latest book examines the claim that the development of linear perspective vision was and is indispensable to the emergence of our technological world It does so by telling the story of how an artistic technique has become a cultural habit of mind

**Technology as Symptom and Dream**, 1989 Victor Frankenstein, the Monster and the Shadows of Technology Robert D. Romanyshyn, 2019-04-25 In Victor Frankenstein the Monster and the Shadows of Technology The Frankenstein Prophecies Romanyshyn asks eight questions that uncover how Mary Shelley's classic work Frankenstein haunts our world Providing a uniquely interdisciplinary assessment Romanyshyn combines Jungian theory literary criticism and mythology to explore answers to the query at the heart of this book who is the monster In the first six questions Romanyshyn explores how Victor's story and the Monster's tale linger today as the dark side of Frankenstein's quest to create a new species that would bless him as its creator Victor and the Monster are present in the guises of climate crises the genocides of our wars the swelling worldwide population of refugees the loss of place in digital space the Western obsession with eternal youth and the eclipse of the biological body in genetic and computer technologies that are redefining what it means to be human In the book's final two questions Romanyshyn uncovers some seeds of hope in Mary Shelley's work and explores how the Monster's tale reframes her story as a love story This important book will be essential reading for academics and students of Jungian and post Jungian theory literature philosophy and psychology psychotherapists in practice and in training and for all who are concerned with the political social and cultural crises we face today

**Panic Diaries** Jackie Orr, 2006-03-01 A cultural history and sociological critique of 20th century panic from the Cold War to contemporary psychiatry

**Alone Together** Sherry Turkle, 2017-11-07 A groundbreaking book by one of the most important thinkers of our time shows how technology is warping our social lives and our inner ones Technology has become the architect of our intimacies Online we fall prey to the illusion of companionship gathering thousands of Twitter and Facebook friends and confusing tweets and wall posts with authentic communication But this relentless connection leads to a deep solitude MIT professor Sherry Turkle argues that as technology ramps up our emotional lives ramp down Based on hundreds of interviews and with a new introduction taking us to the present day Alone Together describes changing unsettling relationships between friends lovers and families

The Routledge International Handbook of Psychoanalysis, Subjectivity, and Technology David Goodman, Matthew Clemente, 2023-08-09 The Routledge International Handbook of Psychoanalysis Subjectivity and Technology uniquely provides a comprehensive overview of human subjectivity in the technological age and

how psychoanalysis can help us better understand human life Presented in five parts David M Goodman and Matthew Clemente collaborate with an international community of scholars and practitioners to consider how psychoanalytic formulations can be brought to bear on the impact technology has had on the facets of human subjectivity Chapters examine how technology is reshaping our understanding of what it means to be a human subject through embodiment intimacy porn political motivation mortality communication interpersonal exchange thought attention responsibility vulnerability and more Filled with thought provoking and nuanced chapters the contributors approach technology from a diverse range of entry points but all engage through the lens of psychoanalytic theory practice and thought This book is essential for academics and students of psychoanalysis philosophy ethics media liberal arts social work and bioethics With the inclusion of timely chapters on the coronavirus pandemic and teletherapy psychoanalysts in practice and training as well as other mental health practitioners will also find this book an invaluable resource

**Identity and Alterity** PEACE--Phenomenology for East-Asian Circle. Conference,2010 Nature and Psyche David W. Kidner,2001-01-01 Underscores the limitations of traditional psychology to envision a more healthy ecological and psychological future

**Group Dynamics: Spatiality, Technology and Positive Disintegration** Clive Hazell,Diana Semmelhack,Bradford Czochara,2021-07-14 This book attempts to draw together a theory of the unconscious dynamics of groups and how these interact in powerful ways with geography technology and psychological development The argument is made that powerful forces operating outside of awareness shape and are shaped by geographical factors spatiality Further the idea is forwarded that technology which is unevenly distributed spatially and has potent unconscious meanings is a largely unrecognized and potent vector in shaping human interactional dynamics at both overt and covert levels Finally these complex interactions are yoked to Dabrowski s theory of positive disintegration which again offers another useful explanatory perspective Process notes on a psychodynamically oriented large group with persons carrying diagnoses of severe mental illness are appended and there are notes on the Discourse of the Clown and Derrida s differance

*The Enchantments of Technology* Lee Bailey,2010-10-01 In *The Enchantments of Technology* Lee Worth Bailey erases the conventional distinction between myth and machine in order to explore the passionate foundations concealed in technological culture and address its complex ethical moral and social implications Bailey argues that technological society does not simply disenchant the world with its reductive methods and mechanical metaphors then shape machines with political motives but is also borne by a deeper subversive undertow of enchantment Addressing examples to explore the complexities of these enchantments his thought is full of illuminating examinations of seductively engaging technologies ranging from the old camera obscura to new automobiles robots airplanes and spaceships This volume builds on the work of numerous scholars including Jacques Ellul and Jean Brun on the phenomenological and spiritual aspects of technology Carl Jung on the archetypal collective unconscious approach to myth and Martin Heidegger on Being itself Bailey creates a dynamic interdisciplinary postmodern examination of how our machines and their environments

embody not only reason but also desires      **Technology and Values** Craig Hanks,2009-05-04 This anthology features essays and book excerpts on technology and values written by preeminent figures in the field from the early 20th century to the present It offers an in depth range of readings on important applied issues in technology as well Useful in addressing questions on philosophy sociology and theory of technology Includes wide ranging coverage on metaphysics ethics and politics as well as issues relating to gender biotechnology everyday artifacts and architecture A good supplemental text for courses on moral or political problems in which contemporary technology is a unit of focus An accessible and thought provoking book for beginning and advanced undergraduates yet also a helpful resource for graduate students and academics

*What Was Artificial Intelligence?* Sue Curry Jansen,2022-04-01 When it was originally published in 2002 Sue Curry Jansen s *What Was Artificial Intelligence* attracted little notice The long essay was published as a chapter in Jansen s *Critical Communication Theory* a book whose wisdom and erudition failed to register across the many fields it addressed One explanation for the neglect ironic and telling is that Jansen s sheer scope as an intellectual had few competent readers in the communication studies discipline into which she published the book *What Was Artificial Intelligence* was buried treasure In this mediastudies press edition Jansen s prescient autopsy of AI self selling the rhetoric of the masculinist sublime is reprinted with a new introduction Now an open access book *What Was Artificial Intelligence* is a message in a bottle addressed to Musk Bezos and the latest generation of AI myth makers      **Culture + Technology** Jennifer Daryl Slack,John Macgregor Wise,2005 *Culture Technology* is an essential guide to the fascinating history of these debates and offers new perspectives that give readers the tools they need to make informed decisions about the role of technology in our lives In clear and compelling language Slack and Wise untangle and expose the cultural assumptions that underlie our thinking about technology stories so deeply held we often don t recognize their influence The book considers the perceived inevitability of technological advance and our myths about progress It also looks at sources of resistance to these stories from the Luddites of the 19th century to the Unabomber in our own time Slack and Wise help readers sift through the confusions about culture and technology that arise in their own everyday lives **BOOK JACKET**      **Philosophy of Technology** Frederick Ferré,1995 In this widely taught introductory survey Frederick Ferré explains the fundamental concerns and methods of philosophy and then guides readers through a philosophical inquiry into some of the major issues surrounding technology s impact on our lives The first half of the book concentrates on key definitions and epistemological issues including an overview of philosophy as applied to technology a definition of technology and an examination of technology as it relates to practical and theoretical intelligence especially how high technology relates to modern science and how science depends on technical craft The second half addresses the problems of living with technology Ferré contrasts Karl Marx s and Buckminster Fuller s bright visions of technology and modern existence with the somber visions of Martin Heidegger and Herbert Marcuse Next in offering direction for an ethical assessment of technology Ferré poses questions about workplace automation computers

nuclear energy Third World development and genetic engineering Finally the book considers debates about the mutual influences between technology and religion and technology and metaphysics A glossary and a list of suggested further readings are included Providing a philosophical framework that will remain timely in the face of rapid technological change Philosophy of Technology will help students in both the sciences and liberal arts to examine comprehensively their own and society's fundamental beliefs and attitudes about technology

**Jung and Educational Theory** Inna Semetsky, 2012-04-12

Jung and Educational Theory offers a new take on Jung's work providing original rich and informative material on his impact on educational research Explores Jung's writing from the standpoint of educational philosophy assessing what it has to offer to theories of education Highlights Jung's emphasis on education's role in bringing up integrated and ethical human beings Offers the perspectives of a diversity of academics and practitioners on topics ranging from the role of the unconscious in learning to the polytheistic classroom Both a valuable addition to the academic library and a significant new resource in the professional development of teachers

*A Distant Technology* J. P. Telotte, 1999 Science fiction films celebrate and critique the impact of a burgeoning technology on the world's cultural political and social milieu The Machine Age roughly delineated by the two decades between World Wars was a watershed period during which modern society entered into an ambiguous embrace with technology that continues today J P Telotte carefully blends film technology cultural and genre studies to illuminate this nearly forgotten era in our cinematic history and to show through analysis of classics like *The Invisible Ray* *Metropolis* and *Things to Come* how technology played a major role as motif actor and producer What he also discovers as he ranges among the American British Russian French and German science fiction cinema as well as mainstream films figures and cultural products such as the New York World's Fair is a fundamental ambivalence embedded in the films themselves about the very machine age ethos they promoted Even as advances in the technical apparatus of filmmaking elevated it from mere entertainment to a medium of general communication and genuine artistic expression Machine Age science fiction films remained curiously distant from and often skeptical of the very machines on which their narratives focus The resulting tensions Telotte writes thus seem to intersect with those implicit in a Western world that was struggling with its own transition into the modern rendering the films task inevitably paradoxical and difficult

**Visions Of Technology** Richard

Rhodes, 2012-09-18 Technology was the blessing and the bane of the twentieth century Human life span nearly doubled in the West but in no century were more human beings killed by new technologies of war Improvements in agriculture now feed increasing billions but pesticides and chemicals threaten to poison the earth Does technology improve us or diminish us Enslave us or make us free With this first ever collection of the essential twentieth century writings on technology Pulitzer Prize winning historian Richard Rhodes explores the optimism ambivalence and wrongheaded judgments with which Americans have faced an ever shifting world *Visions of Technology* collects writings on events from the Great Exposition of 1900 and the invention of the telegraph to the advent of genetic counseling and the defeat of Garry Kasparov by IBM's chess

playing computer Deep Blue Its gems of opinion and history include Henry Ford on the horseless carriage Robert Caro on the transformation of New York City J Robert Oppenheimer on science and war Loretta Lynn on the Pill and much more Together they chronicle an unprecedented century of change Hermeneutics, History, and Technology Armin Grunwald, Alfred Nordmann, Martin Sand, 2023-06-01 For better and worse the future is often conceived in technological terms Technology is supposed to meet the challenge of climate change or resource depletion And when one asks about the world in 20 or 100 years answers typically revolve around AI genome editing or geoengineering There is great demand to speculate about the future of work the future of mobility Industry 4 0 and Humanity 2 0 The humanities and social sciences science studies and technology assessment respond to this demand but need to seek out a responsible way of taking the future into account This collection of papers interviews debates grew out of disagreements about technological futures speculative ethics plausible scenarios anticipatory governance and proactionary and precautionary approaches It proposes Hermeneutic Technology Assessment as a way of understanding ourselves through our ways of envisioning the future At the same time a hermeneutic understanding of technological projects and prototypes allows for normative assessments of their promises Is the future an object of design This question can bring together and divide policy makers STS scholars social theorists and philosophers of history and it will interest also the scientists and engineers who labor under the demand to deliver that future

*Technology and Nationalism* Marco Adria, 2010-01-28 Revisiting Marshall McLuhan s work on the ways that technologies influence societies Adria reconsiders the effects technologies have had on Canadian regionalism and nationalism Offering key insights into media history the author outlines the influence that newspapers radio and television have had in forming a mindset ready to welcome the internet age As the digital revolution continues to shape the world into a global village *Technology and Nationalism* provides a detailed and overdue reflection on the influence of technology on the social and political bonds we form and inhabit
