Technology Transfer And East Asian Economic Transformation:

Technology Transfer and East Asian Economic Transformation Rudi Volti, 2002 Rudi Volti explores how the transfer of foreign technologies contributed to the rapid development of the East Asian economies of China Japan Taiwan and Korea

Economic Transformation in Eastern Europe and East Asia Herbert Hax, Wolfgang Klenner, Willi Kraus, Tomoo Matsuda, Takafusa Nakamura, 2012-12-06 The economic transformation taking place in Eastern Europe and Asia is in particular a challenge for Japan and Germany because these two states as the immediate neighbors of the developing regions are directly affected and also because they are the strongest economic powers in their regions and have the necessary potential to influence developments there Japan and Germany are affected in many ways both positively and negatively Should the economic and social transformation run into difficulties leading to economic and political chaos perhaps even to armed conflicts then economy and social fabric of the prosperous neighbors would doubtlessly suffer In the past Japan and the South East Asian region have already experienced how economic problems in China caused millions of Chinese to seek their fortunes in other countries An economic and political destabilization of China would today probably have even greater effects on migration flows Similar effects can be expected in Europe if the transformation process in Eastern Europe should fail But even less dramatic developments in Eastern Europe and East Asia can have deleterious consequences for Germany and Japan Both nations are linked closely to the transforming economies near them though at a fairly low level A reduction in trade with them a refusal to service debts and other economic frictions ensuing out of economic and political troubles would of necessity hamper the prosperity of Japan and Germany A successful transformation process would without doubt benefit all economic partners to a considerable extent

Technology Transfer and Economic Growth in Sub-Saharan African Countries Nathaniel O. Agola, 2016-03-21 This book provides a pragmatic analytical model grounded on the solid idea that technologies and the accompanying implementation efforts only make sense if they are successfully deployed in markets The analytical model also provides an exhaustive analysis of all critical variables at the global regional and national levels which contribute to failure or success of technology transfer efforts The model is validated by an incisive analysis of technology transfer experiences of Japan Korea Singapore Taiwan province of China and Malaysia While this book finds that these East Asian countries have had both diverging and converging models and experiences with technology transfer the enduring and fundamental aspects of technology transfer in specific industrial sectors and economic growth in these countries is then used to draw lessons for African countries This book therefore is a timely and compelling piece of research work that provides valuable answers to the increasingly urgent question of how African countries can industrialize through technology transfer to meet their economic development and growth ideals

Global Production Networking and Technological Change in East Asia Shahid Yusuf, M. Anjum Altaf, Kaoru Nabeshima, 2004-07-01 In the coming decades East Asian economies must face the challenges of an increasingly globalized marketplace This book explores the changing parameters of competition in East

Asia and argues that success ultimately will depend on the ability of the region's firms to harness the potential of global production networks and to build their own innovative capability. Presenting the latest findings on global production networks and the evolution of technological capabilities, it provides researchers, students, and policymakers with in-depth information and analysis on key issues related to growth and development in East Asia. East Asian firms must not only achieve greater efficiency but also become more innovative, offering differentiated products in order to vie with other first-tier suppliers of multinational corporations. These firms will also need to develop a technological edge if they are to compete with corporations from the leading OECD countries and form their own global production networks. Global Production Networking and Technological Change in East Asia argues that a development strategy linked to technological advance will be necessary to foster the growth of innovative national firms that can remain competitive in global markets.

The Role of Foreign Direct Investment in East Asian Economic Development Takatoshi Ito, Anne O. Krueger, 2007-12-01 The international flow of long-term private capital has increased dramatically in the 1990s. In fact, many policymakers now consider private foreign capital to be an essential resource for the acceleration of economic growth. This volume focuses attention on the microeconomic determinants and effects of foreign direct investment (FDI) in the East Asian region, allowing researchers to explore the overall structure of FDI, to offer case studies of individual countries, and to consider their insights both general and particular within the context of current economic theory.

Technology in Postwar America Carroll Pursell, 2007-06-29 Carroll Pursell tells the story of the evolution of American technology since World War II. His fascinating and surprising history links pop culture icons with landmarks in technological innovation and shows how postwar politics left their mark on everything from television, automobiles, and genetically engineered crops to contraceptives, Tupperware, and the Veg-O-Matic. Just as America's domestic and international policies became inextricably linked during the Cold War, so did the nation's public and private technologies. The spread of the suburbs fed into demands for an interstate highway system, which itself became implicated in urban renewal projects. Fear of slipping into a postwar economic depression was offset by the creation of a consumer republic in which buying and using consumer goods became the ultimate act of citizenship and a symbol of an American Way of Life. Pursell begins with the events of World War II and the increasing belief that technological progress and the science that supported it held the key to a stronger, richer, and happier America. He looks at the effect of returning American servicemen and servicewomen and the Marshall Plan, which sought to integrate Western Europe into America's economic business and technological structure. He considers the accumulating problems associated with American technological supremacy, which by the end of the 1960s led to a crisis of confidence. Pursell concludes with an analysis of how consumer technologies create a cultural understanding that makes political technologies acceptable and even seem inevitable, while those same political technologies provide both form and content for the technologies found at home and at work. By understanding this history, Pursell hopes to advance a better understanding of the postwar American self.

and Chairman Mao's Cultural Revolution Chunjuan Nancy Wei, Darryl E. Brock, 2013-01-01 Despite the verdict of the Cultural Revolution as a disaster for China a number of scholars have called for reexamining socialist science under Mao's aegis This collection examines the viewpoints on social and scientific enterprises of that era probing medicine the space program and the one child policy as outcomes of earlier Maoist science

Handbook on East Asian Economic Integration Kimura, Fukunari, Pangestu, Mari, Thangavelu, Shandre M., Findlay, Christopher, 2021-12-09 This comprehensive Handbook provides an in depth analysis of the nature of East Asian economic integration alongside thoughtful insights into contemporary issues such as agricultural development structural transformation and East Asian trade alongside skills and human capital development policies of ASEAN Contributors also provide detailed explanations on trade poverty and Aid for Trade institutional reforms regulatory reform and measuring integration

Globalisation and the Asia-Pacific Iyanatul Islam, Moazzem Hossain, 2006-06-27 Presents contested perspectives on globalisation illustrated by the diverse experiences of selected economies of the Asia Pacific as case studies Country experiences ranging from broad political economy perspectives to industry case studies are discussed Australian Islam from Griffith university

Asia's Innovation Systems in Transition Jan Vang, 2006-01-01 The success of Asian economies first Japan then Taiwan South Korea Singapore Hong Kong and more recently China and India has made it tempting to look for an Asian model of development However the strength of Asian development lies less in strategies that reproduce successful national systems of innovation and more in the capacity for institutional change to open up new development trajectories with greater emphasis on knowledge and learning The select group of contributors demonstrate that although there are important differences among Asian countries in terms of institutional set

Economic Reform Processes in South Asia Philippa S. Dee, 2012 While South Asia's economic reform initiatives of the last two decades were often born in crisis this alone does not account for their occurrence This book looks at the processes and institutional arrangements behind these reforms and analyses what lessons can be learnt about how South Asia can improve its policy efficiency The book develops ideas about how to overcome the political restraints to reform by drawing on recent theories of political economy and policy learning It tests these ideas against authoritative case studies of actual reform initiatives in South Asia which illustrate processes and institutional arrangements that have helped South Asian governments to sustain reform efforts even in the absence of a strong political base This offers valuable lessons for the global economy as it moves into a phase of rebalancing with the structural adjustments that this will require The book goes on to identify weaknesses that could be addressed by South Asian national governments and regional forums It is an important contribution to studies on South Asian Politics and International Political Economy

Japan and China H. Hilpert, R. Haak, 2002-05-02 The flow of goods capital technology and organisational know how between Japan and China has increased dramatically yet the relationship between the two countries remains far below its potential scope The differing economic structures of the two countries the mutual political distrust and the burden of an unsettled historical past stand in

the way of a more intensive economic integration This book combines up to date research from the German Institute for Japanese Studies DIJ with papers from a conference organised jointly with the Fujitsu Research Institute FRI and is an essential tool for academics and those doing business in East Asia *Industrial Policy in an Era of Globalization* Marcus Noland,Howard Pack,2003-03-07 Globalization reigns supreme as a description of recent economic transformation and it carries many meanings In the policy realm the orthodox terms of engagement have been enshrined in the Washington consensus But disappointing results in Latin America and transitional economies plus the Asian financial crisis have shaken the faith in Washington and elsewhere One response has been to hark back to the more statist policies that the consensus marginalized In this regard Japan Korea and Taiwan are promoted as the poster nations that have derived great benefits from increasing integration with the international economy without surrendering national autonomy in the economic or cultural spheres effectively beating the West at its own game The fundamental questions addressed in this monograph are whether industrial policy was indeed a major source of growth in these three economies and if so can it be replicated under current institutional arrangements and if so is it worth replicating or would developing countries today be better off embracing the suitably refined orthodoxy **East Asia in Transition:** Robert S. Ross,2015-03-26 Has uniformly good essays on economic and political change the policies of the great and local powers and the prospects for building a new regional order Foreign Affairs Institutions for Economic Reform in Asia Philippa Dee,2009-12-16 In the same way that no economy starts out with the best set of economic policies no economy starts out with the best institutions to support the policy making process Instead they inherit institutions that reflect their own unique culture and history The task of structural reform has to be addressed therefore in the context of domestic economic and political institutions and processes Examining the nature of structural economic reform and the institutional circumstances in which it succeeds or is inhibited this volume is less about the content of structural reform and more about how to get there The chapters develop principles governing the types of institutions that are likely to assist the structural reform process and then examine the application of those principles within a number of case studies Finally the volume presents some ideas about how regional cooperation could help to build and support those institutions that in turn support domestic structural reforms Consisting of theoretical chapters and country specific case studies this book draws on experience with structural reform across a range of Asian economies at different stages of economic development As such it will be of interest to students and scholars of Asian Economics and Development Economics *Technological Capabilities and Export Success in Asia* Dieter Ernst,Tom Ganiatsos,Lynn Mytelka,2003-09-02 What accounts for export success A team of international contributors show that learning and capability formation are critical to sustain competitiveness Through a series of case studies of firms in the textile and garment and electronics industries of five Asian economies Korea Taiwan Thailand Indonesia and Vietnam Technological Capabilities and Export Success in Asia demonstrates that cheap labour combined with currency devaluation is no longer sufficient for export

success *The Rise of Asia* Prema-chandra Athukorala, 2010-07-12 The Rise of Asia examines emerging trends and patterns of foreign trade and investment in Asia with a view to contributing to the policy debate on how development strategies should be adopted in response to challenges to economic globalization The existing body of knowledge in this subject area has predominantly been shaped by the experiences of the newly industrialized countries NICs in East Asia This volume is inspired by the conviction that generalization from the NIC experience is hazardous because the on going process of economic globalization over the past two decades has dramatically transformed the international context of national development policy making Moreover as embracing market albeit at varying degree and rapidly has now become an Asia wide phenomenon it is vital to look at the issues from a broader relational perspective paying attention to opportunities for intra regional division of labour within the wider context of global economic integration This book will be of interest to students and scholars with an interest in Asian studies economics political economy and globalization Small Firm Dynamism in East Asia Farrukh Iqbal, Shujiro Urata, 2002-05-31 This book presents a collection of papers which examine the evolution of small and medium enterprises hereafter SMEs in East Asia over the past quarter century or so East Asia is of interest because this region has experienced on average the highest economic growth rates in the world during this period This has been accompanied by dramatic transformations in sectoral output and employment in patterns of domestic and international trade and in demographic flows within countries It is of interest to see to what extent these transformations have affected or have been influenced in turn by industrial structure as reflected in the evolution of small firms At the same time not all countries in East Asia have grown at similar rates nor has there been uniformity in public policies across the region So there is a background of diversity in both performance and policy How smaller firms have coped with the different policy environments and patterns of economic transformation that have characterized the region in the recent past could be potential importance to the formulation of public policy in other developing countries Small firms are important instruments for economic development This book examines the factors that influence their evolution and performance **African Industrial Development and European Union Co-operation** Francis Matambalya, 2014-08-27 Of the 54 African states only South Africa is categorised by the United Nations Industrial Development Organization UNIDO amongst industrialised countries The economic activities in Africa are still dominated by the production and trade of agricultural and mineral commodities This situation is in spite of the longstanding Africa European Union EU co operation which intends among other things to support Africa s industrialisation endeavours Imperatively a long road to substantive levels of industrialisation still lies ahead of most African countries This raises the question as to what role the international community could and should play in the twenty first century to provide the support needed to expedite Africa s industrial transformation This book argues that to supplement the initiatives of each African country international partnerships of both a North South and South South nature will serve better purposes if they are leveraged to develop productive capacities in African economies In order to

enable the African countries to leverage their traditional partnership with the EU for industrialisation a paradigm shift is obligatory A feasible model should emulate the Japanese led flying geese model and the Chinese led bamboo capitalism model

Entrepreneurship and Economic Development in Hong Kong Tony Fu-Lai Yu, 1997-07-31 This is the first systematic study of the nature operation and contribution of entrepreneurship to the growth of Hong Kong From a new entrepreneurial perspective of economic development the author argues that the success of Hong Kong is attributable principally to adaptive entrepreneurship product imitation small scale enterprise subcontracti
