Assessment in Early Childhood Settings Margaret Carr,2001-06-05 This is an invigorating and very thought provoking text that I would recommend to all early years professionals parents and citizens interested in developing their understanding of early years philosophy in action which is directly linked to a compelling research paradigm and deep reflection alongside a sound theoretical base Early Years I would recommend this book to practitioners interested in reflecting on their own practice and approach to assessment The insights provided are thought provoking and promote a practical and positive approach to early years assessment Early Talk This thoughtful book challenges the standard assessment process that is commonly employed within the context of early years provision For any practitioners working in early years setting this is a powerful and exciting book that helps to remind us that the child must be placed centrally within the assessment process not as a recipient but as a proactive contributor to the situation Child Language Teaching and Therapy This is a highly relevant text as some UK early childhood educators become engulfed with avalanches of tick sheets A most useful book which contributes to the current vital debate about when what and how we should assess young children s progress T A C T Y C Newsletter I found Margaret Carr s book fascinating the ideas and arguments put forward are well worth mulling over Early Years Educator This is an inspiring book from bilingual bicultural New Zealand about revolutionizing the assessment of young children s learning and progress I hope this book inspires United Kingdom practitioners to set out on learning story journeys Nursery World This book manages to blend recognized theory and recent research with practice I found it easy and sometimes enjoyable to read it provided plenty of food for thought as well as references on how to I would recommend it to all early childhood practitioners not just those considering their current assessment procedures as the chapters focusing on the child as a learner are of value on their own Julia Browne Goldsmiths Association for Early Childhood This book shows that an early childhood setting can be described as a learning place in which children develop learning dispositions such as resilience in the face of uncertainty confidence to express their ideas and collaborative and thoughtful approaches to problem solving These dispositions provide the starting point for life long learning The author asks How can we assess and track children s learning in the early years in a way that includes learning dispositions and avoids the pitfalls of over formal methods whilst being helpful for practitioners interesting for families and supportive for learners The book describes a way of assessment that stays close to the children s real experiences and

provides an alternative to mechanistic and fragmented approaches shows how practitioners can assess what really matters those learning dispositions interest involvement and perseverance for example that provide a foundation for life long learning The book is about weaving theory and practice theorizing development and learning as reflected in assessment practice The author also argues that unless we find ways to assess complex outcomes in early childhood they will be excluded from the teaching and the learning Simple and low level outcomes and goals will take their place The theoretical ideas and arguments are illustrated throughout by transcripts and stories of children in a range of early childhood settings At every turn in the journey it asks How is this reflected in a real life context It documents the voices of children practitioners and parents as the learning story develops The Extraordinary Life of A. A. Milne Nadia Cohen,2017-11-30 The true story of the man who created Winnie the Pooh yet struggled to enjoy the overwhelming success that it brought him Thanks to a phenomenally popular collection of whimsical children s stories about a boy named Christopher Robin and his beloved teddy bear A A Milne remains a household name in almost every corner of the globe Generations have grown up loving the tales of Winnie the Pooh and his friends from the Hundred Acre Wood But though his work brought unparalleled joy to millions Alan Alexander Milne himself was never able to enjoy the fame and fortune they brought him He died deeply resenting Pooh s success as far as he was concerned those stories were just a tiny fraction of his literary work but nothing else he produced came close in terms of public appreciation Milne died still unable to reconcile the fact that no matter what else he wrote regardless of all the plays and stories for adults he had published he would always be remembered as a children s storyteller And his son widely hailed as the inspiration for Christopher Robin could never accept his unique place in literary history either He had barely reached his teens before he grew to loathe his famous father who he bitterly accused of exploiting his early years This biography delves deep into the life of Milne shedding light on new places and telling stories untold *Overland Monthly* ,1910
