Leadership Wisdom from Unlikely Voices Dave Fleming, 2004 For leaders who've read every leadership book or just feel like they have Most leaders feel like they've read all there is to read about leadership but are still frustrated when the tools of professionals fail to work Leadership Wisdom from Unlikely Voices takes leaders off the frustrating path of doing leadership and into the more meaningful place of being a leader Rather than focusing on new tools or techniques author Dave Fleming draws on the voices of contemplative thinkers and their views on issues that affect leaders today Nouwen Augustine Underhill Benedict and others offer readers insight from outside the world of leadership on how to regain the humanity of being a leader Each chapter includes interactive exercises that allow readers to reflect on what they're learning evaluate ideas and then implement those ideas that resonate most

Blueprint for Reconstruction Vincent Frank Bedogne, 2010-04-14 Inspired by a vision of soaring towers high speed transit cars pristine skies and blossoming gardens we move beyond today's automobile based urban model and embrace a design where the freedom of the individual is paramount and the human energy that defines city life flows unimpeded within an urban matrix engineered to allow for its highest expression Author Vincent Frank Bedogne drafts a blueprint for what humanity's Evolution of Consciousness and adoption of Economics of Fulfillment make it possible to achieve perfection of life on earth We draw a plan for reconstruction of the earth's urban and ecological infrastructure the city of tomorrow the countryside of tomorrow how we will get around and communicate We embrace a new environmentalism explore future sources of energy reveal the solution to humanity's present energy crisis and look at how we will build to withstand the climatic rigors imposed by a biosphere in evolution

The Great War and the Death of God Charles A. O'Connor, 2014-04-07 A compelling analysis of how World War I spurred the rise of atheism and the subsequent effect on Western theology philosophy literature and art The catastrophic Great War left humanity in a world no longer trustworthy and reassuring but seemingly meaningless and indifferent Instead of redressing humanity's cosmic alienation postwar Western culture abandoned its concern for cosmic meaning lost its confidence in human reason and enabled the scientific worldview of neo Darwinian materialism to emerge

and eventually dominate the Western mind According to the proponents of that worldview science is the only source of genuine truth nature is the product of a blind evolutionary process and reality at bottom is just physics and chemistry Thus God is dead and continued belief in a transcendently purposeful universe is intellectually indefensible and either disingenuous or delusional By turning away from the eternal questions about the nature of reality Western culture effectively ceded unwarranted credibility and prominence to neo Darwinian materialism including its recently strident New Atheism O Connor revisits the 20th century s journey from Nietzsche s declaration of the death of God to the rise of materialism as the dominant worldview of western intelligentsia We live in a world that has largely expelled both mind and meaning from the citadels of serious intellectual pursuit and O Connor s book is a fascinating and scholarly expedition into the how and why of that troubling development Carter Phipps author of *Evolutionaries* I found this topic to be top rate The book is well researched and conceived nicely narrated and analyzed and an original body of inquiry into a challenging fascinating intellectual tradition Ronald M Johnson Professor Emeritus of American History Georgetown University *A More Perfect Union* Linda Sargent Wood,2012-08-01 In 1962 when the Cold War threatened to ignite in the Cuban Missile Crisis when more nuclear test bombs were detonated than in any other year in history Rachel Carson released her own bombshell *Silent Spring* to challenge society s use of pesticides To counter the use of chemicals and bombs the naturalist articulated a holistic vision She wrote about a web of life that connected humans to the world around them and argued that actions taken in one place had consequences elsewhere Thousands accepted her message joined environmental groups flocked to Earth Day celebrations and lobbied for legislative regulation Carson was not the only intellectual to offer holistic answers to society s problems This book uncovers a sensibility in post World War II American culture that both tested the logic of the Cold War and fed some of the twentieth century s most powerful social movements from civil rights to environmentalism to the counterculture The study examines important leaders and institutions that embraced and put into practice a holistic vision for a peaceful healthful and just world nature writer Rachel Carson structural engineer R Buckminster Fuller civil rights leader Martin Luther King Jr Jesuit priest and paleontologist Pierre Teilhard de Chardin humanistic psychologist Abraham Maslow and the Esalen Institute and its founders Michael Murphy and Dick Price Each looked to whole systems instead of parts and focused on connections interdependencies and integration to create a better world Though the 60s dreams of creating a more perfect world were tempered by economic inequalities political corruption and deep social divisions this holistic sensibility continues to influence American culture today **Neurosphere** Donald P. Dulchinos,2025-09-12 According to Donald Dulchinos the real action on the Internet isn t in the realm of commerce It is plain and simple in the realm of religion But not exactly that old time religion This book is about the spiritual impact of our increasing ability to communicate quickly and with enhanced evolution It s about our search for meaning our hunger for a glimpse at humanity s future development in which frighteningly or excitingly the trend is clearly toward increasing integration of

telecommunications and information technology with the body itself Electronic prosthetics direct neural implants and the brain s control of electronic and mechanical limbs move the boundary that used to exist between human and machine to some undefined frontier inside our bodies our brains and perhaps our minds And if the electronics inside my brain connect directly with the electronics inside your brain how is it meaningful to speak as though we are not part of one larger entity Dulchinos writes Another way of saying this might be that everything that rises must converge Or we are all part of God Or we are all moving toward living in the field sharing Group Mind Dulchinos traces ideas of evolution anthropology biology and theology all of which point toward a betterment a unity and argues cogently that these ideas find their embodiment in the technology of the World Wide Web Neurosphere or God or Group Mind call it what you will is about technology and the mechanics of unity Although other books on new technology and new consciousness touch on many of the ideas in Neurosphere none do so in quite such a straightforward logical way Dulchinos has a way of telling personal stories that make the technical accessible to the dreamer the spiritual comprehensible to the skeptic and the future of body technology less fear inducing to everyone

Innovation Ecosystems Michel Saloff-Coste,2022-06-22 Our current situation marked simultaneously by the Anthropocene global warming digitization and exponential artificial intelligence leads us to sudden and total change in global civilization and de facto to rebuilding the foundations of the international economy Innovation Ecosystems explores the risks and opportunities facing the contemporary world by analyzing comparing and categorizing the world s most dynamic innovation ecosystems by region and city This includes the identification of key characteristics common or original and learning from them in terms of culture management system and structure in order to meet current challenges and think about civilizations of the future

Economics of Fulfillment Vincent Frank Bedogne,2009-05-13 At present every nation embraces a blend of two major economic philosophies socialism and capitalism Does either system of economic belief however meet our needs Faced with uncertain global economic conditions and problems with capitalism and free markets we seek solutions in socialism and government control Faced with declining individual freedom and problems with socialism and government control we seek solutions in capitalism and free markets In light of the emerging evolution of consciousness view of the universe we see economics in all its past and contemporary forms those that lean toward socialism and those that lean toward capitalism as obsolete A new economic philosophy reveals itself an economics for tomorrow an economics of fulfillment
