advice on the potential opportunities as well as legal consequences or pitfalls in the conduct and expansion of the telecoms business in Europe Written on a country by country basis each chapter is contributed by a telecommunications expert from their respective country All chapters follow the same format and cover the same topics allowing comparative analyses The reader has an all in one report on the current legal status of the telecom markets in European countries to save them valuable research time to ensure they have a clear idea of the business opportunities in the telecommunications sector of each country

Regulating Telecommunications in the EU and China Bernd Holznapel, Junqi Xu, Thomas Hart, 2009 Chinese as well as European regulatory decisions need to consider regional particularities but insist on an implementation system that never loses sight of its goal In the area of electronic communications policy this goal is the establishment of a market environment that ensures innovation high quality and affordable prices The present survey aims at improving the process of knowledge exchange between European and Chinese experts and decision makers in Information Society law and policy The EU China Information Society Project asked the authors to assess both the EU s and the Chinese status quo and to bring together both perspectives together in a joint effort to learn from the EU experiences for the Chinese decision making process today

EC Competition and Telecommunications Law Andreas Bartosch, Jens-Daniel Braun, 2009-01-01 This new volume updates the groundbreaking analysis of its first edition in 2002 when the EC common regulatory framework for electronic communications networks and services had just entered into force So much has changed in the intervening years that that this new edition bears little resemblance to its predecessor with every chapter either extensively altered or entirely new It remains however the most detailed and comprehensive overview available of the application of the EC Treaty s competition rules in the markets for telecommunications and audiovisual media and of the applicable regulatory framework In thirteen chapters each contributed by one or more noted legal authorities in the field the second edition of EC Competition and Telecommunications Law covers the full range of EC telecommunications law across all major areas of both institutional and substantive law both on the international and EC levels including the following State aid the merger control regulation justification for sector specific regulation in EC competition law network access authorizations and privileges and mobile telephony Relevant EC media and communications law and relevant aspects of EC competition law are dealt with in detail While some chapters focus on competition law others deal primarily with sector specific regulation There is practical guidance throughout on procedural matters alongside analysis of the substantive provisions Well known in its first edition this thoroughly revised and updated version continue to be vital reading for practitioners in particular those specializing in European competition law and for company and in house lawyers who are seeking advice on how European law affects their business As a detailed analysis of the basic legislative and regulatory framework of European telecommunications law it will be an invaluable reference work for lawyers judges regulators and policymakers in all the EC Member States as well as for students and teachers of European law

Telecommunications Law and Regulation Ian Walden, 2009-02-19 Since the last

edition of the book was published there have been a number of important developments in the telecommunications industry for example the operational separation of BT in the UK which may prove a model for the rest of Europe in dealing with incumbent operators and the debate over network neutrality in the US which is dominating the roll out of the infrastructure Telecommunications Law and Regulation is fully updated and contains new chapters on technology and markets and capacity agreements Other topics addressed in this new edition include the consequences of convergence within an EU and international context including the blurring of conduit and content regulations the implications of IP and Next Generation Networks issues of communication privacy in the context of the war on terrorism and how these impact on the commercial operations of service providers the obtaining and trading of spectrum with governments and regulators looking to fully exploit the digital dividend and the application of ex post competition law to the sector as governments attempt to deregulate competitive markets The book examines all aspects of EU 2003 regime implementation issues and the proposed reforms arising from the 2006 review Written by leading experts in the field it offers comprehensive coverage of the law and regulatory structures relating to telecommunications It is essential reading for legal practitioners involved in the telecommunications industry and of interest to management consultants bankers and accountants who will need to be aware of the legal implications of this fast changing area It is also a highly accessible and thought provoking book for postgraduate study
