Telecommunications Harry Charles Katz, 1997 Telecommunications provides the first comparative description of a pivotal service industry in which deregulation privatization and globalization have shaped corporate strategies and structure and altered the nature of work A chapter is devoted to each of the countries discussed the United States England Canada Australia Japan Germany Italy Norway Mexico and Korea To facilitate comparisons the authors use a common framework in analyzing changes and their implications for work and employment relations Most employees in telecommunications both white collar and blue collar are unionized and that has highlighted the tension between downsizing and participatory employment strategies The authors describe adjustment paths adopted in the United States England Canada and Australia which emphasize a technology and market driven approach in contrast to Japan and several European countries where labor and social pressures have mediated the course and consequences of industrial adjustment The strategic approach in Korea and Mexico is again different relying on the state to set the pace and terms of change The United States and United Kingdom have emerged as pattern leaders in the international telecommunications industry through their aggressive deregulation and restructuring While downsizing has devastated employee morale experiments in alternative solutions based on union and employee participation are simultaneously underway

Theoretical Perspectives on Work and the Employment Relationship Bruce E. Kaufman, Industrial Relations Research Association, 2004 Developing a strong theoretical base for research and practice in industrial relations and human resource management has to date remained a largely unfulfilled challenge This text presents contributions from 15 scholars developing their perspectives on work and the employment relationship Labor, Business, and Change in Germany and the

Katz, Owen Darbshire, 2018-08-06 Exploring recent changes in employment practices in seven industrialized countries Australia Britain Germany Italy Japan Sweden and the United States and in two essential industries automobile and telecommunications Harry C Katz and Owen Darbshire find that traditional national systems of employment are being challenged by four cross national patterns The patterns which are becoming ever more prevalent can be categorized as low wage human resource management Japanese oriented and joint team based strategies The authors go on to show that these changing employment patterns are closely related to the decline of unions and growing income inequality Drawing upon plant level evidence on emerging employment practices they provide a comprehensive analysis of changes in employment systems and labor management relations They conclude that while the variation in employment patterns is increasing within countries evidence suggests that there is much commonality across countries in the nature of that variation and also similarity in the processes through which variation is appearing Hence the term converging divergences

The New Structure of Labor Relations Harry C. Katz, Wonduck Lee, Joohee Lee, 2018-07-05 Tripartism the national level interaction among representatives of labor management and government occurs infrequently in the United States Based on the U S experience then such interactions might seem irrelevant to economic performance and policymaking The essays in this volume reveal the falsity of that assumption Contributors from eight industrialized countries Australia Germany Ireland Italy Japan Korea the Netherlands and the United States examine the changing nature of labor management relations with a particular focus on the role of tripartism and the decentralization of collective bargaining Although nonexistent in the United States and on the decline in Japan and Australia tripartism flourishes in Germany Ireland and the Netherlands expanding beyond traditional corporatist partners to include women s organizations senior citizens and other representatives of civic society The vibrancy of the coordinating mechanisms that help shape employment conditions and labor policy contradicts the traditional belief that an overpowering unilateral decentralizing shift is underway in labor management interactions The contributors show that these mechanisms are in fact increasing in the face of intensified pressures promoting greater flexibility in work organization and working time

Work and Employment in the High Performance Workplace Giles Anthony,Jacques Belanger,Paul-Andre Lapointe,Gregor Murray,2013-10-11 There is a general consensus that deep seated changes are reshaping the way production and work are organized the way employees employers and their representatives deal with each other and the way governments seek to shape society In this work a group of leading scholars take stock of the evidence and implications of the new workplace Drawing on examples from a variety of national contexts they seek to characterize the nature of contemporary workplace change and assess its implications for the organization of work for workers for employment relations and for public policy

the International Confederation of Free Trade Unions National Capitalisms, Global Competition, and Economic Performance Sigrid Quack, Glenn Morgan, Richard Whitley, 2000 Why are some firms successful on global markets whilst others are not In this collection of papers a group of distinguished international researchers examine the inter relationship between national context firm performance and global competitiveness In a series of empirical studies covering major industries such as banking telecommunications construction automobiles and airlines in a number of European countries Great Britain France Germany Holland Finland Slovenia the studies show how distinctive patterns of firm competences and capabilities arise from national contexts These influence the way in which firms perform in response to changing technologies and competitive pressures Thus the impact of the globalisation of economic activity may be to reinforce existing national differences in firm performance rather than producing a homogenisation and standardisation This book will be of interest to researchers in business and management sociology economics and political science for its comparative organizational approach to problems of economic performance **People and Culture in Construction** Andrew Dainty, Stuart Green, Barbara Bagilhole, 2007-05-07 Construction is one of the largest and most people intensive industrial sectors In many countries however construction is also one of the most highly criticized in terms of its employment practices and industrial relations People and culture are too often seen as variables that must be manipulated in the cause of improved productivity This important new work provides an essential corrective to the current literature by focusing on people and culture rather than sector efficiency It presents the latest thinking from a diversity of perspectives derived from a major ESRC seminar series and invited contributions from leading researchers Its interdisciplinary approach draws together industry and research and is international in its relevance Through several multidisciplinary themes People and Culture in Construction explores the industry s labour market and the major influences on employment patterns examines how to improve the image and reality of the construction sector as an employer looks at the forces shaping the industry and implications for its stability considers the current composition of the workforce and the potential impacts of workforce diversification analyzes the impact of government targets and policies on construction working practices and culture investigates how to address the skills shortfall currently affecting the industry s performance **Labor Relations in a Globalizing World** Harry C. Katz, Thomas A. Kochan, Alexander J. S. Colvin, 2015-06-04 Compelled by the extent to which globalization has changed the nature of labor relations Harry C Katz Thomas A Kochan and Alexander J S Colvin give us the first textbook to focus on the workplace outcomes of the production of goods and services in emerging countries In Labor Relations in a Globalizing World they draw lessons from the United States and other advanced industrial countries to provide a menu of options for management labor and government leaders in emerging countries They include discussions based in countries such as China Brazil India and South Africa which given the advanced levels of economic development they have already achieved are often described as transitional because the labor relations practices and procedures used in those

countries are still in a state of flux Katz Kochan and Colvin analyze how labor relations functions in emerging countries in a manner that is useful to practitioners policymakers and academics They take account of the fact that labor relations are much more politicized in emerging countries than in advanced industrialized countries They also address the traditional role played by state dominated unions in emerging countries and the recent increased importance of independent unions that have emerged as alternatives These independent unions tend to promote firm or workplace level collective bargaining in contrast to the more traditional top down systems Katz Kochan and Colvin explain how multinational corporations nongovernmental organizations and other groups that act across national borders increasingly influence work and employment outcomes

Rethinking Work Mark Hearn, Grant Michelson, 2006-02-13 This 2006 book is structured around the themes of time space and discourse as they are applied to our working lives

Disintegrating Democracy at Work Virginia Doellgast, 2012-02-15 The shift from manufacturing to service based economies has often been accompanied by the expansion of low wage and insecure employment Many consider the effects of this shift inevitable In *Disintegrating Democracy at Work* Virginia Doellgast contends that high pay and good working conditions are possible even for marginal service jobs This outcome however depends on strong unions and encompassing collective bargaining institutions which are necessary to give workers a voice in the decisions that affect the design of their jobs and the distribution of productivity gains Doellgast s conclusions are based on a comparative study of the changes that occurred in the organization of call center jobs in the United States and Germany following the liberalization of telecommunications markets Based on survey data and interviews with workers managers and union representatives she found that German managers more often took the high road than those in the United States investing in skills and giving employees more control over their work Doellgast traces the difference to stronger institutional supports for workplace democracy in Germany However these democratic structures were increasingly precarious as managers in both countries used outsourcing strategies to move jobs to workplaces with lower pay and weaker or no union representation Doellgast s comparative findings show the importance of policy choices in closing off these escape routes promoting broad access to good jobs in expanding service industries
