Telecommunications Liberalization on Two Sides of the Atlantic Martin Cave,Robert W. Crandall,2004-06-23 A Brookings Institution Press and American Enterprise Institute publication The 1990s witnessed a major revolution in telecommunications policy in North America and Europe The electronics revolution swept the world and most countries began to realize that they could not compete in many markets without a vibrant competitive telecommunications sector As a result the European Union Canada and the United States launched major new liberalization policies aimed at opening all telecommunications markets to competition This report presents two views of the progress towards competition one for North America and one for Europe The authors provide an overview of the market structure on both continents prior to the 1990s discuss significant regulatory changes during that decade and analyze changes in rate structures and competition that have occurred since liberalization They conclude with a look at the present and future impact of the Internet and other new technologies on the telecommunications industry   Telecommunications liberalization on two sides of the Atlantic Martin E. Cave,Robert W. Crandall,2002   **A Policy Note on Telecommunications Reform in Algeria** ,   Telecommunications Law and Regulation Ian Walden,2012-09-13 Since the last edition of the book was published there have been a number of important developments in the telecommunications industry Telecommunications Law and Regulation takes these changes into account including an examination of the EU New Regulatory Framework as well as the establishment of the Body of European Regulators for Electronic Communications BEREC There are also new chapters on spectrum management radio frequencies and consumer protection rules The access and interconnection chapter addresses the issues surrounding the high capacity broadband widely provided by Next Generation Networks The chapter on licensing and authorisation has been refocused to reflect the increasing regulatory focus on the mobile sector The chapter on regulating content has also been significantly restructured and revised to reflect the changes in how we consume content Written by leading experts it is essential reading for legal practitioners and academics involved in the telecommunications industry

Telecommunications Regulatory Reform in Small Island Developing States Siope Vakataki 'Ofa,2011-11-15 This book adopts an approach of mixed method research with an in depth qualitative comparative case study analysis triangulated by a quantitative statistical analysis In particular the book attempts to capture Small Island Developing States control variables in its empirical analysis often omitted from telecommunications empirical studies due to limited data Based on the smallest and most isolated small island states in the World the research s comparative case study analysis was conducted in five Pacific Island States Fiji Papua New Guinea Samoa Tonga and Vanuatu The book documents the early account of domestic telecommunications policies in Pacific Island case studies deemed useful for future research In addition the book proposes concrete policy insights to Small Island Developing State governments telecommunications operators academics and relevant international institutions The book attempts to link three different strands of academic literatures namely

islandness telecommunications policy reform and international trade agreements WTO through analyzing the political economy of telecommunications reform in an island economy context and the role of the fixed rules of the World Trade Organization on the credibility of telecommunications reform The Liberalisation of the Telecommunications Sector in Sub-Saharan Africa and Fostering Competition in Telecommunications Services Markets Rachel Alemu,2018-02-02 This study investigates whether the existing regulatory framework governing the telecommunications sector in countries in Sub Saharan Africa effectively deals with emerging competition related concerns in the liberalised sector Using Uganda as a case study it analyses the relevant provisions of the law governing competition in the telecommunications sector and presents three key findings Firstly while there is comprehensive legislation on interconnection and spectrum management inefficient enforcement of the legislation has perpetuated concerns surrounding spectrum scarcity and interconnection Secondly the legislative framework governing anti competitive behaviour though in line with the established principles of competition law is not sufficient Specifically the framework is not equipped to govern the conduct of multinational telecommunications groups that have a strong presence in the telecommunications sector Major factors hampering efficient competition regulation include Uganda s sole reliance on sector specific competition rules restricted available remedies and a regulator with limited experience of enforcing competition legislation The weaknesses in the framework strongly suggest the need to adopt an economy wide competition law Lastly wireless technology is the main means through which the population in Uganda accesses telecommunications services Greater emphasis should be placed on regulating conduct in the wireless communications markets **Telecommunications and Energy in Systemic Transformation** Paul J.J.
