Ahmed, Róka, Rastislav, 2019-07-05 By the end of the decade approximately 50 billion devices will be connected over the internet using multiple services such as online gaming ultra high definition videos and 5G mobile services The associated data traffic demand in both fixed and mobile networks is increasing dramatically causing network operators to have to migrate the existing optical networks towards next generation solutions The main challenge within this development stems from network operators having difficulties finding cost effective next generation optical network solutions that can match

future high capacity demand in terms of data reach and the number of subscribers to support multiple network services on a common network infrastructure

Design Implementation and Analysis of Next Generation Optical Networks Emerging Research and Opportunities is an essential reference source that discusses the next generation of high capacity passive optical access networks PON in terms of design implementation and analysis and offers a complete reference of technology solutions for next generation optical networks Featuring research on topics such as artificial intelligence electromagnetic interface and wireless communication this book is ideally designed for researchers engineers scientists and students interested in understanding designing and analyzing the next generation of optical networks

Traffic Theories for New Telecommunications Services N. M. van Dijk, 1990 Selected papers from the Specialist Seminar of the Adelaide International Teletraffic Congress are presented in this book Together they give an excellent sample of the work being done around the world to define and meet the new challenges in Teletraffic theory and practice Although many questions are answered here the papers pose many more problems which are still to be solved Many papers present methods for solving problems that will remain difficult even as computing speed increases exponentially The methods used include heuristic and AI approaches approximations simplifications new approaches to numerical analysis and simulation and some new techniques borrowed from other disciplines While some problems are hard to solve because of complexity others are difficult because of uncertainty Some forms of uncertainty may be quantified and dealt with by using probability theory many examples may be found in this volume Further papers show that stationary stochastic processes are now being challenged as other models are also tried
