Teleological Realism Mind Agency And Explanation:

Teleological Realism Scott Robert Sehon, 2005 A non reductionist account of mind and agency claiming that common sense psychological explanations are teleological and not causal Using the language of common sense psychology CSP we explain human behavior by citing its reason or purpose and this is central to our understanding of human beings as agents On the other hand since human beings are physical objects human behavior should also be explicable in the language of physical science in which causal accounts cast human beings as collections of physical particles CSP talk of mind and agency however does not seem to mesh well with the language of physical science In Teleological Realism Scott Sehon argues that CSP explanations are not causal but teleological that they cite the purpose or goal of the behavior in question rather than an antecedent state that caused the behavior CSP explanations of behavior Sehon claims are answering a question different from that answered by physical science explanations and accordingly CSP explanations and physical science explanations are independent of one another Common sense facts about mind and agency can thus be independent of the physical facts about human beings and contrary to the views of most philosophers of mind in recent decades common sense psychology will not be subsumed by physical science Sehon defends his non reductionist account of mind and agency in clear and nontechnical language He carefully distinguishes his view from forms of strong naturalism that would seem to preclude it And he evaluates key objections to teleological realism including those posed by Donald Davidson s influential article Actions Reasons and Causes and some put forth by more recent proponents of causal theories of action CSP Sehon argues has a different realm than does physical science the normative notions that are central to CSP are not reducible to physical facts and laws

Understanding Mental Causation Andrea White, 2024-12-17 Understanding Mental Causation proposes a new non relational theory of mental causation Andrea White believes that contemporary philosophy of mind labours under a misapprehension of what mental causation is supposed to be This volume explains where the leading theories go astray and how the new theory proposed solves critical problems for philosophers of mind and action Ordinary experience suggests that what we do with our bodies causally depends somehow on what is going on in our minds However the problem of how to understand the causal relationship between mind and body remains Contemporary philosophy of mind is shaped by the question how is it possible for the mental to causally interact with the physical Mental causation is often presented as a cause effect relation between mental and physical entities This understanding of mental causation is widely endorsed because it seems like a straightforward explanation of what is going on when people act intentionally Desires and beliefs are seen as causes of the actions they explain entailing the existence of causal relations between mental items and physical events White calls this the causalist view of intentional action This view is not universally accepted The non causalist view denies that intentional action entails the existence of causal relations between mental items and physical events However non causalists reach this conclusion by arguing that explanations of intentional actions which cite beliefs or desires are not usually causal

explanations at all White presents a theory of intentional action that falls between the causalist and non causalist views She rejects the idea that as a cause is how we should understand the place of mentality in intentional action Concepts like belief desire and intention do not refer to items which can stand in causal relations to actions or physical events However like causalists she holds that explanations of intentional actions which cite the agent s thoughts do give causal information This intermediary view demands a new theory about the causation that is on display when human beings act intentionally one that does not reduce mental causation to a relation between mental items and physical events Orthodox theories of causation inspired by David Hume assume that causation is always a relation between events Therefore the causation demonstrated in intentional action must be a relation because all causation is and will count as mental causation if and only if at least one of the terms of that relation is a mental entity White challenges this orthodoxy by presenting her own non relational theory of causation Denying causation is always a relation she holds instead that causation is a general type of process in which substances engage and that exercising a causal power is to engage in a process White shows how this novel theory can be used to provide a better understanding of intentional action and the mental causation associated with it She suggests that to act intentionally is to engage in a process and as such to exercise a power but a power of a special sort The power to act intentionally is a power to structure one s own activities so that they demonstrate a pattern a pattern which is only revealed by attributing mental states to the agent So when an agent acts intentionally they engage in the process of mental causation because the agent is manifesting a special power to organise their activities into a pattern that can be made sense of by appeal to mental concepts Broadening our understanding of causation and more specifically incorporating the concepts power and process opens up new ways of understanding intentional action and mental causation In *Understanding Mental Causation* White presents a compelling new account in this key area of philosophy of mind

Understanding Human

Agency Erasmus Mayr,2011-09-15 How can we be active agents when processes in the world are explicable by the laws of natural science Erasmus Mayr explores this deep running tension in our self understanding and develops a new agent causal solution to the conflict He argues that actions explained by aims and reasons are compatible with a scientific view of the universe

Neo-Aristotelian Perspectives in Metaphysics Daniel D. Novotný,Lukáš Novák,2014-04-16 This volume re examines some of the major themes at the intersection of traditional and contemporary metaphysics The book uses as a point of departure Francisco Su rez s *Metaphysical Disputations* published in 1597 Minimalist metaphysics in empiricist pragmatist clothing have today become mainstream in analytic philosophy Independently of this development the progress of scholarship in ancient and medieval philosophy makes clear that traditional forms of metaphysics have affinities with some of the streams in contemporary analytic metaphysics The book brings together leading contemporary metaphysicians to investigate the viability of a neo Aristotelian metaphysics

Free Will and Action Explanation Scott Sehon,2016-04-28 Do we have free will and moral responsibility Is free will compatible with determinism Scott Sehon argues that we can make progress on these

questions by focusing on an underlying issue the nature of action explanation When a person acts or does something on purpose we explain the behavior by citing the agent's reasons The dominant view in philosophy of mind has been to construe such explanations as a species of causal explanation Part I of the book proposes and defends a non causal account of action and agency according to which reason explanation of human behavior is irreducibly teleological rather than causal Part II applies the teleological account of action to free will and responsibility arguing that the free actions the ones for which we are directly responsible are the goal directed actions the actions that are teleologically explicable in terms of our reasons It is then argued that this non causal account of action undermines the appeal of incompatibilist arguments arguments attempting to show that free will is not compatible with determinism Beyond this Sehon argues that the non causal compatibilist account works well in practice it is in accord with our clear intuitions about cases and it both explains and provides guidance in the cases where our intuitions are murkier

Luck's Mischief Ishtiyaque Haji, 2016-01-14 Something is subject to luck if it is beyond our control In Luck's Mischief Haji argues that owing frequently to precluding our being able to otherwise luck limits both the range of what is morally obligatory for us and things for which we are morally responsible

Philosophy of History Jouni-Matti Kuukkanen, 2020-11-12 With a recent surge of interest in the field a volume taking stock of important theoretical shifts in the philosophy of history is greatly needed A Philosophy of History fills this gap by weaving together a range of perspectives on the field which finds itself at a crossroads and asks where it is headed in the 21st century The book takes a concerted effort to go beyond the customary three fold distinction between the speculative analytic and narrativist approaches in philosophy of history It considers what comes after the enduring narrativist turn Chapters incorporate cutting edge discussions on the relevance of contemporary political phenomena such as populism the relation between science and history pragmatism and the paradigmatic challenge of the Anthropocene It also re evaluates the continued relevance of major historical thinkers like Leibniz and R G Collingwood and the endlessly fresh insights they can offer to key debates in the field today Philosophy of History is a much needed reappraisal of the philosophy and theory of history offering an up to date overview of major developments in the field and addressing the pressing questions of where to go next in a post analytical post narrativist world

The Routledge Companion to Free Will Kevin Timpe, Meghan Griffith, Neil Levy, 2016-11-18 Questions concerning free will are intertwined with issues in almost every area of philosophy from metaphysics to philosophy of mind to moral philosophy and are also informed by work in different areas of science principally physics neuroscience and social psychology Free will is also a perennial concern of serious thinkers in theology and in non western traditions Because free will can be approached from so many different perspectives and has implications for so many debates a comprehensive survey needs to encompass an enormous range of approaches This book is the first to draw together leading experts on every aspect of free will from those who are central to the current philosophical debates to non western perspectives to scientific contributions and to those who know the rich history of the subject Chapter 37 of this book is freely available as a

The Metaphysics of Science and Aim-Oriented Empiricism Nicholas Maxwell, 2019-03-09 This book gives an account of work that I have done over a period of decades that sets out to solve two fundamental problems of philosophy the mind body problem and the problem of induction Remarkably these revolutionary contributions to philosophy turn out to have dramatic implications for a wide range of issues outside philosophy itself most notably for the capacity of humanity to resolve current grave global problems and make progress towards a better wiser world A key element of the proposed solution to the first problem is that physics is about only a highly specialized aspect of all that there is the causally efficacious aspect Once this is understood it ceases to be a mystery that natural science says nothing about the experiential aspect of reality the colours we perceive the inner experiences we are aware of That natural science is silent about the experiential aspect of reality is no reason whatsoever to hold that the experiential does not objectively exist A key element of the proposed solution to the second problem is that physics in persistently accepting unified theories only thereby makes a substantial metaphysical assumption about the universe it is such that a unified pattern of physical law runs through all phenomena We need a new conception and kind of physics that acknowledges and actively seeks to improve metaphysical presuppositions inherent in the methods of physics The problematic aims and methods of physics need to be improved as physics proceeds These are the ideas that have fruitful implications I set out to show for a wide range of issues for philosophy itself for physics for natural science more generally for the social sciences for education for the academic enterprise as a whole and most important of all for the capacity of humanity to learn how to solve the grave global problems that menace our future and thus make progress to a better wiser world It is not just science that has problematic aims in life too our aims whether personal social or institutional are all too often profoundly problematic and in urgent need of improvement We need a new kind of academic enterprise which helps humanity put aims and methods improving meta methods into practice in personal and social life so that we may come to do better at achieving what is of value in life and make progress towards a saner wiser world This body of work of mine has met with critical acclaim Despite that astonishingly it has been ignored by mainstream philosophy In the book I discuss the recent work of over 100 philosophers on the mind body problem and the metaphysics of science and show that my earlier highly relevant work on these issues is universally ignored the quality of subsequent work suffering as a result My hope in publishing this book is that my fellow philosophers will come to appreciate the intellectual value of my proposed solutions to the mind body problem and the problem of induction and will as a result join with me in attempting to convince our fellow academics that we need to bring about an intellectual institutional revolution in academic inquiry so that it takes up its proper task of helping humanity learn how to solve problems of living including global problems and make progress towards as good as wise and enlightened a world as possible

A Companion to the Philosophy of Action Timothy O'Connor, Constantine Sandis, 2012-08-02 A

Companion to the Philosophy of Action offers a comprehensive overview of the issues and problems central to the philosophy of action. The first volume to survey the entire field of philosophy of action, the central issues and processes relating to human actions. Brings together specially commissioned chapters from international experts. Discusses a range of ideas and doctrines including rationality, free will, and determinism; virtuous action; criminal responsibility; Attribution Theory; and rational agency in evolutionary perspective. Individual chapters also cover prominent historic figures from Plato to Ricoeur. Can be approached as a complete narrative but also serves as a work of reference. Offers rich insights into an area of philosophical thought that has attracted thinkers since the time of the ancient Greeks. Brain-Computer Interfaces and the Philosophy of Mind and Action Sebastian Drosselmeier, 2025-06-30

How can brain computer interfaces enhance our understanding of human agency and mentality? By exploring how these interfaces enable people to perform intentional actions seemingly merely with their thoughts, Drosselmeier delves into three core metaphysical issues in the philosophy of mind: agency, mental causation, and the mind-brain relationship. He argues that brain computer interfaces provide a unique perspective on these issues, demonstrating both the irreducible higher-level nature of human thought and action and their continuity with lower-level scientific phenomena. This dual perspective helps bridge the apparent gap between our commonsense psychological understanding of mind and action and a scientific worldview. The relevance of this work extends beyond theoretical philosophy, providing practical implications for the development and ethical considerations of emerging neurotechnologies. This publication is essential for scholars and researchers in philosophy, cognitive science, and neuroscience, offering a comprehensive framework that integrates philosophical inquiry with cutting-edge scientific advancements. **Down But Not Out** Alberto Voltolini, 2022-05-12. This book provides a detailed reassessment of the role and impact of analytic philosophy in the overall philosophical debate. It does so by focusing on several important turning points that have been particularly significant for analytic philosophy's overall history, such as Bertrand Russell's critique of Meinong and the vindication of Heidegger's famous 'Nothing' sentence. In particular, the book scrutinizes whether the theses written about such points have been convincingly argued for or whether they have gained attraction as a type of rhetorical device. Due to its broad nature, this book is of interest to scholars interested in all aspects of philosophy at both graduate level and above.

Generative Mechanisms Transforming the Social Order Margaret S. Archer, 2015-02-18. This volume examines how generative mechanisms emerge in the social order and their consequences. It does so in the light of finding answers to the general question posed in this book series: Will Late Modernity be replaced by a social formation that could be called Morphogenic Society? This volume clarifies what a generative mechanism is to achieve a better understanding of their social origins and to delineate in what way such mechanisms exert effects within a current social formation, either stabilizing it or leading to changes potentially replacing it. The book explores questions about conjuncture, convergence, and countervailing effects of morphogenetic mechanisms in order to assess their impact. Simultaneously, it looks at how products of positive

feedback intertwine with the results of morphostatic negative feedback This process also requires clarification especially about the conditions under which morphostasis prevails over morphogenesis and vice versa It raises the issue as to whether their co existence can be other than short lived The volume addresses whether or not there also is a process of morpho necrosis i e the ultimate demise of certain morphostatic mechanisms such that they cannot recover The book concludes that not only are generative mechanisms required to explain associations between variables involved in the replacement of Late Modernity by Morphogenic Society but they are also robust enough to account for cases and times when such variables show no significant correlations

Explanation in Action Theory and Historiography Gunnar Schumann,2019-05-29 Is the appropriate form of human action explanation causal or rather teleological While this is a central question in analytic philosophy of action it also has implications for questions about the differences between methods of explanation in the sciences on the one hand and in the humanities and the social sciences on the other Additionally this question bears on the problem of the appropriate form of explanations of past human actions and therefore it is prominently discussed by analytic philosophers of historiography This volume brings together causalists and anti causalists to address enduring philosophical questions at the heart of this debate as well as their implications for the practice of historiography Part I considers the quarrel between causalism and anti causalism in recent developments in the philosophy of action Part II presents papers by causalists and anti causalists that are more narrowly focused on the philosophy of historiography

Our Fundamental Problem Nicholas Maxwell,2020-06-03 How can the world we live in and see touch hear and smell the world of living things people consciousness free will meaning and value how can all of this exist and flourish embedded as it is in the physical universe made up of nothing but physical entities such as electrons and quarks How can anything be of value if everything in the universe is ultimately just physics In *Our Fundamental Problem* Nicholas Maxwell argues that this problem of reconciling the human and physical worlds needs to take centre stage in our thinking so that our best ideas about it interact with our attempts to solve even more important specialized problems of thought and life When we explore this fundamental problem Maxwell argues revolutionary answers emerge for a wide range of questions arising in philosophy science social inquiry academic inquiry as a whole and most important of all our capacity to solve the global problems that threaten our future climate change habitat destruction extinction of species inequality war pollution of earth sea and air An unorthodox introduction to philosophy *Our Fundamental Problem* brings philosophy down to earth and demonstrates its vital importance for science scholarship education life and the fate of the world

The Compatibility of Evolution and Design E. V. R. Kojonen,2021-08-10 This book challenges the widespread assumption of the incompatibility of evolution and the biological design argument Kojonen analyzes the traditional arguments for incompatibility and argues for salvaging the idea of design in a way that is fully compatible with evolutionary biology Relating current views to their intellectual history Kojonen steers a course that avoids common pitfalls such as the problems of the God of the gaps the problem of natural evil and the traditional

Humean and Darwinian critiques The resulting deconstruction of the opposition between evolution and design has the potential to transform this important debate

Pragmatism John R. Shook, 2023-05-02 A concise reader friendly overview of pragmatism the most influential school of American philosophical thought Pragmatism America's homegrown philosophy has been a major intellectual movement for over a century Unlike its rivals it reaches well beyond the confines of philosophy into concerns and disciplines as diverse as religion politics science and culture In this concise engagingly written overview John R Shook describes pragmatism's origins concepts and continuing global relevance and appeal With attention to the movement's original thinkers Charles Sanders Peirce William James John Dewey and George Herbert Mead as well as its contemporary proponents he explains how pragmatism thinks about what is real what can be known and what minds are doing And because of pragmatism's far reaching impact Shook shows how its views on reality truth knowledge and cognition coordinate with its approaches to agency sociality human nature and personhood

A Philosophy of the Humanities Stephen R. Grimm, Professor of Philosophy and Chair of the Department of Philosophy Stephen R Grimm, Rik Peels, University Research Chair in Analytic and Interdisciplinary Philosophy Rik Peels, René van Woudenberg, 2025 This ground breaking book opens up new vistas on the study of the humanities Co authored by three philosophers it offers an in depth exploration of a range of questions For example what if anything unifies scholarship in the humanities Is it possible to attain objective truth in fields like history or literary studies or philosophy or is everything a matter of perspective or standpoint It is possible for fields in the humanities to make progress and if so how And what should we make of the political aims of the humanities for example the desire by many scholars in the humanities to uncover systems of oppression and domination Does this interfere with objective scholarship or not A host of new topics are also considered such as whether or not replication studies are possible and worthwhile in the context of the humanities and whether deference to other scholars is legitimate in the humanities Finally new case studies are introduced that look at how fields such as history literary studies and musicology advance our understanding of their topics and a provocative set of new rules for interpretation in the humanities are proposed

Freedom, Teleology, and Evil Stewart Goetz, 2011-10-27 In Freedom Teleology and Evil Stewart Goetz defends the existence of libertarian freedom of the will He argues that choices are essentially uncaused events with teleological explanations in the form of reasons or purposes Because choices are uncaused events with teleological explanations whenever agents choose they are free to choose otherwise Given this freedom to choose otherwise agents are morally responsible for how they choose Thus Goetz advocates and defends the principle of alternative possibilities which states that agents are morally responsible for a choice only if they are free to choose otherwise Finally given that agents have libertarian freedom Goetz contends that this freedom is integral to the construction of a theodicy which explains why God allows evil
