

## TELESCOPING THE TIMES-Chapter 7 Summary

### The French Revolution and Napoleon, 1789-1815

**CHAPTER OVERVIEW** France's lower classes revolted against the king. Thousands died. Napoleon took control of France and created an empire. After his defeat, European leaders restored the rule of monarchs to the continent.

#### • Revolution Threatens the French King

**KEY IDEA** Economic and social inequalities in the Old Regime helped cause the French Revolution.

In the 1700s, France was the leading country of Europe. It was the center of the new ideas of the Enlightenment. However, beneath the surface there were major problems causing unrest. Soon the nation would be torn by a violent revolution.

One problem was that people were not treated equally in French society. The French were divided into three classes, or estates. The First Estate consisted of the Roman Catholic clergy. The Second Estate was made up of rich nobles. Only about two percent of the people belonged to these two estates. Yet they owned 30 percent of the land and paid little or no taxes. They had easy lives.

Everybody else belonged to the Third Estate. This huge group included three types of people:

- the bourgeoisie—mostly well-off merchants and skilled workers who lacked the status of nobles
- city workers—cooks, servants, and others who were poorly paid and often out of work
- peasants—farm workers, making up about 80 percent of the French people

Members of the Third Estate were angry. They had few rights. They paid up to half of their income in taxes, while the rich paid almost none.

Three factors led to revolution. First, the Enlightenment spread the idea that everyone should be equal. The powerless people in the Third Estate liked that. Second, the French economy was failing. High taxes kept profits low, and food supplies were short. The government owed money. Third, King Louis XVI was a weak, unconcerned leader. His wife, Marie Antoinette, was a big spender and was disliked.

In the 1780s, deeply in debt, France needed money. Louis tried to tax the nobles. Instead, they forced the king to call a meeting of delegates of the three estates to decide tax issues. The meeting began in May 1789 with arguments over how to count votes. In the past, each estate had cast one vote. The top two estates always voted together and got their way. Now the Third Estate delegates wanted to change the system. The Third Estate had as many delegates as the other two estates combined. They wanted each delegate to have a vote. The king and the other estates did not agree to the plan.

The Third Estate then broke with the others and met separately. In June 1789, its delegates voted to rename themselves the National Assembly. They claimed to represent all the people. This was the beginning of representative government for France.

Louis tried to make peace. He ordered the clergy and nobles to join the National Assembly. However, trouble erupted. Rumors flew that Swiss soldiers paid by Louis were going to attack French citizens. On July 14, an angry crowd captured the Bastille, a Paris prison. The mob wanted to get gunpowder for their weapons in order to defend the city.

A wave of violence called the Great Fear swept the country. Peasants broke into and burned nobles' houses. They tore up documents that had forced them to pay fees to the nobles. Late in 1789, a mob of women marched 12 miles from Paris to the king's palace at Versailles. They were angry about high bread prices and demanded that the king move to Paris. They hoped he would end hunger in the city. The king and queen left Versailles, never to return.

## Telescoping Times:

**Telescoping the Technical News**, 1953      **The Total Survey Error Approach** Herbert F. Weisberg, 2009-12-29 In 1939 George Gallup's American Institute of Public Opinion published a pamphlet optimistically titled *The New Science of Public Opinion Measurement*. At the time though survey research was in its infancy and only now six decades later can public opinion measurement be appropriately called a science based in part on the development of the total survey error approach. Herbert F. Weisberg's handbook presents a unified method for conducting good survey research centered on the various types of errors that can occur in surveys from measurement and nonresponse error to coverage and sampling error. Each chapter is built on theoretical elements drawn from specific disciplines such as social psychology and statistics and follows through with detailed treatments of the specific types of error and their potential solutions. Throughout Weisberg is attentive to survey constraints including time and ethical considerations as well as controversies within the field and the effects of new technology on the survey process from Internet surveys to those completed by phone by mail and in person. Practitioners and students will find this comprehensive guide particularly useful now that survey research has assumed a primary place in both public and academic circles.      [Response Errors in Collection of Expenditures Data by Household Interviews](#) John Neter, Joseph Waksberg, 1965      **Technical Paper**,      **Technical Papers** United States. It differs from other textbooks in that where possible it focuses on thinking in real world settings rather than in controlled laboratory settings and provides detailed treatments of each of the following topics: how we form impressions of and represent persons in memory; how we recognize and represent faces; how we reason in our day to day lives and go about solving everyday problems; how we make judgments and decisions; how we encode memories of events both for future action and for our own life histories; and what are some of the implications of everyday

knowledge and cognition for education and instruction This book presents the theoretical positions and research evidence on each of these topics and examines the generally unexplored connections among them As a result this book presents the study of cognition in a more relevant form and in a context that readers can more readily apply to their own lives *The Fear of Crime* Jason Ditton, Stephen Farrall, 2017-07-05 Studies of the fear of crime have constituted what is undeniably the fastest growing research area within criminology in the last decade and this shows no sign of diminishing The editors have a distinguished record of innovative research in the field being responsible for a number of seminal empirical and theoretical articles In this volume they have collected together and for the first time all the most significant contributions to the field The collection includes an introductory essay by the editors and articles reflecting an overview of the field the causes of vulnerability the sources of information on victimisation the methods used to survey fear the theoretical models employed to explain it and the nature of policies designed to reduce fear **Drug Smuggling** United States.
