Television Fraud:

Television Fraud J. Kent Anderson, 1979-01-05 Anderson provides an unprecedented probe into the inner workings of the quiz shows He details their honest beginnings and explains how the practice of supplying answers grew out of a desire to keep popular contestants on the air as long as possible to boost ratings **Fraud** Edward J. Balleisen, 2017-01-09 A comprehensive history of fraud in America from the early nineteenth century to the subprime mortgage crisis The United States has always proved an inviting home for boosters sharp dealers and outright swindlers Worship of entrepreneurial freedom has complicated the task of distinguishing aggressive salesmanship from unacceptable deceit especially on the frontiers of innovation At the same time competitive pressures have often nudged respectable firms to embrace deception As a result fraud has been a key feature of American business since its beginnings In this sweeping narrative Edward Balleisen traces the history of fraud in America and the evolving efforts to combat it from the age of P T Barnum through the eras of Charles Ponzi and Bernie Madoff Starting with an early nineteenth century American legal world of buyer beware this unprecedented account describes the slow piecemeal construction of modern regulatory institutions to protect consumers and investors from the Gilded Age through the New Deal and the Great Society It concludes with the more recent era of deregulation which has brought with it a spate of costly frauds including the savings and loan crisis corporate accounting scandals and the recent mortgage marketing debacle By tracing how Americans have struggled to foster a vibrant economy without enabling a corrosive level of fraud this book reminds us that American capitalism rests on an uneasy foundation of social trust *Regulation of the Television Repair Industry in Louisiana and California: a Case Study*, by John J. Phelan John J. Phelan, 1974 Frauds Against the Elderly United States. Congress. House. Select Committee on Aging, 1981

Economic Report [on The] Regulation of the Television Repair Industry in Louisiana and California John J. Phelan, 1974 Fifties Television William Boddy, 1993 Just a few years in the mid 1950s separated the golden age of television s live anthology drama from Newton Minow s famous vast wasteland pronouncement Fifties Television shows how the significant programming changes of the period cannot be attributed simply to shifting public tastes or the exhaustion of particular program genres but underscore fundamental changes in the way prime time entertainment programs were produced sponsored and scheduled These changes helped shape television as we know it today William Boddy provides a wide ranging and rigorous analysis of the fledgling American television industry during the period of its greatest economic growth programming changes and critical controversy He carefully traces the development of the medium from the experimental era of the 1920s and 1930s through the regulatory battles of the 1940s and the network programming wars of the 1950s **Television Histories** Gary Richard Edgerton, Peter C. Rollins, 2001-01-01 From Ken Burns s documentaries to historical dramas such as Roots from A E s Biography series to CNN television has become the primary source for historical information for tens of millions of Americans today Why has television become such a respected authority What falsehoods

enter our collective memory as truths How is one to know what is real and what is imagined or ignored by producers directors or writers Gary Edgerton and Peter Rollins have collected a group of essays that answer these and many other questions The contributors examine the full spectrum of historical genres but also institutions such as the History Channel and production histories of such series as The Jack Benny Show which ran for fifteen years The authors explore the tensions between popular history and professional history and the tendency of some academics to declare the past off limits to nonscholars Several of them point to the tendency for television histories to embed current concerns and priorities within the past as in such popular shows as Quantum Leap and Dr Quinn Medicine Woman The result is an insightful portrayal of the power television possesses to influence our culture

How Real Is Reality TV? David S. Escoffery, 2014-12-03 American viewers are attracted to what they see as the non scripted unpredictable freshness of reality television But although the episodes may not be scripted the shows are constructed within a deliberately designed framework reflecting societal values The political economic and personal issues of reality TV are in many ways simply an exaggerated version of everyday life allowing us to identify perhaps more closely than we care to admit with the characters onscreen With 16 essays from scholars around the world this volume discusses the notion of representation in reality television It explores how both audiences and producers negotiate the gulf between representations and truth in reality shows such as Survivor The Apprentice Big Brother The Nanny American Idol Extreme Makeover Joe Millionaire and The Amazing Race Various identity categories and character types found in these shows are discussed and the accuracy of their television portrayal examined Dealing with the concept of reality audience reception gender roles minority portrayal and power issues the book provides an in depth look at what we see or think we see in reality TV

TV by Design Lynn Spigel, 2008 From the Publisher While critics have long disparaged commercial television as a vast wasteland TV has surprising links to the urbane world of modern art that stretch back to the 1950s and 60s during that era the rapid rise of commercial television coincided with dynamic new movements in the visual arts a potent combination that precipitated a major shift in the way Americans experienced the world visually TV by Design uncovers this captivating story of how modernism and network television converged and intertwined in their mutual ascent during the decades of the cold war Whereas most histories of television focus on the way older forms of entertainment were recycled for the new medium Lynn Spigel shows how TV was instrumental in introducing the public to the latest trends in art and design Abstract expressionism pop art art cinema modern architecture and cutting edge graphic design were all mined for staging techniques scenic designs and an ever growing number of commercials As a result TV helped fuel the public craze

Matthews Jr.,2019-05-01 America was certainly the big winner of World War II being the last major country intact Euphoria hubris and a naive self confidence became hallmarks of the people This hubris was dented a bit in the 1950s when scandals erupted around the TV quiz shows that made everyoe feel so smart and the U 2 spy incident of 1960 that revealed Americans were being lied to by the government The book argues that these two events began the credibility gap that engulfed the nation later in the 1960s and continues to haunt us to this day When the War ended the United States still had its economy infrastructure and industry intact Taking up where the British Empire left off the powerful new America expanded its influence around the globe Suddenly light years ahead of any competitor Americans abandoned themselves to a haze of consumerism and entertainment trusting that they were safe and could not be harmed The contestants on the big money quiz shows turned out to be fakes and the respected TV executives were also revealed to be liars and cheats Far worse was yet to come The United States government was caught in a lie regarding the CIA s U 2 reconnaissance planes overflying the Soviet Union On the eve of a crucial summit meeting in 1960 the USSR knocked Gary Powers out of the sky along with plenty of incriminating hardware and data Moscow delayed revealing what it knew and Washington spent ten days denying it was a spy plane then denying that President Eisenhower was aware of it The world was turning into a very scary place and soon American schoolchildren were being taught to duck under their desks if a bomb should strike Fear began to percolate into the heart of the nation *Health Insurance Today* Janet I.
