modern reading primers to the literature of the American Renaissance Offering a poetics of alphabetization and explicating the alphabet's tropes and rhetorical strategies the author demonstrates the far reaching cultural power of such apparently neutral statements as A is for apple The new market for children's books in the eighteenth century established for the republic of ABC a cultural potency equivalent to its high culture counterpart the republic of letters while shaping its child readers into consumers As a central rite of socialization alphabetization schooled children to conflicting expectations as well as to changing models of authority understandings of the world and uses of literature In the nineteenth century literacy became a crucial aspect of American middle class personality and subjectivity Furnishing the readers and writers needed for a national literature the alphabetization of America between 1800 and 1850 informed the sentimental reform novel as well as the self consciously aesthetic novel of the 1850s Through readings of conduct manuals reading primers and a sentimental bestseller the author shows how the alphabet became embedded in a maternal narrative which organized the world through domestic affections Nathaniel Hawthorne by contrast insisted on the artificiality of the alphabet and its practices in his antimimetic hermetic *The Scarlet Letter* with its insistent focus on the letter A By understanding this novel as part of the network of alphabetization *The Story of A* accounts for its uniquely persistent cultural role The author concludes in an epilogue with a reading of postmodern alphabets and their implications for the future of literacy

Israel and the Daughters of the Shoah Ronit Lențin,2000 The murder of a third of Europe s Jews by the Nazis is unquestionably the worst catastrophe in the history of contemporary Judaism and a formative event in the history of Zionism and the State of Israel Understandably therefore the Shoah written about analyzed and given various political interpretations has shaped public discourse in the history of the State of Israel The key element of Shoah in the Israeli context is victimhood and as such it has become a source of shame shrouded in silence and subordinated to the dominant discourse which resulting from the construction of a new Hebrew active subjectivity taught the postwar generation of Israelis to reject diaspora Jewry and its alleged passivity in the face of catastrophe This book is the culmination of years of preoccupation with the meaning of the Shoah for the author an Israeli woman with a split subjectivity that of a daughter of a family of Shoah survivors and that of a daughter of the first Israeli born generation the culmination of her need to break the silence about the Shoah in a society which constructed itself as the Israeli antithesis to diaspora Jewry and to excavate a truth from underneath the mountain of Zionist nation building myths

These myths the author argues not only had deep implication for the formation of her generation but also a profound impact on the Israeli Palestinian conflict Moreover they are shot through with images of the masculine Israeli contrasted with those of the weak passive non virile Jewish Other of the diaspora This book offers the first gendered analysis of Israeli society and the Shoah The author employs personal narratives of nine Israeli daughters of Shoah survivors writers and film makers and a feminist re reading of official and unofficial Israeli and Zionist discourses to explore the ways in which the relationship between Israel and the Shoah has been gendered in that the Shoah was feminized while Israel was masculinized This new perspective has considerable implications for the analysis of Israeli society a gendered analysis of Israeli construction of nation reveals how the Shoah and Shoah discourse are exploited to justify Israel's i e the new Hebrew's self perceived right of occupation Israel thus not only negated the Jewish diaspora but also stigmatized and feminized Shoah victims and survivors all the while employing Shoah discourses as an excuse for occupation both in the past and in the present

Humanism in Surgery Jonathan McFarland, Susana Magalhaes, Jacek Mostwin, René Genadry, 2025-08-12 Medical Humanities and Narrative Medicine have been increasingly relevant in view of the challenges that new health technologies and the digital world pose to truly person centered healthcare By Narrative Medicine we understand the practice of healthcare with narrative skills that allow professionals to recognize the suffering of others and of themselves be able to interpret verbal and non verbal narratives of illness and be motivated to act in a way that respects the Person of the Patient and of the Professional Surgery like other medical specialties requires space for reflection and debate on the meaning of humanism and its impact on the quality of care This requirement is more pressing in this area because it has escaped inquiry by Medical Humanities and Narrative Medicine We believe that this is due to the nature of the surgical activity carried out in an enclosed place characterized by the use of sophisticated technologies including robotics and artificial intelligence and inaccessible to patients relatives In addition the patients own expectations about surgery reinforce the technological and highly specialized nature of this area often marked by the neglect of the relational context with clear prejudice to the parties involved and the activity itself Although this gap has been identified there has been no space for reflection on the humanization of care in surgery This book is therefore innovative precisely because it responds to the previously mentioned shortcomings offering its readers the opportunity to reflect on Humanism in Surgery
