This new collection provides a much needed retrospective view of the key academic work published in this area. The papers here highlight the importance of studying entrepreneurship from a wide range of perspectives including research that derives from economics, history, sociology, psychology, and from different business disciplinary bases such as marketing, finance, and strategy. The overall focus in this set is on entrepreneurial activity rather than specifically small or family owned business, and favours research articles over those that deal purely with practice.

Contemporary Microenterprise Joseph Mark S. Munoz,2010-01-01. While there have been numerous books and articles written on the popular topic of microfinance, few books have been written on the business model behind it, the microenterprise. Due to its diversity of thought and high quality of chapter contributions, this book is poised to be the book on microenterprises. Contemporary Microenterprise is a collage of the latest research and viewpoints on the subject by recognized academics and experts from around the globe. Through the confluence of diverse and profound voices from around the world, very small micro businesses have proven to be the most prevalent and fastest growing business form and a suitable model for enterprise survival and success in a challenging global economy. Joseph Mark Munoz has brought together an international cast of contributors and draws insights from concepts and cases from locations such as Vietnam, the United States, Latin America, and Africa. The chapters include conceptual frameworks and research that yield valuable lessons and practical business solutions. The broad scope of this compendium, coupled with its careful attention to detail, will be of critical value to business students and their professors, industry executives, government officials, policymakers, consultants, and entrepreneurs.

management discourse With its focus on power imbalances struggles for emancipation from oppression and distrust of capitalism CMS provides the peripheral point of view with a voice CMS presents a space where scholars can engage with South African realities surrounding political cultural social and historical contexts and issues in management This book is promoting CMS to the scholarly community to show that there are exciting possibilities being offered by a different approach to management scholarship This book also forms part of a larger project of growing CMS in South Africa and is a collection of original works by academics actively working in CMS following various methodological approaches which can be categorised into two broad methodological categories namely conceptual work and empirical work following an Interpretive approach
