Microfinance and Self Help Groups A Alimelu Annapurna, This book provides a vivid picture of Micro Finance for women empowerment through bank linkage of women groups in Andhra Pradesh with special focus on East Godavari District The book presents the observations made by the author on the outcomes of specific endeavors of District rural development agency DRDA East Godavari District for the economic political and social empowerment of women and also the involvement of banking sector in the district to achieve the holistic objective of inclusive growth and alleviation of poverty

From Microfinance to Inclusive Finance R. H. Schmidt, H. D. Seibel, P. Thomes, 2016-09-19 Once praised as a panacea to overcome poverty microfinance has had to face harsh criticism because of painful failures and unfulfilled expectations Still many people in particular in rural regions do not have any access to formal financial services many microfinance institutions are weak and others rather exploit their clients driving them into over indebtedness than helping them out of poverty What should microfinance achieve Can it help to build up inclusive financial systems allowing access to basic financial services for everybody The historic templates for this book are the German Sparkassen and Cooperative banks that have a strong track record of development and growth spanning over 200 years For obvious reasons their results cannot be transferred directly into specific solution options to today s challenges in developing countries Nevertheless the coming into existence of Sparkassen and Cooperative banks can well be seen as part of a period of revolutionary developments in the European economic and social landscape which can be viewed as analogous to the transformation that emerging economies are undergoing today While Europe faced dramatically changing living conditions during the period of industrialization these newly created banks made change possible by unequivocally including the lower class population in the transformation by providing access to savings and loans And it is this is parallel even in the face of the many differences which is why their development and success deserves careful consideration today The authors approach differs from other explorations by specifically adopting an interdisciplinary strategy They take into account past developments as well as current global ones from a historical social science and economic point of view Analysis and the interpretation of data is supported by case studies to illustrate their considerations The authors identify general parameters both for failure

and for success and also indicate how to optimize existing potentials both for institutions and policy makers As a result of this interdisciplinary work the authors advance an inclusive stylised facts based model The will to build up institutions to adhere to corporate social responsibility and creating conducive legal frameworks form the basic conditions for success More specifically the guiding principles of these successful business models are a fair savings and credit policy the promotion of capital transfers without reference to class and gender a focus on business activities in a well defined region decentralized organizational structures combined with national networks which avoid regional capital drains and the securing of economies of scale and scope Last but not least is the centrality of objectives beyond that of the sheer maximisation of profits We Are Not Able to Live in the Sky Mara Kardas-Nelson,2024-06-11 Shortlisted for the J Anthony Lukas Prize A deeply reported work of journalism that explores the promises and perils of microfinance told through the eyes of international lenders and women borrowers in West Africa In the mid 1970s Muhammad Yunus an American trained Bangladeshi economist met a poor female stool maker who needed money to expand her business In an act widely known as the beginning of microfinance Yunus lent 27 to forty two women hoping small credit would help the women pull themselves out of poverty Soon Yunus s Grameen Bank was born and the idea of giving very small high interest loans to poor people took off In 2006 Yunus and the Grameen Bank won the Nobel Peace Prize for efforts to create economic and social development from below But there s a problem with this story There are mounting concerns that these small loans are as likely to bury poor people in debt as they are to pull them from poverty with borrowers from India to Kenya facing consequences such as jail time and forced land sales Reportedly hundreds have even committed suicide What happened Did microfinance take a wrong turn or was it flawed from the beginning Mara Kardas Nelson s We Are Not Able to Live in the Sky is about unintended consequences blind optimism and the decades long ramifications of seemingly small policy choices The book is rooted in the stories of women borrowers in Sierra Leone West Africa Their narratives woven through a deep history of modern international development are set against the rise of Yunus s vision that tiny loans would put poverty in museums Kardas Nelson asks What is missed with a single financially focused solution to global inequity that ignores the real drivers of poverty Who stands to benefit and more important who gets left behind **WOMEN EMPOWERMENT THROUGH SHG-BANK LINKAGE PROGRAMMES** - Dr. Mahesh Agasara,2019-06-28 Any sustainable development has equity as its base To ensure this women focused development is a pre requisite Though women constitute predominant segment of the population they have been socially and economically marginalized since long time Any strategy of development should be inclusive by bringing this segment of population into central stage of growth and development Empowering these disadvantaged groups has received the attention of development policy makers and strategists all over the world This chapter is an attempt to present key concepts related to women empowerment and micro finance initiatives at various levels to translate these policies into action program key players in the program stakeholders pros and cons of empowering women by provision of microfinance through SHG Community

Economies in the Global South Caroline Shenaz Hossein, P. J. Christabell, 2022 This book examines rotating savings and credit associations especially those organized by women of colour The chapters provide studies on the organization and use of these associations in Latin America the Caribbean Africa and Asia

Rural Investment Climate in Indonesia Neil McCulloch, 2009 This book provides a comprehensive analysis of the constraints facing the development of rural non farm enterprises in Indonesia Recent years have seen a substantial effort by the Indonesian government to improve the investment climate To date much of this effort has focused on the constraints faced by businesses at the national level However if Indonesia is to be successful in creating jobs and reducing poverty across the archipelago this will require improving the investment climate for the 15 7 million micro and small enterprises that employ more than half of all the non farm workers in the country This book brings together leading Indonesian and international academics to consider seven key constraints that RNFEs face labour regulations and practices infrastructure competition and marketing knowledge transfer and technology access to credit and financial services local taxation and user charges and insecurity In each case the authors draw on the Indonesian Rural Investment Climate Survey a unique dataset of more than 2 500 RNFEs to identify the size and nature of the constraints the way in which they impact upon enterprise growth and the implications for policy In addition a key chapter estimates the strength of the linkage between agriculture and non agricultural activities in rural areas showing that agricultural revitalization is an essential complement to the development of the non farm economy Understanding the rural investment climate in both slow and fast growing economies has taken on new urgency in the wake of the world food crisis The rural non farm economy often provides half or more of the income of farm families and is especially important for food deficit rural households hard hit by rising food prices The Indonesian Rural Investment Climate Assessment is the gold standard for how to achieve this understanding It is a delight to see it published and available to a wide audience C Peter Timmer Visiting Professor Program on Food Security and Environment Stanford University Non Resident Fellow Center for Global Development

Restructuring of State-Owned Financial Institutions Hans Dieter Seibel, Mayumi Ozaki, 2009-09-01 Despite the trend toward financial sector liberalization in recent years state ownership of financial institutions remains widespread in the developing world However in general state owned financial institutions have under performed their private sector counterparts and governments have sought to restructure them This case study reviews the transformation of Bank Rakyat Indonesia from a loss producing overstuffed state owned bank to the most profitable bank with the largest microbanking network in Indonesia From the bank s experience the study

seeks to draw decisive lessons for the successful transformation of other state owned financial institutions For Bank Rakyat Indonesia the key driver of successful reform was the government s commitment to allow it the autonomy to restructure itself including an emphasis on good corporate governance supported by appropriate regulations and effective supervision
