**High Performance Fencing** Ed Rogers, 2015-07-31 Legendary fencing instructor Maitre Bac H Tau described what he called the six essentials that are in a fencer's mind. The first is called spirit, the second rhythm, the third thought, the fourth technique, the fifth tactic, and the last is strategy. As a fencer, you can fight with spirit, experience rhythm, think your way around problems, and develop technique, tactic, and strategy by training with top flight fencing masters. But there is more. Modern fencing is a highly competitive speed and endurance sport, and the seventh essential in a high performance fencer's mind is how to prepare themselves physically and mentally to fence. In *High Performance Fencing: The Seventh Essential*, Ed Rogers covers every aspect of the preparation required by a fencer competing at the highest level. The book provides sound practical advice and is based on tried and tested training principles that have repeatedly proved successful. Aimed at intermediate to advanced level fencers, coaches, teachers, and all those involved in competition fencing, and fully illustrated with 148 colour images and diagrams. *The Science of the Skeleton and Muscles* Louise Spilsbury, Richard

Spilsbury, 2017-07-15 Skeletons are more than classic Halloween décor; they're intricate structures inside every human being. In this innovative book, readers will learn how bones and muscles work together to support the human body and enable its many movements. Fun graphics and easy-to-comprehend language makes this important topic accessible to all readers. Concise flowcharts emphasize key concepts at the end of each chapter, helping readers visualize and retain essential science curriculum material. Even readers who are reluctant to engage with science will enjoy this unique, visually based approach to learning. Any library will have a home for this reader-friendly look at the human skeleton and muscles. **Artificial Muscles**
