Colossus Sanjoy Chakravorty,Neelanjana Sircar,2022-02-03 Colossus unpacks the intricacies and inequalities of economic social and political life in India s capital Delhi **Energy Follies** Robert R. Nordhaus,Sam Kalen,2018-09-20 Conversations about energy law and policy are paramount undergoing new scrutiny and characterizations Energy Follies Missteps Fiascos and Successes of America s Energy Policy explores how a century of energy policies rather than solving our energy problems often made them worse how Congress and other federal agencies grappled with remedying seemingly myopic past decisions Sam Kalen and Robert R Nordhaus investigate how misguided or na ve energy policy decisions caused or contributed to past energy crises and how it took years to unwind their effects This work recounts the decades long struggles to move to market supply and pricing policies for oil and natural gas in order to make competition work in the electric power industry and to tame emissions from the coal fleet left to us by the 1970s coal policies These historic policies continue to present struggles and this book reflects on how future challenges ought to learn from our past mistakes *Soybeans and Power* Pablo Lapegna,2016-09-21 Although Argentina s use of genetically modified GM soybean seeds has spurred a major agricultural boom it has also had a negative impact on many communities In Soybeans and Power Pablo Lapegna explores the ways in which these communities have coped with GM soybean expansion Peasants initially resisted yet ultimately adapted to the new agricultural technologies playing an active role in their own demobilization in order to maneuver the situation to their advantage A rare glimpse into the life cycle of a social movement Soybeans and Power gives voice to the communities most adversely affected by GM technology and the strategies that they have enacted in order to survive **Alan Turing's Manchester** Jonathan Swinton,2022-05-26 Alan Turing is a patron saint of Manchester remembered as the Mancunian who won the war invented the computer and was all but put to death for being gay Each myth is related to a historical story This is not a book about the first of those stories of Turing at Bletchley Park But it is about the second two which each unfolded here in Manchester of Turing s involvement in the world s first computer and of his refusal to be cowed about his sexuality Manchester can be proud of Turing but can we be proud of the city he encountered *The Story of N* Hugh S. Gorman,2013-01-24 In The Story of N Hugh S Gorman analyzes the notion of sustainability from a fresh perspective the

integration of human activities with the biogeochemical cycling of nitrogen and provides a supportive alternative to studying sustainability through the lens of climate change and the cycling of carbon. It is the first book to examine the social processes by which industrial societies learned to bypass a fundamental ecological limit and later began addressing the resulting concerns by establishing limits of their own. The book is organized into three parts: Part I, *The Knowledge of Nature*, explores the emergence of the nitrogen cycle before humans arrived on the scene and the changes that occurred as stationary agricultural societies took root; Part II, *Learning to Bypass an Ecological Limit*, examines the role of science and market capitalism in accelerating the pace of innovation, eventually allowing humans to bypass the activity of nitrogen-fixing bacteria; Part III, *Learning to Establish Human Defined Limits*, covers the twentieth-century response to the nitrogen-related concerns that emerged as more nitrogenous compounds flowed into the environment. A concluding chapter, *The Challenge of Sustainability*, places the entire story in the context of constructing an ecological economy in which innovations that contribute to sustainable practices are rewarded.

Rain Cynthia Barnett, 2015-04-21 Rain is elemental, mysterious, precious, destructive. It is the subject of countless poems and paintings, the top of the weather report, the source of the world's water. Yet this is the first book to tell the story of rain. Cynthia Barnett's *Rain* begins four billion years ago with the torrents that filled the oceans and builds to the storms of climate change. It weaves together science, the true shape of a raindrop, the mysteries of frog and fish rains with the human story of our ambition to control rain, from ancient rain dances to the 2,203 miles of levees that attempt to straitjacket the Mississippi River. It offers a glimpse of our founding forecaster, Thomas Jefferson, who measured every drizzle long before modern meteorology. Two centuries later, rainy skies would help inspire Morrissey's mopes and Kurt Cobain's grunge. *Rain* is also a travelogue, taking readers to Scotland to tell the surprising story of the mackintosh raincoat and to India where villagers extract the scent of rain from the monsoon-drenched earth and turn it into perfume. Now, after thousands of years spent praying for rain or worshiping it, burning witches at the stake to stop rain or sacrificing small children to bring it, mocking rain with irrigated agriculture and cities built in floodplains, even trying to blast rain out of the sky with mortars meant for war, humanity has finally managed to change the rain. Only not in ways we intended. As climate change upends rainfall patterns and unleashes increasingly severe storms and drought, Barnett shows rain to be a unifying force in a fractured world. Too much and not nearly enough rain is a conversation we share, and this is a book for everyone who has ever experienced it.

Coal in Modern Britain Charles-François Mathis, 2025-08-21 This is the first book to examine the social and cultural significance of coal in British society in the 19th and 20th centuries. An English language translation of Charles-François Mathis's award-winning study, *Coal in Modern Britain*, gets to the heart of Britain's evolving relationship with this controversial energy source. How did the general public use and manage coal on a daily basis? Did they readily accept it, did they reject it, and how? What were the material and cultural features of a society so reliant on coal? Historians have long considered the political, technical, and economic structures of energy systems, but here the vital

social and cultural contexts are crucially laid bare The book demonstrates how coal shaped the living environment and the ways of thinking of British people from the early 19th century through to the coal minded society of the 1940s that had become entirely focussed on this fuel as an energy source Mathis emphasises the perspectives of ordinary consumers and looks at the energy cultures that emerged in everyday life in Britain during the period He looks at how coal impacted the land cities and homes of modern Britain along with the developing habits and routines surrounding coal use within the domestic setting Coal in Modern Britain also reveals how coal was taught to children both at school and at home and how it was vehemently defended against its rivals of oil electricity and gas during this peak time of fuel pre eminence

Contentious Geographies Maxwell T. Boykoff,2016-05-13 The human environment relationship intimately intertwined and often contentious is one of the most pressing concerns of the 21st century Explored through an array of critical approaches this book brings together case studies from across the globe to present significant cutting edge research into political ecologies as they relate to multi form contestations over environments resources and livelihoods Covering a range of

issues such as popular discourses of environmental collapse climate change water resource struggles displacement agro food landscapes and mapping technologies this edited volume works to provide a broad and critical understanding of the narratives and policies more subtly shaping and being shaped by underlying environmental conflicts By exploring the power laden processes by which environmental knowledge is generated framed communicated and interpreted Contentious Geographies works to reveal how environmental conflicts can be re considered and thus re opened to enhance efforts to negotiate more sustainable environments and livelihoods

Coal Cultures Derrick Price, 2020-08-19 Coal is the commodity that powered the technologies that made the modern world It also brought about unique communities marked by a high degree of social solidarity and self help Mining was central to working class life drawing rural populations into industrial labour but it often took place in picturesque landscapes so that its black spoil heaps became a central symbol of the degradation of pastoral life by the demands of an extractive industry Throughout Europe and the USA photographers have pictured the characteristic landscapes of the industry and continue to do so as strip mining devastates huge areas of land Not only landscape photography but also documentary portraiture photojournalism and art photography have been used in order to portray mines and miners This book presents three interlinked strands of investigation The first is the way in which the production of coal created paradigmatic communities grounded in particular landscapes The second concerns the role of photography in exploring delineating and critiquing mining communities This in turn involves an examination of the aesthetic and social characteristics of a number of genres of photography Lastly it considers the growth and decline of these sites the geographic shift of the industry to other places and the re presentation of traditional localities through the lens of the heritage industry and industrial tourism

Death and Survival in Urban Britain Bill Luckin, 2015-05-19 The narratives of disease hygiene developments in medicine and the growth of urban environments are fundamental to the discipline of modern history Here the eminent urban historian Bill Luckin re introduces a body of work which published together for the first time along with new material and contextualizing notes marks the beginning of this important strand of historiography Luckin charts the spread of cholera fever and the everyday but frequently deadly infections that afflicted the inhabitants of London and its new manufacturing districts between the 1830s and the end of the nineteenth century A second part Pollution and the Ills of Urban Industrialism concentrates on the water and smoke problems and the ways in which they came to be perceived defined and finally brought under a degree of control *Death and Survival in Urban Britain* explores the layered and interacting narratives within the framework of the urban revolution that transformed British society between 1800 and 1950

A World History of Mobility Gijs Mom, 2025-08-01 As a tool of globalized mobility the car provides a useful barometer for charting the global development of socio cultural economic technical and political modernization Shaped by prevailing gender and racial norms and popularized by a Western driven car culture it is a commodity whose access and use embodies wider inequalities In this comprehensive world history of auto mobility Gijs Mom draws upon his extensive research into the

field to assess the past and present of road cultures and hypothesize their future Ranging from the impact of climate change to decolonization this volume spotlights how profoundly automobilism impacts our sense of identity and imagination

The Invisible Killer Gary Fuller,2019-03-19 An urgent examination of one of the biggest global crises facing us today the drastic worsening of air pollution and what we can do about it The air pollution that we breathe every day is largely invisible but it is killing us How did it get this bad and how can we stop it Far from a modern day problem scientists were aware of the impact of air pollution as far back as the seventeenth century Now as more of us live in cities we are closer than ever to pollution sources and the detrimental impact on the environment and our health has reached crisis point The Invisible Killer will introduce you to the incredible individuals whose groundbreaking research paved the way to today s understanding of air pollution often at their own detriment Gary Fuller s global story examines devastating incidents from London s Great Smog to Norway s acid rain Los Angeles traffic problem to wood burning damage in New Zealand Fuller argues that the only way to alter the future course of our planet and improve collective global health is for city and national governments to stop ignoring evidence and take action persuading the public and making polluters bear the full cost of the harm that they do The decisions that we make today will impact on our health for decades to come The Invisible Killer is an essential book for our times and a cautionary tale we need to take heed of

State, Science and the Skies Mark Whitehead,2011-06-24 Utilizing environmental archival materials from the UK State Science and the Skies presents a groundbreaking historical account of the development of a state science of atmospheric pollution Offers the most extensive historical and geographical account of atmospheric government and pollution in Britain available today Presents archival material from 150 years of British history that represents an original contribution to our knowledge of the history of science and government Develops an innovative combination of Foucauldian history of government with a history of atmospheric science Raises crucial questions about the nature of state science relations and the conditions under which environmental knowledge is produced

Political Fallout Toshihiro Higuchi,2020-05-05 Political Fallout is the story of one of the first human driven truly global environmental crises radioactive fallout from nuclear weapons testing during the Cold War and the international response Beginning in 1945 the United States Britain and the Soviet Union detonated hundreds of nuclear weapons in the atmosphere scattering a massive amount of radioactivity across the globe The scale of contamination was so vast and radioactive decay so slow that the cumulative effect on humans and the environment is still difficult to fully comprehend The international debate over nuclear fallout turned global radioactive contamination into an environmental issue eventually leading the nuclear superpowers to sign the landmark Partial Test Ban Treaty PTBT in 1963 Bringing together environmental history and Cold War history Toshihiro Higuchi argues that the PTBT originally proposed as an arms control measure transformed into a dual purpose initiative to check the nuclear arms race and radioactive pollution simultaneously Higuchi draws on sources in English Russian and Japanese considering both the epistemic differences that emerged in different scientific communities in the

1950s and the way that public consciousness around the risks of radioactive fallout influenced policy in turn Political Fallout addresses the implications of science and policymaking in the Anthropocene an era in which humans are confronting environmental changes of their own making **Flammable** Javier Auyero, Debora Alejandra Swistun, 2009-04-10

Surrounded by one of the largest petrochemical compounds in Argentina a highly polluted river that brings the toxic waste of tanneries and other industries a hazardous and largely unsupervised waste incinerator and an unmonitored landfill Flammable's soil air and water are contaminated with lead chromium benzene and other chemicals So are its nearly five thousand sickened and frail inhabitants How do poor people make sense of and cope with toxic pollution Why do they fail to understand what is objectively a clear and present danger How are perceptions and misperceptions shared within a community Based on archival research and two and a half years of collaborative ethnographic fieldwork in Flammable this book examines the lived experiences of environmental suffering Despite clear evidence to the contrary residents allow themselves to doubt or even deny the hard facts of industrial pollution This happens the authors argue through a labor of confusion enabled by state officials who frequently raise the issue of relocation and just as frequently suspend it by the companies who fund local health care but assert that the area is unfit for human residence by doctors who say the illnesses are no different from anywhere else but tell mothers they must leave the neighborhood if their families are to be cured by journalists who randomly appear and focus on the most extreme aspects of life there and by lawyers who encourage residents to hold out for a settlement These contradictory actions advice and information work together to shape the confused experience of living in danger and ultimately translates into a long ineffective and uncertain waiting time a time dictated by powerful interests and shared by all marginalized groups With luminous and vivid descriptions of everyday life in the neighborhood Auyero and Swistun depict this on going slow motion human and environmental disaster and dissect the manifold ways in which it is experienced by Flammable residents
