Good God but You Smart! Nichole E. Stanford, 2016-10-14 Taking Cajuns as a case study Good God but You Smart explores the subtle ways language bias is used in classrooms within families and in pop culture references to enforce systemic economic inequality It is the first book in composition studies to examine comprehensively and from an insider's perspective the cultural and linguistic assimilation of Cajuns in Louisiana The study investigates the complicated motivations and cultural concessions of upwardly mobile Cajuns who choose to self censor to speak Standardized English over the Cajun

English that carries their cultural identity Drawing on surveys of English teachers in four Louisiana colleges previously unpublished archival data and Pierre Bourdieu's theory of the legitimate language author Nichole Stanford explores how socioeconomic and political pressures rooted in language prejudice make code switching or self censoring in public seem a responsible decision Yet teaching students to skirt others prejudice toward certain dialects only puts off actually dealing with the prejudice Focusing on what goes on outside classrooms Stanford critiques code switching and cautions users of code meshing that pedagogical responses within the educational system are limited by the reproductive function of schools Each theory section includes parallel memoir sections in the Cajun tradition of storytelling to open an experiential window to the study without technical language Through its explication of language legitimacy and its grounding in lived experience *Good God but You Smart* is an essential addition to the pedagogical canon of language minority studies like those of Villanueva Gilyard Smitherman and Rose
