The Cambridge History of Literary Criticism: Volume 9, Twentieth-Century Historical, Philosophical and Psychological Perspectives Christa Knellwolf, Christopher Norris, Jessica Osborn, 1989 This ninth volume in The Cambridge History of Literary Criticism presents a wide ranging survey of developments in literary criticism and theory during the last century Drawing on the combined expertise of a large team of specialist scholars it offers an authoritative account of the various movements of thought that have made the late twentieth century such a richly productive period in the history of criticism The aim has been to cover developments which have had greatest impact on the academic study of literature along with background chapters that place those movements in a broader intellectual national and socio cultural perspective In comparison with Volumes Seven and Eight also devoted to twentieth century developments there is marked emphasis on the rethinking of historical and philosophical approaches which have emerged especially during the past two decades as among the most challenging areas of debate

Art and the Challenge of Markets Volume 1 Victoria D. Alexander, Samuli Hägg, Simo Häyrynen, Erkki Sevänen, 2018-01-16 Art and the Challenge of Markets Volumes 1 2 examine the politics of art and culture in light of the profound changes that have taken place in the world order since the 1980s and 1990s The contributors explore how in these two decades the neoliberal or market based model of capitalism started to spread from the economic realm to other areas of society As a result many aspects of contemporary Western societies increasingly function in the same way as the private enterprise sector under traditional market capitalism The first volume of this two volume collection considers a broad range of national cultural policies from European and North American countries and examines the strengthening of international and transnational art worlds in music visual arts film and television The chapters cover cultural policy and political culture in the United States United Kingdom Germany France Switzerland the Nordic countries the Balkans and Slovenia and address the extent to which Western nations have shifted from welfare state to market based ideologies Tensions between centres

in a world of free thought And what hidden dangers lurk within the very ideals of liberty Unveil the forces shaping America's destiny in this captivating audiobook Caste and nature Mukul Sharma,2017-09-25 Rarely do Indian environmental discourses examine nature through the lens of caste Whereas nature is considered as universal and inherent caste is understood as a constructed historical and social entity Mukul Sharma shows how caste and nature are intimately connected He compares Dalit meanings of environment to ideas and practices of neo Brahmanism and certain mainstreams of environmental thought Showing how Dalit experiences of environment are ridden with metaphors of pollution impurity and dirt the author is able to bring forth new dimensions on both environment and Dalits without valorizing the latter's standpoint Rather than looking for a coherent understanding of their ecology the book explores the diverse and rich intellectual resources of Dalits such as movements songs myths memories and metaphors around nature These reveal their quest to define themselves in caste ridden nature and building a form of environmentalism free from the burdens of caste The Dalits also pose a critical challenge to Indian environmentalism which has until now marginalized such linkages between caste and nature

Chopp,2002-11-22 In a calm sustained style the author breaks new ground in the ongoing feminist theological pilgrimage one that will make traditionalists squirm and liberationists cheer Choice In The Power to Speak Rebecca Chopp offers an exhilarating defense of feminist theology as proclamation and good news for all Arguing for a critique and transformation of language subjectivity and politics this thoughtful engaged book opens new directions in feminist thought Elizabeth Fox Genovese A provocative treatment of feminist theology's deepest potential to transform the discipline through language WATERwheel Rebecca Chopp is developing an original theological position Her interpretation of Christian faith and Christian theology as having to do primarily with emancipatory transformation breaks through the individualistic pietism of modern liberalism as well as the provincialism of many of the liberation theologies Gordon D Kaufman **Unity and the University** ,1886 **Refounding**

State Legitimacy - When experiences and practices speak - Volume 1 Šverine Bellina,2017-03-24 The state is no longer the sole player in public action it is now obliged to interact with civil society the private sector and populations This transition from government a state monopoly to public governance public action with a plurality of actors implies a certain repositioning It is in the new relationship between the state and societies that the exercise of political power is called upon to find coherence and to restructure the legitimacy of the state This diagnosis was the starting point for the reflections contained in this work From the standpoint of legitimacy the authors of this book have studied a series of experiences and practices both in various countries around the world and within different international organisations They offer a series of

descriptive contributions designed to facilitate comprehension and analysis of the processes seeking to legitimise political power according to a variety of contexts and the diversity of conceptions of power *Social Science Quotations* Robert Merton, 2018-04-27 Social Science Quotations has been prepared to meet an evident unmet need in the literature of the social sciences Writings on the lives and theories of individual social scientists abound but there has been no fully documented collection of memorable quotations from the social sciences as a whole The frequent use of quotations in scientific as well as literary writings that are mere summaries or paraphrases typically fail to capture the full force of formulations that have made quotations memorable This book of quotations invites the further reading or rereading of the original texts beyond the quotations themselves Sills and Merton draw extensively upon the writings that constitute the historical core of the social sciences and social thought those works with staying power often described as the classical texts Many quotations have been drawn from these classical texts because the quotations contain memorable ideas memorably expressed Both consequential and memorable these words have been quoted over the generations entering into the collective memory of social scientists everywhere and at times diffusing into popular thought and into the vernacular as well This book is useful to social scientists anthropologists economists historians political scientists psychiatrists psychologists sociologists and statisticians and for all who want to learn or verify memorable formulations and phrases concerning social thought and social theories It is particularly useful for graduate students taking courses that examine the history of their discipline
