Special Care Medical Decisions At The Beginning Of Life:

Special Care Fred M. Frohock, 1986 *Special Care* explores the moral and legal issues in neonatal intensive care. It is an urgently needed entry in the current discussions of treatment for badly damaged babies. **Uncertainty in Medical**

Innovation Jessica Mesman, 2008-10-14 The Neonatal Intensive Care Unit is a site where hi tech medicine and vulnerable human beings come into close contact. Focusing on a number of medical and ethical challenges encountered by staff and parents, this book provides a new perspective on the complexity of these treatments and the inventiveness of those involved.

The Black Stork Martin S. Pernick, 1996-04-18 In the late 1910s Dr Harry J Haiselden, a prominent Chicago surgeon, electrified the nation by allowing the deaths of at least six infants he diagnosed as defectives. He displayed the dying infants to journalists who wrote about them for the Hearst newspapers and starred in a feature film about his crusade. Prominent Americans from Clarence Darrow to Helen Keller rallied to his support. Martin Pernick tells this captivating story, uncovering forgotten sources and long lost motion pictures in order to show how efforts to improve human heredity (eugenics) became linked with mercy killing as well as with race, class, gender, and ethnicity. It documents the impact of cultural values on science along with the way scientific claims of objectivity shape modern culture. While focused on early 20th century America, *The Black Stork* traces these issues from antiquity to the rise of Nazism and to the Baby Doe assisted suicide and human genome initiative debates of today. **Current Catalog** National Library of Medicine (U.S.), First multi year cumulation covers six years 1965-70.

Pragmatic Judgments in Direct Patient Care Bernhard Bleyer, 2023-02-15 Why does a hospital need an ethics consultation? And what about this counselling: is it ethical? The book explains the background of the development of clinical ethics counselling. It provides new insights into serious decision making conflicts in everyday clinical life and uncovers the disputes that followed in public. In the search for the ethical understanding of clinical ethics counselling, the book comes across previously unexplored evidence. Step by step, a system is reconstructed that reveals the shape of a significant philosophical school of thought. **National Library of Medicine Current Catalog** National Library of Medicine (U.S.),

Empty Cradle, Broken Heart Deborah L. Davis, 1996 Reassurance for parents who struggle with anger, guilt, and despair after a miscarriage, stillbirth, or infant death. **Birth to Death** David C. Thomasma, Thomasine Kimbrough

Kushner, 1996-07-13 Biology has been advancing with explosive pace over the last few years and in so doing has raised a host of ethical issues. This book, aimed at the general reader, reviews the major advances of recent years in biology and medicine and explores their ethical implications. From birth to death, the reader is taken on a tour of human biology covering genetics, reproduction, development, transplantation, aging, dying, and also the use of animals in research and the impact of human populations on this planet. In each chapter, there is a sketch of a field's most recent scientific advances combined with discussions of the ethical and moral principles and implications for social frameworks and public policy raised by those advances. Anybody interested or concerned about the ethical dilemmas caused by advances in science and medicine should

read this book *Social Science Perspectives on Medical Ethics* G. Weisz, 2012-12-06 Medical or bio ethics has in recent years been a growth industry Journals Centers and Associations devoted to the subject proliferate Medical schools seem increasingly to be filling rare positions in the humanities and social sciences with ethicists Hardly a day passes without some media scrutiny of one or another ethical dilemma resulting from our new found ability to transform the natural conditions of life Although bioethics is a self consciously interdisciplinary field it has not attracted the collaboration of many social scientists In fact social scientists who specialize in the study of medicine have in many cases watched its development with a certain ambivalence No one disputes the significance and often the painfulness of the issues and choices being addressed But there is something about the way these issues are usually handled which seems somehow inappropriate if not wrong headed to one trained in a discipline like sociology or history In their analyses of complex situations ethicists often appear grandly oblivious to the social and cultural context in which these occur and indeed to empirical referents of any sort Nor do they seem very conscious of the cultural specificity of many of the values and procedures they utilize when making ethical judgments The unease felt by many in the social sciences was given articulate expression in a paper by Renee Fox and Judith Swazey which appeared in 1984 Empirical Logic and Public Debate Erik C.W. Krabbe, Renée José Dalitz, Pier A. Smit, 2023-03-13 *Empirical Logic and Public Debate* supplies a large number of previously unpublished papers that together make up a survey of recent developments in the field of empirical logic It contains theoretical contributions some of a more formal and some of an informal nature as well as numerous contemporary and historical case studies The book will therefore be attractive both to those who wish to focus upon the theory and practice of discussion debate arguing and argument as well as to those readers who are primarily interested in applications to a particular field such as ethics political philosophy feminist philosophy or the history of philosophy *Birthrights* Robert Lee, Derek Morgan, 2003-09-02 First published in 2004 Routledge is an imprint of Taylor Francis an informa company Ethics and Public Administration H George Frederickson, John A. Rohr, 2015-03-04 *Ethics and Public Administration* refutes the arguments that administrative ethics cannot be studied in an empirical manner and that empirical analysis can deal only with the trivial issues in administrative ethics Within a theoretical perspective the authors qualify their findings and take care not to over generalise results The findings are relevant to the practice of public administration Specific areas addressed include understanding public corruption ethics as control and ethics as administration and policy **Eliciting Care** Bo Kyeong Seo, 2020-06-23 In 2001 Thailand introduced universal health care reforms that have become some of the most celebrated in the world providing almost its entire population with health protection coverage However this remarkable implementation of health policy is not without its weaknesses Drawing on two years of fieldwork at a district hospital in northern Thailand Bo Kyeong Seo examines how people in marginal and dependent social positions negotiate the process of obtaining care Using the broader concept of elicitation Seo analyzes the social encounters and forces that shape caregivers These dynamics challenge dichotomies of

subjugation and resistance consent and coercion and dependence and autonomy The intimate and moving stories at the core of *Eliciting Care* from patients and providers draw attention to a broader critically important phenomenon at the hospital level Seo's poignant ethnography engages with feminist theory on the ethics of care and in so doing makes a significant contribution to emerging work in the field of health policy and politics

Risky Work Environments Pascal

Béguin, 2017-05-15 *Risky Work Environments* provides new insights into the multiple and dynamic trajectories of both near misses and mistakes in complex work environments based on actual case examples It also studies the interactions between various activity systems or work practices design maintenance incident investigation regulation operation and their consequences for operational performance The role of rules and regulations is explored considering the consequences of deviations and the limitations of enforced compliance Further the book explains how to search for think about and act on information about vulnerability near misses and mistakes in a way that emphasizes accountability in ways that are not punitive but instead responsible innovative and provide opportunities for learning Writing from different disciplines and theoretical perspectives the contributors analyse working in risky environments which include air traffic control offshore mining chemical plants neonatal intensive care units ship piloting and emergency call dispatch centres In each chapter the authors present rich empirical data and their analyses illustrate a variety of ways in which despite imperfect systems safety and resilience is created in human action In the chapters where the focus is on error or mistakes the analysis undertaken reveals the logic of actions undertaken at the time as well as their constraints The contributors are all active researchers within their disciplines and come from Australia Finland France Norway and the Netherlands The book will be of direct interest to safety scientists researchers and scientists as well as human factors practitioners working in complex technological systems

Children and Health Care L.M. Kopelman, J.C. Moskop, 2007-08-26

Before a separate Department of Medical Humanities was formed the editors of this volume were faculty members of the Department of Pediatrics at our medical school Colleagues daily spoke of the moral and social problems of children's health care Our offices were near the examining rooms where children had their bone marrow procedures done Since this is a painful test we often heard them cry The hospital floor where the sickest children stayed was also nearby The physicians nurses and social workers believed that children's health care needs were not being met and that more could and should be done Fewer resources are available for a child than for an adult with a comparable illness they said These experiences prompted us to prepare this volume and to ask whether children do get their fair share of the health care dollar Since the question What kind of health care do we owe to our children is complex responses should be rooted in many disciplines These include philosophy law public policy and of course the health professions Representing all of these disciplines contributors to this volume reflect on moral and social issues in children's health care The last hundred years have brought great changes in health care for children The specialty of pediatrics developed during this period and with it a new group of advocates for children's health care Women's suffrage

gave a political boost to the recognition of children's special health needs

For the Sake of the Children Carol A. Heimer, Lisa R. Staffen, 1998-07-20 *For the Sake of the Children* examines the social organization of responsibility by asking who takes responsibility for critically ill newborns. Drawing on medical records and interviews with parents and medical staff, the authors take us into two neonatal intensive care units showing us the traumas of extreme medical measures and the sufferings of infants. The accounts are by turns heroic and disturbing as we see people trying to take charge of these infants, care thinking about long term plans, redefining their roles as adults and parents, and coping with sometimes awful contingencies. Rather than treating responsibility as an ethical issue, the authors focus on how responsibility is socially produced and sustained. The authors ask: How do staff members encourage parents to take responsibility but keep them from interfering in medical matters? and how do parents encourage staff vigilance when they are novices attempting to supervise the experts? The authors conclude that it is not sufficient simply to be responsible individuals. Instead, we must learn how to be responsible in an organizational world and organizations must learn how to support responsible individuals.

Future Survey Annual, 1986

Pregnancy, Risk and Biopolitics Lorna Weir, 2006-09-27 Traditionally Euroamerican cultures have considered that human status was conferred at the conclusion to childbirth. However, in contemporary Euroamerican biomedicine, law, and politics, the living subject is often claimed to pre-exist birth. In this fascinating book, Lorna Weir argues that the displacement of birth as the threshold of the living subject began in the 1950s with the novel concept of perinatal mortality, referring to death of either the foetus or the newborn just prior to, during, or after birth. Weir's book gives a new feminist approach to pregnancy in advanced modernity, focusing on the governance of population. She traces the introduction of the perinatal threshold into child welfare and tort law through expert testimony on foetal risk, sketching the clash at law between the birth and perinatal thresholds of the living subject. Her book makes original empirical and theoretical contributions to the history of the present, Foucauldian research, feminism, and social studies of risk, and she conceptualizes a new historical focus for the history of the present: the threshold of the living subject. Calling attention to the significance of population politics, especially the reduction of infant mortality for the unsettling of the birth threshold, this book argues that risk techniques are heterogeneous, contested with expertise, and plural in their political effects. Interview research with midwives shows their critical relation to using risk assessment in clinical practice. An original and accessible study, this book will be of great interest to students and researchers across many disciplines.

Deciding Who Lives Renee R. Anspach, 1993 In a probing look at the reality of everyday choices in neonatal intensive care units, sociologist Renee Anspach explores the life and death dilemmas that have fueled much national debate. Anspach considers the roles of parents, doctors, nurses, and bioethicists in deciding the fate of terminally ill or malformed newborns.

Crossroads to Eden Fred M. Frohock, 2018-03-19 Paul Lorca, an American professor of cultural anthropology, is living in London during a sabbatical. One evening while walking through crowded Leicester Square, he and his thirteen-year-old daughter Sandra lose each other. After
