Special Places:

Special Places Betty Roots, Donald Chant, Conrad Heidenreich, 2011-11-01 High Park Scarborough Bluffs the Humber Valley the Port Lands These are among the special places of Toronto Each is a unique ecosystem within the busy urban region Even though Torontonians think of the city as almost entirely built up savannah or wetlands are only a subway ride away Special Places explores the changing ecosystems of the Toronto area over this century looking at the environmental conditions that influence the whole region and at the surprising range of plants and animals you can still find in many of its natural spaces Special Places explores the changing ecosystems of the Toronto area over this century looking at the environmental conditions that influence the whole region and at the surprising range of plants and animals you can still find in many of its natural spaces In Special Places a group of science professionals show how actions in one location produce ripples in every direction Changes in forest cover for example affect not only the organisms that live in the forest but also those that use it from time to time such as migrating birds and those that live in watersheds fed by water husbanded by forest cover Changes in bird populations cause changes in the populations of insects on which they feed changes in insect populations affect the plants on which they feed and so on As a new millennium arrives it is time to take stock of our effect on the world around us and to consider the consequences Special Places assesses how we can minimize the impact of human activity on the environment and even remedy some of the harm we have already done One way is to bridge the gap between scientists and decision makers by making the natural sciences more accessible to everyone Special Places was written at the initiative of the Royal Canadian Institute which is the oldest active scientific society in Canada and is dedicated to bringing the natural sciences to the public Richly illustrated and written for a general audience this book celebrates the glory and fragility of these interlocking ecosystems and helps us appreciate the uniqueness of the special places

Returning Home Jerry M. Burger,2011-03-16 Each year millions of American adults visit a childhood home Few can anticipate the effect it will have on them Often serving several important psychological needs these trips are not intended as visits with people from their past Rather those returning to their homes have a strong desire to visit the places that comprised the landscape of their childhood Approximately one third of American adults over the age of thirty have visited a childhood home This book describes some of their experiences and the psychology behind the journeys Most people who visit a childhood home are motivated by a desire to connect with their past Seeing the buildings schools parks and playgrounds from their youth helps to establish the psychological and emotional link between the child in the black and white photographs and the person they are today Many people use the trip to get in touch with the values and principles they were taught as

children often as a means to get their lives back on track Others use that journey to strengthen emotional bonds between themselves and loved ones Still others return to former homes to work through psychological issues left over from sad or traumatic childhoods No matter the reason there are few experiences in one s life that can move a person as deeply and unpredictably as returning home **Science and stewardship to protect and sustain wilderness values** ,2003

Science and Stewardship to Protect and Sustain Wilderness Values Alan E. Watson,Janet Sproull,2003 *Primary Religious Education - A New Approach* Clive Erricker,Judith Lowndes,Elaine Bellchambers,2010-09-13 Primary Religious Education A New Approach models a much needed pedagogical framework encouraging conceptual enquiry and linking theory to its implementation within the wider curriculum in schools Post Enumeration Survey ,1990
