driving each type He argues that ecclesiology must account theologically for the unique nature of the church before considering its activities We must ask what the church is before asking what the church does Professors will find a valuable orienting text students will grasp the stakes of contemporary debates and scholars surveying ecumenical ecclesiology will discover an illuminating structural framework Doing the work of the church requires discerning its essence and this timely volume insightfully examines what is at the heart of the body of Christ

Fundamentals of American Law New York University. School of Law,1996 The American legal system today is the most significant in the world yet until the publication of Fundamentals of American Law there has been no book that provides both the basic rules on the theoretical understanding necessary to comprehend This book is not simply the work of a single author but a collection of especially written essays each by an expert in the field all of whom are on the faculty of New York University School of Law which is recognized as one of the elite law schools in America and which offers this book as an element of its unique Global Law School Programme The book is written specifically for foreign lawyers and law students who have a need to deal with American Law generally but are not seeking to become specialists in any one area For them it is vital to understand the basic principles of a wide range of American legal fields so they can act as informed intermediaries between their public or private clients and their American counterparts The book not only provides the reader with a solid foundation in American law but will also serve as a basic reference book for the fundamentals even as some of the details change over the years Although initially conceived to fill a void for foreign lawyers the book is also ideally suited for others who have a significant need to understand the basic principles of American Law and to interact with American lawyers For this reason it will be an ideal course text for students of business accountancy political science or public administration where the enquiring student will constantly find intersections with the law The book is more than a compendium of legal principles Each chapter explains not only what the law is but why it is that way It sets forth the policy considerations in institutional factors that produce a particular law so the reader can make an independent judgement about its wisdom and perhaps its adaptability to other cultures

Regulating Cyber Technologies: Privacy Vs Security Nathalie Rebe,2023-01-30 Regulating cyber matters is a complex task as cyberspace is an intricate world full of new threats related to a person s identity finance and private information Algorithm manipulation hate crimes cyber laundering and data theft are strong menaces in the cyber world New technologies are generating both privacy and security issues involving anonymity cross border transactions virtual communications and assets among others This book is a collection of works by experts on cyber matters and legal considerations that need addressing in a timely manner It comprises cross disciplinary knowledge that is pooled to this end Risk mitigation tools including cyber risk management data protection regulations as well as ethical practice guidelines are reviewed in detail The regulatory issues associated with new technologies along with emergent challenges in the field of cybersecurity that require improved regulatory frameworks are considered We probe ethical material and enforcement threats thus revealing the inadequacy of

current legal practices To address these shortcomings we propose new regulatory privacy and security guidelines that can be implemented to deal with the new technologies and cyber matters

Promising William Vitek,2010-05-03 William Vitek enlarges our understanding by treating the act of promising as a social practice and complex human experience Citing engaging examples of promises made in everyday life in extraordinary circumstances and in literary works Vitek grapples with the central paradox of promising that human beings can intend a future to which they are largely blind Promising evaluates contemporary approaches to the topic by such philosophers as John Rawls John Searle Henry Sidgwick P S Atiyah and Michael Robbins but transcend their more limited focus on promissory obligation Vitek s innovative approach moves beyond theories of language ethics and law to unveil a complex human activity subject to shifting interpretations and changes in nature
