Evidence-Based Practice in Audiology Lena Wong,Louise Hickson,2012-02-21 Evidence based practice EBP has proponents in all areas of healthcare and was endorsed in a technical report in 2004 and a position statement in 2005 by the American Speech Language Hearing Association Despite this there is no text on EBP with specific application to audiology It is particularly important in audiology where there are various interventions to assist people with hearing impairment and a growing body of research evidence that needs to be appraised by clinicians and researchers This comprehensive book describes the principles of EBP as they apply to the evaluation of audiologic interventions in children and adults The reader will learn the process of EBP as well as gain knowledge on the evidence relating to specific interventions *Evidence Based Practice in Audiology* is

divided into four sections. The first section describes principles of EBP including how to evaluate evidence and how to facilitate evidence based decisions with clients. The remaining three sections provide a discussion of the best available evidence about hearing aids, cochlear implants and other interventions. These three sections contain chapters written by leading international authors who summarize the best available evidence, highlight where further evidence is needed and recommend how further evidence should be collected and applied in the clinic. The book ends with an appendix that contains recommended measures for the collection of evidence about different audiologic interventions.

Evidence Based Practice in Audiology is a highly valued resource for students, researchers, clinical audiologists, other health professionals and policy makers. For students, the book can be used for learning about research methods and about outcomes of interventions for children and adults with hearing impairment. For researchers, the book provides a useful summary of available research on important topics in habilitation and rehabilitation and may assist them to design future research studies. For clinical audiologists, the book can help them understand what evidence is and how this can be applied in clinical practice. Other health professionals who can benefit from this book include ENTs, pediatricians, geriatricians, GPs, nurses and aged care workers. The book can also guide policy makers and third party payers in their decisions about allocation of resources. The text is written with sufficient information for readers with different backgrounds and experience and careful attention has been paid to presenting complex information in an easy to understand format.

Evidence Based Practice in Audiology is edited by two leading academics in research in audiologic interventions. These editors have a rich clinical experience working with children and adults with hearing impairment and with other health professionals.

School-Based Audiology Cynthia McCormick Richburg, Donna Fisher Smiley, 2011-10-28

School Based Audiology takes the reader through the history of audiology in the schools, focusing on legislation that has shaped the face of school based audiology as it is practiced throughout the United States. Core concepts involving academic achievement in students who are deaf/hard of hearing, classroom acoustics, hearing screening programs, hearing loss prevention programs, diagnostic evaluation protocols, hearing aid and FM system verification procedures and classroom amplification are covered throughout the chapters. Concepts regarding collaboration with other school based professionals and classroom accommodations and modifications are outlined and provide examples for real life application. Each chapter of this textbook concludes with a list of vocabulary words and terms used in the educational environment. Practice management concepts not typically discussed in textbooks on this topic are presented including minimum competencies, third party billing, program outcome evaluation, mentoring and preceptoring. Recently qualified and even seasoned audiologists will appreciate attention given to recent advances in areas like cochlear implants, auditory processing disorders and auditory dys-synchrony as they relate to managing students with hearing loss. The varied and ever changing roles of audiologists in the educational setting are described and highlighted with vignettes or short personal statements describing real practitioners, degree and training information, work settings, job description within

their school districts and day to day responsibilities These personal accounts allow the AuD student an inside look at what audiologists do in the schools Students are able to experience through these readings how different exciting and even challenging school based positions can be Instructors using this textbook will be able to supplement their lectures with the information described here and will appreciate the structured approach wherein concepts contained in the chapters progressively advance in tune with the reader s knowledge Instructors goals will be met as well as KASA requirements because this textbook provides students the necessary knowledge needed to serve in an educational audiology position
