

Speed perception

- Drivers generally underestimate their speed
- Several perceptual (mostly visual) cues determine the feeling of speed:
- "Retinal streaming" (Gibson, 1950)
 - optical expansion of objects in the visual field
 - objects in the visual periphery move faster than more centrally located objects

Speed Of Perception:

Influence Mechanism of Visual Perception on Driver's Speed Control and Steering Behaviors Bing Liu,Jing Xia,Zipei Zhang,Naikan Ding,Wuxiong Peng,2018-09-17 Visual perception and its relationship to the subsequent manipulative behaviors are fundamental for people to recognize the world The most important manipulations of drivers are speed control and steering which could possibly guarantee a safe driving So to avoid accidents the driver does a series of judgments decisions and actions which could be impact by the visual information it perceived Over the past few decades visual perception has gradually gone from the psychology domain to its relevant fields like the transportation science and engineering to play a more important role in the human factors in transportation This books presents the state of the art in speed perception and its application with a kind of edge rate markings installed on roadways with empirical on road experiments and field observations of naturalistic driving data Reaching a great combination of the fundamental theory in cognitive psychology and the issues in traffic and transportation engineering this books is one of the most practical and up to date references available on the subject of influence of visual perception on drivers speed control and steering behaviors This allows the knowledge of visual perception and transportation accessible to a wider range of audiences and also introduce new thoughts and new methods for decision makers practitioners in dealing with traffic safety or related issues The fundamental concepts experimental process statistical analyses and comprehensive discussions are covered in detail providing the readers a systematic understanding of the field Social Perception M.D. Rutherford,Valerie A. Kuhlmeier,2013-08-30 An interdisciplinary exploration of perceptual and cognitive processes underlying the ability to perceive social information drawing on current research and new experimental techniques As we enter a room full of people we instantly have a number of social perceptions We have an automatic perception of others as subjective agents with their own points of view thoughts and goals and we can quickly interpret minimal visual information to infer that something is animate This book explores the perceptual and cognitive processes that allow humans to perceive and understand this social information quickly and apparently effortlessly Top researchers in fields ranging from developmental psychology to vision science consider the perception of biological and animate motion inferences based on this motion and the early development of these abilities These innovative contributions reflect a recent renewal of interest in the attribution of agency and the understanding of goal directed behavior which has been accompanied by a rapid increase in empirical discoveries enabled by such new experimental techniques as brain imaging The research presented in Social Perception suggests that an intuitive understanding of others is an integral part of human psychology develops early relies on a network of brain regions and may be compromised in autism Contributors Dare Baldwin Lara Bardi H Clark Barrett Erin Cannon You jung Choi Willem E Frankenhuys Tao Gao Emily D Grossman Antonia Hamilton Petra Hauf Valerie A Kuhlmeier Jeff Loucks Scott A Love Yuyan Luo Elena Mascalzoni Phil McAleer Richard Ramsey Lucia Regolin M D Rutherford Kara Sage Brian J Scholl Maggie Shiffrar

Francesca Simion Jessica Sommerville James P Thomas Nikolaus Troje Amanda Woodward **Neurowaves** Georg Northhoff,2023-05-15 The connection of the brain to the mind remains one of the most persistent mysteries in philosophy and neuroscience Georg Northhoff proposes a new approach to the so called mind body problem drawing on an insight from physics time structures all objects and events in the world and all objects and events are in dynamic relationship This also shapes the brain as it is part of the dynamic of the world as whole In Neurowaves Northhoff posits that the entire world is structured by waves of time and argues that the passing of these waves through our brains neurowaves produces mental experience The brain s neural waves transform into mental waves time and its dynamics are shared by brain and mind as their common currency As in physics and biology that radically changes our view Copernicus showed how the earth moves and that its movements are just a tiny part of the universe s passage of time Darwin showed that the human species is one among many species passing through evolution s timescales Northhoff calls for another Copernican revolution replacing the mind body problem with questions about the temporal dynamic relationship between brain and world Illustrated with vivid examples from different facets of the physical and biological world Neurowaves provides captivating insights and an innovative entertaining unravelling of the temporal connection of brain and mind **Stevens' Handbook of Experimental Psychology and Cognitive Neuroscience, Sensation, Perception, and Attention** ,2018-02-12 II Sensation Perception visual object recognition touch depth perception motor control perceptual learning the interface theory of perception vestibular proprioceptive and haptic contributions to spatial orientation olfaction audition time perception attention perception and interactive technology music perception multisensory integration motion perception vision perceptual rhythms perceptual organization color vision perception for action visual search visual cognition working memory *The Illuminating Engineer* ,1928 **Illuminating Engineer** ,1928 **Speed Records** Oliver Scott,AI,2025-03-10 Speed Records investigates the fascinating intersection of sports science and Japanese manga exploring the reality of human speed versus its exaggerated depiction in popular series It examines how athletes push the boundaries of velocity in sports like running and swimming highlighting the physiological constraints and training techniques involved For example muscle fiber composition and neurological signals play critical roles in achieving peak speeds The book also delves into how manga artists visually represent superhuman speed often defying physical laws The book uniquely contrasts these two worlds revealing how cultural fascination with superhuman abilities influences artistic expression The investigation progresses systematically first establishing a scientific foundation of human speed then analyzing the portrayal of speed in manga and finally comparing the two to understand their cultural significance By examining athletic achievements and manga artistry Speed Records offers a fresh perspective on human potential and imagination appealing to both sports enthusiasts and manga fans

Traffic Psychology Today Pierre-Emmanuel Barjonet,2013-03-14 After several decades of research practice intervention and instruction traffic psychology is in need of a summary work outlining the main trends in the discipline Traffic Psychology

Today provides a theoretical basis of the topic a summary of the acquired research in the field practical applications for government planners and a critical discussion of future trends Through a series of chapters contributed by an international group of researchers under the general editorship of Pierre Barjonet Traffic Psychology Today comprehensively synthesizes thinking in the psychology of traffic from its inception in the mid 1950s through the present day Speed and Micropolitics Simon Glezos,2020-10-04 This book provides a theoretical framework for understanding the micropolitics of speed a rich nuanced and embodied account of life in an accelerating world What does it feel like to live in an era of profound social acceleration What kinds of affects perceptions and identities does an accelerating world produce The answers to these questions mean more than simply understanding the psychology of speed they also mean understanding issues in contemporary politics as diverse as xenophobia and anti immigration policies patterns of transnational identification and solidarity social isolation and alienation and the ability of new media to coordinate social movements While drawing extensively on the work of contemporary theorists Simon Glezos recognizes that social acceleration is not a purely recent phenomenon He therefore turns to thinkers such as Nietzsche Spinoza Bergson and Merleau Ponty to ask how they sought to understand and respond to the rapid changes and unsettling temporalities of their eras and how their insights can be applied to our own Advancing theoretical understanding and offering a useful way to analytically conceptualize the nature of time Speed and Micropolitics will be of interest to students and scholars studying affect theory theories of the body new materialism phenomenology as well as the history of political thought Advances in Simulation and Digital Human Modeling Daniel N Cassenti,Sofia Scataglini,Sudhakar L.
