The Economics and Politics of High-Speed Rail Daniel Albalade, Germ Bel i Queralt, 2012-06-14 The technological revolution linked to high speed rail HSR has been accompanied by myths and claims about its contribution to society and the economy Although HSR is unquestionably a technological advance that has become a symbol of modernity this review and analysis of the international experiences shows that the conditions necessary to have a positive impact economically socially and environmentally are enormously restrictive The *Economics and Politics of High Speed Rail Lessons from Experiences Abroad* by Daniel Albalade and Germ Bel introduces the main questions policy makers and scholars should examine when considering and studying HSR implementation with particular emphasis on the US's recent interest in this technology and possible application in California Albalade and Bel then review the experiences of the most significant implementations of HSR around the globe This in depth international perspective includes chapters on the pioneers of HSR Japan and France the European followers Germany Spain and Italy as well as Asian experiences in China Taiwan and Korea Albalade and Bel's study provides a clear distinction between the myths and realities associated with this transportation innovation Among the most relevant findings this study highlights how HSR projects that do not satisfy highly restrictive conditions on mobility patterns measured costs and economically rational designs that make it desirable have been the source of huge financial debacles and the economic failure of HSR in most cases which result in unfortunate consequences for taxpayers The *Economics and Politics of High Speed Rail* is a rigorous investigation of the economic and political challenges and ramifications of implementing new public

Speed and Micropolitics Simon Glezos,2020-10-04 This book provides a theoretical framework for understanding the micropolitics of speed a rich nuanced and embodied account of life in an accelerating world What does it feel like to live in an era of profound social acceleration What kinds of affects perceptions and identities does an accelerating world produce The answers to these questions mean more than simply understanding the psychology of speed they also mean understanding issues in contemporary politics as diverse as xenophobia and anti immigration policies patterns of transnational identification and solidarity social isolation and alienation and the ability of new media to coordinate social movements While drawing extensively on the work of contemporary theorists Simon Glezos recognizes that social acceleration is not a purely recent phenomenon He therefore turns to thinkers such as Nietzsche Spinoza Bergson and Merleau Ponty to ask how they sought to understand and respond to the rapid changes and unsettling temporalities of their eras and how their insights can be applied to our own Advancing theoretical understanding and offering a useful way to analytically conceptualize the nature of time Speed and Micropolitics will be of interest to students and scholars studying affect theory theories of the body new

Politics of Time Tim Stevens,2016 Explores how security communities think about time and how this shapes the politics of security in the information age **Security, Technology and Global Politics** Mark Lacy,2014-02-05 This book analyses

some of the key problems explored in Paul Virilio s theorising on war and security Paul Virilio has developed a provocative series of writings on how modern societies have shaped the acceleration of military security technologies and how technologies of security and acceleration have transformed society economy and politics His examination of the connections between geopolitics war speed technology and control are viewed as some of the most challenging and disturbing interventions on the politics of security in the twenty first century interventions that help us understand a world that confronts problems that increasingly emerge from the desire to make life safer faster networked and more efficient Security

Technology and Global Politics examines some of the key concepts and concerns in Virilio's writings on security, society and technology, endo-colonization, fear and the war on terror, cities and panic, cinema and war, ecological security and integral accidents, universities and ideas of progress. Critics often point to an apocalyptic or fatalistic element to Virilio's writings on global politics, but this book challenges this apocalyptic reading of Virilio's work, suggesting that while he doesn't provide us with easy solutions to the problems we face, the political force in Virilio's work comes from the questions he leaves us with about speed, security and global politics in times of crisis, terror and fear. This book will be of interest to students of critical security studies, political theory, sociology, political geography, cultural studies and IR in general. **Transnational**

Paul Virilio John Armitage, 2000-05-24 Paul Virilio is one of the most significant and stimulating French cultural theorists writing today. Increasingly hailed as the archaeologist of the future, Virilio is noted for his proclamation that the logic of ever-increasing acceleration lies at the heart of the organization and transformation of the contemporary world. The first book to afford a properly critical evaluation of Virilio's cultural theory, it includes an interview with Virilio, a recently translated example of his work and a select bibliography of his writings. The commissioned contributions by leading cultural and social theorists examine Virilio's work from his early speculations on military and urban space to his current writings on dromology, politics, new communications technologies, disappearance and the fallout from the information bomb.
