Politics: An Introduction Barrie Axford, Victoria Browne, Richard Huggins, Rico Isaacs, 2018-05-30 The second edition of this user friendly text for students taking introductory

courses in politics builds on the success of the first edition. It provides completely updated and stimulating coverage of topics essential to the understanding of contemporary politics. Ideal for students taking combined degrees at introductory level in politics and the social sciences, it emphasises the individual and social dimension of politics and covers theories and concepts in an accessible way. New features in the second edition include new examples drawn from Western democracies and other political systems, expanded sections on nationalism, religion, alternative politics, globalisation and ethnic conflict, updated examples from the most contemporary political events, biographies of key political thinkers and figures.

Why We Hate Politics Colin Hay, 2013-04-23 Politics was once a term with an array of broadly positive connotations associated with public scrutiny, deliberation and accountability. Yet today it is an increasingly dirty word, typically synonymous with duplicity, corruption, inefficiency and undue interference in matters both public and private. How has this come to pass? Why do we hate politics and politicians so much? How pervasive is the contemporary condition of political disaffection? And what is politics anyway? In this lively and original work, Colin Hay provides a series of innovative and provocative answers to these questions. He begins by tracing the origins and development of the current climate of political disenchantment across a broad range of established democracies. Far from revealing a rising tide of apathy, however, he shows that a significant proportion of those who have withdrawn from formal politics are engaged in other modes of political activity. He goes on to develop and defend a broad and inclusive conception of politics and the political that is far less formal, less state-centric and less narrowly governmental than in most conventional accounts. By demonstrating how our expectations of politics and the political realities we witness are shaped decisively by the assumptions about human nature that we project onto political actors, Hay provides a powerful and highly distinctive account of contemporary political disenchantment. *Why We Hate Politics* will be essential reading for all those troubled by the contemporary political condition of the established democracies.

Politics Barrie Axford, 1997 Designed to meet the needs of those taking introductory courses in politics.

Total Lawfare Patrick S. Nash, Deniz Guzel, 2024-05-01 This book advocates for a novel doctrine of total lawfare as part of a comprehensive approach to modern hybrid warfare. The book begins by introducing the military concept of limited lawfare in the context of modern geopolitical conditions. It proceeds to set out a conceptual history of lawfare in the West, highlighting conceptual shortcomings and NATO's limited capabilities in this branch of hybrid warfare. It then provides a comparative case study and strategic threat assessment of the Chinese concept of unrestricted lawfare. Against this, the book grounds an ethical doctrine of total lawfare within the Western jurisprudential tradition and translates this into practice as a key pillar of modern defense strategy under the rule of law. The book concludes by advocating for a Thielian New Defense industry centered upon total lawfare as a legitimate and effective Western response to enemy aggression. The book will be of interest to academics, policy makers and students working in the fields of lawfare, jurisprudence and military law.
