Teaching to Support Children's Artistic Independence George Szekely, 2021-12-28 This engagingly written research and practice based book defines how art teachers can build on students creative initiatives without depending on adult imposed lesson plans and school requirements In doing so art educator and author George Szekely explores the role of the arts in developing children's creativity and sense of purpose and reminds readers that students in the art classroom are unique artists designers and innovators Against the backdrop of a school culture that over emphasizes compliance and standardization Szekely recognizes the importance of the role of the art teacher in supporting the artistic independence and

creative flare that occurs naturally in students of all ages in the classroom Providing real life examples of classrooms and schools that work towards championing child artists this text arms teachers with the skills necessary to listen to their students and support them in presenting their ideas in class Ultimately Szekely challenges readers to focus the practice of art teaching on the student s creative process rather than the teacher s presentation of art Written for pre service and in service art educators teacher educators and researchers Teaching to Support Children s Creativity and Artistic Independence demonstrates that an openness to youthful and inquisitive visual expression inspires a more rewarding learning experience for both teacher and child artists that can support a life long love of art

Arts-Based Education Tatiana Chemi,Lihong Wang,Xiangyun Du,2019-05-07 Core texts addressing creativity in a number of contexts show that creativity as a scientific subject has received principally the attention of Western scholars Is this due to the fact that Western cultures are more creative or sensitive to creativity than the Eastern cultures The editors strongly believe that this is more due to the differences in understanding and practising creativity in the West and East than to an Eastern indifference to creativity Arts Based Education China and Its Intersection with the World investigates the field of arts based educational practices and research It argues that reflections on these themes must necessarily be reframed and re read beyond the limits of colonialist oppositions and suggests a constructive and reflexive approach to theory and methodology which takes into account intercultural and critical perspectives in these studies This volume is the tangible product of the acknowledgement that China and Chinese culture deserves a more systematic and up to date dissemination through recent studies that bring together the arts learning and creativity It is clustered around two themes 1 China and its communication with the world through arts based education in international contexts and 2 the development of arts education in China
