

Target Dresden

Jacques R. Pauwels

Target Dresden:

Target Leipzig Alan Cooper, 2009-11-19 A gripping account of the RAF's attempt to destroy a Messerschmitt factory in 1944 and the carnage and confusion that unfolded on a dark winter night. Seventy-nine heavy bombers failed to return from the catastrophic raid on the industrial city of Leipzig on the night of February 19/20, 1944. Some 420 aircrew were killed and a further 131 became prisoners of war. It was at that time the RAF's most costly raid of World War II by far. The town was attacked in an attempt to destroy the Messerschmitt factory that was building the famous and deadly Bf 109 fighter. The bomber stream flew into what appeared to be a trap. It seemed that the Luftwaffe and anti-aircraft guns were aware of the intended target and waiting to pounce as soon as the bombers crossed the coast. They were subjected to constant attack by night fighters and intense flak until those aircraft that remained clawed their way home and secured relative safety over the North Sea. This book analyzes what went wrong. Espionage played a part and two bombers collided shortly after takeoff as did others as they wove their way through enemy searchlights and maneuvered violently to escape Luftwaffe night fighters. At the outset, poor navigational and meteorological briefings had hindered the bombers' attempts to locate the target and confusion reigned. The author explains the concept of this third raid on Leipzig and describes the two previous ones in October and December 1943, both of which had been deemed successes. He looks at the third raid from every angle, including the defending forces and describes the daylight raid that followed on the 20th by the USAAF. The book also includes appendices listing all RAF aircraft and crew on the raid, route maps, and many photographs. **Target - Dresden** Alan W. Cooper, 1995. Target Dresden begins with the story of the development of the bomber to the stage that it could be used to destroy an entire city. Cooper recounts the decisions made to choose Dresden as a target, citing historical records of the communications between the politicians and military commanders. Describes the actual planning and execution of the raid using many eyewitness accounts. Hdbd 6 1 4x 9 1 2 256 pgs 46 bandw ill **My Target Was**

Leningrad Philip Goodall, 2017-01-20 **The Path Finder Force** Martin W. Bowman, 2016-03-30 Charged with the formidable task of locating and marking German targets for attack by the main force of Bomber Command, the Path Finder Force 8 PFF Group and those in 5 Group was perhaps the most experienced and highly trained elite group created within the Royal Air Force during World War II. Its aircrew members were almost entirely volunteers and despite the terrifying odds against any individual or complete crew ever completing the sixty sorties tour of operations with the PFF, the most feared punishment was to forfeit their coveted Path Finder wings and be posted away to other units. This remarkable evocation of a remarkable force is made up largely of narrative and photographs from the men who flew with or were an integral part of the PFF. They alone are best qualified to recount the Path Finder story. While the subject matter herein largely covers the four-engined Stirlings, Halifaxes, and Lancasters and twin-engined Mosquitoes of 8 PFF Group, the Path Finding techniques used by 5 Group are not forgotten and there are two chapters detailing the work of the Oboe Mosquitoes and other markers in

support of the night and day Main Force raids on German and Italian cities and individual targets in the Reich This book is a fitting tribute to the PFF and in particular to the crews who failed to return from the PFF s many operations **The Myth of the Good War** Jacques R. Pauwels, 2015-03-06 In the spirit of historians Howard Zinn Gwynne Dyer and Noam Chomsky Jacques Pauwels focuses on the big picture Like them he seeks to find the real reasons for the actions of great powers and great leaders Familiar Second World War figures from Adolf Hitler to Franklin D Roosevelt and Joseph Stalin are portrayed in a new light in this book The decisions of Hitler and his Nazi government to go to war were not those of madmen Britain and the US were not allies fighting shoulder to shoulder with no motive except ridding the world of the evils of Nazism In Pauwels account the actions of the United States during the war years were heavily influenced by American corporations IBM GM Ford ITT and Standard Oil of New Jersey now called Exxon who were having a very profitable war selling oil armaments and equipment to both sides with money gushing everywhere Rather than analyzing Pearl Harbor as an unprovoked attack Pauwels notes that US generals boasted of their success in goading Japan into a war the Americans badly wanted One chilling account describes why President Truman insisted on using nuclear bombs against Japan when there was no military need to do so Another reveals that Churchill instructed his bombers to flatten Dresden and kill thousands when the war was already won to demonstrate British American strength to Stalin Leaders usually cast in a heroic mould in other books about this war look quite different here Nations that claimed a higher purpose in going to war are shown to have had far less idealistic motives The Second World War as Jacques Pauwels tells it was a good war only in myth The reality is far messier and far more revealing of the evils that come from conflicts between great powers and great leaders seeking to enrich their countries and dominate the world **AECU ,1960 Target Station Optimization for the High-Brilliance Neutron Source HBS** Jan Philipp Dabrock, 2018-12-29 In the present work the target station of the accelerator driven neutron source HBS is optimized in comprehensive parameter studies using the Monte Carlo method The dependence of the most important performance characteristics of such a system on the external parameters is investigated neglecting technical and mechanical limitations In this way qualitative and quantitative statements for all possible configurations and envisaged applications can be derived and should be considered in the detailed planning of such facilities For this purpose different scenarios are considered that place completely different requirements on the design of the target station The central statements derived in this thesis can be transferred to any framework conditions such as different accelerator energies so that these results can be used in the development of other neutron sources which together with the HBS form a European network and provide a prosperous community in neutron science Operation Thunderclap: The Bombing Of Dresden LTC Richard A. Conroy, 2014-08-15 Precision bombing of military targets was a reality in World War II by the end of 1943 By February 1945 the war in Europe was nearly over Why then at that time was the city of Dresden destroyed by allied firebombing In addressing this question the Dresden case study examines the evolution of bombing practices on both sides

during the war in Europe Both British and American bombing policies are scrutinized Objectives both military and political served by the Dresden bombing are explained Public reaction to the bombings in the U K and the U S are discussed as well as the reaction of both Governments to those reactions Finally the study examines the doctrine of Just War draws conclusions and provides commentary

Bomber Command Roddy MacKenzie, 2023-02-16 Roddy MacKenzie's father served in Bomber Command during the Second World War but like so many brave veterans who had survived the war he spoke little of his exploits So when Roddy started on his personal journey to discover something of what his father had achieved he uncovered a great deal about the devastating effectiveness of Bomber Command and the vital role it played in the defeat of Third Reich He realised that the true story of Bomber Command's achievements has never been told nor fully acknowledged Roddy became a man on a mission and this startlingly revealing and often personal study is the result Bomber Command Churchill's Greatest Triumph takes the reader through the early days of the Second World War and introduces all the key individuals who turned the Command into the war winning weapon it eventually became as well as detailing the men and machines which flew night after night into the heart of Hitler's Germany The main focus of his book is the destruction and dislocation wrought by the bombing to reduce and ultimately destroy Germany's ability to make war In his analysis Roddy dug deep into German archival material to uncover facts rarely presented to either German or English language readers These demonstrate that Bomber Command's continual efforts at appalling cost in aircrew casualties and aircraft losses did far more damage to the Reich than the Allies knew Roddy's father served with the Royal Canadian Air Force and Roddy naturally highlights its contribution to Bomber Command's successes another aspect of this fascinating story which the author believes has not been duly recognized Bomber Command Churchill's Greatest Triumph will certainly raise the debate on the controversial strategy adopted by Bomber Harris and how he was perceived by many to have over stepped his remit But most of all this book will revise people's understanding of just how important the endeavours were of those men who flew through the dark and through the searchlights the flak and the enemy night fighters to bring the Second World War in Europe to its crushing conclusion

Airpower in Literature Kimberly K. Dougherty, 2022-08-08 The first century of airpower has ended yet few critics have addressed the literature that chronicles its human toll Airpower in Literature Interrogating the Clean War 1915-2015 offers fresh insight into this airpower century by placing literature of five major wars in conversation with the clean war discourse Kimberly Dougherty examines the paradoxical representation of aerial warfare that has allowed extensive airstrikes on cities and civilians while promising a cleaner method of waging war First suggested by early military theorists the notion of a clean air war one that would save lives through its speed and precision proved seductive in the twentieth century and continues to shape the rhetoric of airpower today The air war is perceived as clean the author argues when we see neither the aviator nor the targeted populations in the bombing dynamic Through analysis of fiction poetry drama and journalism from the ruins of World War I to the technologies of post modern war the author identifies

counternarratives that make visible both aviators and bombed societies and present aerial warfare that is not clean but messy prolonged and imprecise This exploration encourages readers and writers to approach the next century of airpower with greater wisdom and empathy
