Island Futures Godfrey Baldacchino, Daniel Niles, 2011-06-25 Islands face one of the most pressing issues of our time how to balance ecological integrity with economic development and collective quality of life including the need for social and conservation space Islands are sites of rich and varied human and ecological diversity but they are also often characterized by narrow resource bases and dependency on links to the outside world and by their limited ability to determine the actual character of those links This volume reviews the challenges of island development and conservation in the Asia Pacific region With emphasis on nature reserves and UNESCO World Heritage sites chapters describe the benefits barriers and potential

pitfalls in preserving such sites managing biota and attracting and controlling tourism The book also provides a provocative challenge to move beyond the typical concerns of sustainability to the more holistic concept of futurability or future potential for convivial human environmental interactions **A Short History of Australia** Sir Ernest Scott,1918
