The American West in Bronze, 1850-1925 Thayer Tolles, Thomas Brent Smith, 2013 Themes of the American West have been enduringly popular and The American West in Bronze features sixty five iconic bronzes that display a range of subjects from portrayals of the noble Indian to rough and tumble scenes of rowdy cowboys to tributes to the pioneers who settled the lands west of the Mississippi Fascinating texts offer a fresh look at the roles that artists played in creating interpretations of the vanishing West Whether based on fact fiction or something in between These artists including Charles M Russell and Frederic Remington embody a range of life experiences and artistic approaches The American West in Bronze 1850 1925 is the first full scale exhibition to explore the aesthetic and cultural impulses behind the creation of statuettes with American western themes which have been so popular with audiences then and now Both the exhibition and this accompanying catalogue offer a fresh look at the multifaceted roles played by these sculptors in creating three dimensional interpretations of western life whether based on historical fact mythologized fiction or most often something in between Examples by such archetypal representatives of the West as Frederic Remington and Charles M Russell are complemented by the work of sculptors such as James Earle Fraser and Paul Manship who contributed to the popularity of the American bronze statuette even though their western subjects were less frequent Publisher s description
