Evidence in Action between Science and Society Sarah Ehlers,Stefan Esselborn,2022-07-15 This volume is an interdisciplinary attempt to insert a broader historically informed perspective into current political and academic debates on the issue of evidence and the reliability of scientific knowledge The tensions between competing paradigms different bodies of knowledge and the relative hierarchies between them are a crucial element of the historical and contemporary dynamics of scientific knowledge production The negotiation of evidence is at the heart of this process Starting from the premise that evidence constitutes a central but also essentially contested concept in contemporary knowledge based societies this volume focuses on how evidence is generated and applied in practice in other words on evidence in action The contributions analyze and compare different evidence practices within the field of science and technology how they interlink with different forms of power their interaction with and impact on the legal and political domain and their relationship to other more heterodox forms of evidence that challenge traditional notions of evidence In doing so this volume provides much needed context and

historical background to contemporary debates on the so called post truth society Evidence in Action is the perfect resource for all those interested in the relationship between science technology and the role of knowledge in society Chapter 6 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license
