Technological Change In Agriculture Locking In To Genetic Uniformity:

Technological Change In Agriculture D. Hogg, 2000-02-11 Why do modern agricultural techniques which are environmentally damaging continue to be used This path breaking book seeks the answer to that question in an understanding of evolution of agricultural research in its cultural context

Socio-Economic Development Adam Szirmai, 2015-06-18 Taking a comparative and multidisciplinary approach this textbook offers a non technical introduction to the dynamics of socio economic development and stagnation

The Economics of Climate Change and the Change of Climate in Economics Kevin Maréchal, 2013-05-02 Climate change is without question the single most important issue the world faces over the next hundred years The most recent scientific data have led to the conclusion that the globally averaged net effect of human activities since 1750 has been one of warming and that continued greenhouse gas emissions at or above current rates would cause this process to continue to the severe detriment of our environment This unequivocal link between climate change and human activity requires an urgent world wide shift towards a low carbon economy and coordinated policies and measures to manage this transition The starting point and core idea of this book is the long held observation that the threat of climate change calls for a change of climate in economics Inherent characteristics of the climate problem including complexity irreversibility and deep uncertainty challenge core economic assumptions and mainstream economic theory appears inappropriately equipped to deal with this crucial issue Kevin Mar chal shows how themes and approaches from evolutionary and ecological economics can be united to provide a theoretical framework that is better suited to tackle the problem

The Dynamics of Socio-Economic Development Adam Szirmai, 2005-01-20 Why are poor countries poor and rich countries rich How are wealth and poverty related to changes in nutrition health life expectancy education population growth and politics This modern non technical 2005 introduction to development studies explores the dynamics of socio economic development and stagnation in developing countries Taking a quantitative and comparative approach to contemporary debates within their broader context Szirmai examines historical institutional demographic sociological political and cultural factors Key chapters focus on economic growth technological change industrialisation agricultural development and consider social dimensions such as population growth health and education Each chapter contains comparative statistics on trends from a sample of twenty nine developing countries This rich statistical database allows students to strengthen their understanding of comparative development experiences Assuming no prior knowledge of economics the book is suited for use in inter disciplinary development studies programmes as well as economics courses and will also interest practitioners pursuing careers in developing countries

Environment, Climate, Plant and Vegetation Growth Shah Fahad, Shah Saud, Taufiq Nawaz, Liping Gu, Mushtaq Ahmad, Ruanbao Zhou, 2024-09-26 The book provides currently available information on the changing climate and its impact on functional and adaptive features of plants The book also cover cutting edge research on key determinants of plant growth that provides a direction towards execution of

programs and practices that will assist resilience of crop production systems to the changing climate This book will represent the updated scientific information regarding soil and plant productivity under changing climate which will be beneficial to academics and researchers working on climate change agronomy stress physiology biotechnology It provides an in depth discussion on the latest techniques to enhance plant responses to new environmental conditions that can be directly applied on field

A Revolution Down on the Farm Paul Conkin, 2008-09-01 At a time when food is becoming increasingly scarce in many parts of the world and food prices are skyrocketing no industry is more important than agriculture Humans have been farming for thousands of years and yet agriculture has undergone more fundamental changes in the past 80 years than in the previous several centuries In 1900 30 million American farmers tilled the soil or tended livestock today there are fewer than 4 5 million farmers who feed a population four times larger than it was at the beginning of the century Fifty years ago the planet could not have sustained a population of 6 5 billion now commercial and industrial agriculture ensure that millions will not die from starvation Farmers are able to feed an exponentially growing planet because the greatest industrial revolution in history has occurred in agriculture since 1929 with U S farmers leading the way Productivity on American farms has increased tenfold even as most small farmers and tenants have been forced to find other work Today only 300 000 farms produce approximately ninety percent of the total output and overproduction largely subsidized by government programs and policies has become the hallmark of modern agriculture A Revolution Down on the Farm The Transformation of American Agriculture since 1929 charts the profound changes in farming that have occurred during author Paul K Conkin s lifetime His personal experiences growing up on a small Tennessee farm complement compelling statistical data as he explores America s vast agricultural transformation and considers its social political and economic consequences He examines the history of American agriculture showing how New Deal innovations evolved into convoluted commodity programs following World War II Conkin assesses the skills new technologies and government policies that helped transform farming in America and suggests how new legislation might affect farming in decades to come Although the increased production and mechanization of farming has been an economic success story for Americans the costs are becoming increasingly apparent Small farmers are put out of business when they cannot compete with giant non diversified corporate farms Caged chickens and hogs in factory like facilities or confined dairy cattle require massive amounts of chemicals and hormones ultimately ingested by consumers Fertilizers new organic chemicals manure disposal and genetically modified seeds have introduced environmental problems that are still being discovered A Revolution Down on the Farm concludes with an evaluation of farming in the twenty first century and a distinctive meditation on alternatives to our present large scale mechanized subsidized and fossil fuel and chemically dependent system

Europe's Green Revolution and Others Since Jonathan Harwood, 2012-05-04 How best to foster agricultural development in the Third World has long been a subject of debate and from a European perspective the persistent failure to design peasant friendly technology is puzzling From the late 19th century for example

various western European countries also underwent green revolutions in which systematic attempts were made to promote the adoption of technological innovation by peasant farmers This book focuses on the development of public sector plant breeding in Germany from the late nineteenth century through its fate under National Socialism Harwood uses this historical case study in order to argue that peasant friendly research has an important role to play in future Green Revolutions

BOOK JACKET Titans of Industrial Agriculture Jennifer Clapp,2025-02-18 How a small handful of giant transnational corporations has come to dominate the farm inputs sector why it matters and what can be done about it Every year hundreds of billions of dollars worth of farm machinery fertilizer seeds and pesticides are sold to farmers around the world Although agricultural inputs are a huge sector of the global economy the lion s share of that market is controlled by a relatively small number of very large transnational corporations The high degree of concentration among these agribusiness titans is striking considering that just a few hundred years ago agricultural inputs were not even marketed goods In Titans of Industrial Agriculture Jennifer Clapp explains how we got from there to here outlining the forces that enabled this extreme

concentration of power and the entrenchment of industrial agriculture Clapp reveals that the firms that rose to the top of these sectors benefited from distinct market technology and policy advantages dating back a century or more that enabled them to expand their businesses through mergers and acquisitions that made them even bigger and more powerful These dynamics matter because the firms at the top have long shaped industrial farming practices that in turn have generated enormous social ecological and health impacts on the planet and the future of food systems Beyond analyzing how these problems have arisen and manifested the book examines recent efforts to address corporate power and dominance in food systems and assesses the prospects for change Among the first works to examine deep roots of corporate power in agriculture *Titans of Industrial Agriculture* helps illuminate just how corporate actors have encouraged the lock in of industrial agriculture despite all its known social and ecological costs

Diversifying Food and Diets Jessica Fanzo, Danny Hunter, Teresa Borelli, Federico Mattei, 2013-06-26 Currently 868 million people are undernourished and 195 million children under five years of age are stunted At the same time over 1 billion people are overweight and obese in both the developed and developing world Diseases previously associated with affluence such as cancer diabetes and cardio vascular disease are on the rise Food system based approaches to addressing these problems that could enhance food availability and diet quality through local production and agricultural biodiversity often fall outside the traditional scope of nutrition and have been under researched As a consequence there remains insufficient evidence to support well defined scalable agricultural biodiversity interventions that can be linked to improvements in nutrition outcomes Agricultural biodiversity is important for food and nutritional security as a safeguard against hunger a source of nutrients for improved dietary diversity and quality and strengthening local food systems and environmental sustainability This book explores the current state of knowledge on the role of agricultural biodiversity in improving diets nutrition and food security Using examples and case studies from around the globe the book explores current strategies for improving nutrition and diets and identifies key research and implementation gaps that need to be addressed to successfully promote the better use of agricultural biodiversity for rural and urban populations and societies in transition

Successful Agricultural Innovation in Emerging Economies David J. Bennett, Richard C. Jennings, 2013-03-07 An authoritative review of the implementation of new crop breeding technologies and their role in feeding an increasing global population
