Ferkiss,1994-11 Traces cultural attitudes toward the environment and technology across the span of human civilization While all human societies have enlisted technologies to control nature the last hundred years have witnessed the technological exploitation and destruction of natural resources on an unprecedented scale As environmental groups and the scientific community sound the alarm about deforestation global warming and ozone depletion the obvious question arises how did we get where we are today In *Nature Technology and Society* Victor Ferkiss sets out to answer this central question arguing that we cannot escape from our present environmental predicament unless we understand the ideas which have created it Ferkiss asks the basic questions concerning humans and their relationship to the environment He traces cultural attitudes towards the environment from early mankind to the present day This fascinating book is distinctive both in its comprehensiveness and in its attempt to place side by side influential thinkers and movements with varied views on these issues      **The Cybernetic**

**Society** Ralph Parkman,2013-09-24 The *Cybernetic Society* brings together facts and ideas which help give perspective to man s role in a cybernetic society Emphasizing the transforming power of technological innovation and the ties between technology and society the book explores the impact of industrialization on the working man systems design for social systems the relevance of cybernetics and machine translation and self reproducing machines The effects of technology on government education and science and the arts are also given consideration This volume consists of 10 chapters and begins with an introduction to the transforming power of technology before turning to the nature and significance of important technological innovations with some emphasis on the role of the computer and their connection to a variety of human concerns many of which are strongly rooted in the history of technology and science Emphasis is placed on energy and its transformation organization or synchronization and information Attention then shifts to the problems of industrial job displacement unemployment or underemployment and poverty from the time of the first Industrial Revolution to the present cybernated era Some of the economic and political solutions which have been proposed are highlighted The chapters that follow focus on how technology contributes to patterns of social change the potential of cybernetics to elucidate relationships between organic and inorganic systems and the uniqueness of the human mind versus intelligent machines The book concludes with a look at the futurists and their forecasting activities This book will be useful to students from all disciplines

**John Dewey's Pragmatic Technology** Larry A. Hickman, 1990 This book does much to dispel the old canard that John Dewey was guilty of scientism and a reverent worship of technological progress Indeed Dewey predated the Frankfurt school in his warnings about the dangers inherent in a machine culture With new advances come new problems and these can only be dealt with through an instrumentalist approach Dewey also argued that we have no guarantee of success Natural events can terminate human life and human greed laziness or error could have the same result

**Philosophy and the Self** Troy Wilson Organ, 1987 Information Communication Technologies: Concepts, Methodologies, Tools, and Applications Van Slyke, Craig, 2008-04-30 The rapid development of information communication technologies ICTs is having a profound impact across numerous aspects of social economic and cultural activity worldwide and keeping pace with the associated effects implications opportunities and pitfalls has been challenging to researchers in diverse realms ranging from education to competitive intelligence

*Philosophy in Geography* S. Gale, Gunnar Olsson, 2012-12-06 In any edited volume most credit is due to the individual authors The present case is no exception and we as editors have done little apart from serving as coordinators for a group of friends and colleagues For once the responsibilities are shared We feel that the collection gives a fair representation of the activities at the frontier of human geography in North America Whether these premonitions will be further substantiated is of course to be seen In the meantime we take refuge in Vico's saying that doctrines must take their beginning from that of the matter of which they treat And yet we also know that new treatments never lead to final ends but rather to new doctrines and to new beginnings It is also a pleasure to acknowledge those publishers and authors who have given permission to reprint copyrighted materials Association of American Geographers for Leslie J King's Alternatives to a Positive Economic Geography Annals of the Association of American Geographers Vol 66 1976 Edward Arnold Publishers Ltd for Yi Fu Tuan's Space and Place Humanistic Perspective in Christopher Board et al eds Progress in Geography Vol 6 1974 Economic Geography for David Harvey's Population Resources and the Ideology of Science Economic Geography Vol 50 1974 Institute of British Geographers for David Ley's Social Geography and the Taken for Granted World Transactions of the Institute of British Geographers Vol 2 1977 and North Holland Publishing Company for Allen J

From Human to Posthuman Brent Waters, 2016-04-22 Technology is one of the dominant forces shaping the emerging postmodern world Indeed the very fabric of daily life is dependent upon various information communication and transportation technologies With anticipated advances in biotechnology artificial intelligence and robotics that dependence will increase Yet this growing dependence is accompanied with a deep ambivalence For many technology symbolises the faith of the postmodern world but it is an ambivalent faith encapsulating both our hopes and fears for the future This book examines the religious foundations underlying this troubled faith in technology as well as critically and constructively engaging particular technological developments from a theological perspective

**Missions and Money** Jon Bonk, 2006 This revised edition of Missions and Money offers new reflections in the light of a changed situation in Christian missionary circles Bonk offers new reflections in

the lights of a changed situation now marked by increases in the number of short term missionaries and increases in the numbers of Asians Africans and Latin Americans leaving their homelands to serves as missionaries to other people The conversation on the ambiguity of wealth and Christian missionary outreach is deepened with essays by Christopher J H Wright on the righteous rich in the Hebrew Bible and by Justo Gonzalez on faith and wealth in the Christian Bible and the early church Book jacket      From Human to Posthuman Professor Brent Waters,2013-05-28 Technology is one of the dominant forces shaping the emerging postmodern world Indeed the very fabric of daily life is dependent upon various information communication and transportation technologies With anticipated advances in biotechnology artificial intelligence and robotics that dependence will increase Yet this growing dependence is accompanied with a deep ambivalence For many technology symbolises the faith of the postmodern world but it is an ambivalent faith encapsulating both our hopes and fears for the future This book examines the religious foundations underlying this troubled faith in technology as well as critically and constructively engaging particular technological developments from a theological perspective      **Communications Satellites** Joseph N. Pelton,Robert J. Oslund,Peter Marshall,2004-09-22 Over the past 40 years satellites have played a key role in creating a global culture spreading worldwide entertainment stimulating technological interchange and promoting trade around the world Communications Satellites Global Change Agents addresses communications satellites not only in terms of the technology and the services they provide but also with consideration of the technology s impact in socio political security economic policy news entertainment and cultural spheres Editors Joseph N Pelton Robert J Oslund and Peter Marshall bring together contributions that place satellites into a broad context and examine how they influence and define today s world Written in a non technical reader friendly style chapters investigate how satellite communications work and explore the role of satellites in such arenas as news and entertainment systems around the world Internet E business and the new global economy global television and radio channels military operations and education health services economic development and electronic immigration Communications Satellites Global Change Agents examines what satellites have been and projects how they will evolve in the future articulating what they mean to the world today and forecasting what they will mean tomorrow As the definitive source on communications satellites and their role in today s world this volume serves as a valuable unique and timely resource for scholars and students in telecommunications communication and technology mass communication and society and broadcasting      *Jazz and Christian Freedom* Bradley K. Broadhead,2018-12-21 Contemporary Western society has a strange relationship with freedom Unbridled subjective liberty and narrow fundamentalism pull away from each other in mutual loathing while sociological forces seek to manipulate both sides The church needs to recover and reconstruct a theology of freedom to navigate between the perils of both extremes and to avoid being manipulated by these forces Just as biblical figures are taught through parables and metaphors this book uses jazz improvisation as an analogy for Christian freedom Just as jazz improvisation relies on successfully navigating constraints

such as the history and traditions of jazz jazz theory and musical instruments so Christian freedom also relies on constraints such as the biblical canon church history theology and the church itself Through understanding the freedom jazz musicians enjoy in making music together we can better understand how Christian freedom might be enacted in daily life If Western churches discover and enact Christian freedom in a meaningful way the songs that they improvise will be as siren calls to people in chains
