Technological Perspectives On Behavioral Change:

Technological Perspectives on Behavioral Change Michael Brian Schiffer, 2022-08-30 Human societies have always been characterized by a dependence on artifacts from prehistoric stone tools to modern electronic devices Technology responds to and affects virtually all human behavior yet the interdependence of behavior and artifacts has never been studied intensively Archaeologist Schiffer now draws on his discipline's familiarity with artifacts and the processes of change they reveal to offer new insight into the study of behavioral change Drawing on case studies that deal with changes in architecture ceramics and electronic technology he emphasizes the central idea that the explanations of change must focus on the nexus of behavior and artifacts in the context of activities

Anthropological Perspectives on Technology Michael B. Schiffer, 2001 These fourteen original essays accept a dual premise technology pervades and is embedded in all human activities By taking that approach studies of technology address two questions central in anthropological and archaeological research today accounting for variability and change These diverse yet interrelated chapters show that to understand human lives researchers must deal with the material world that all peoples create and inhabit Therefore an anthropology of technology is not a separate discrete inquiry instead it is a way to connect how people make and use things to any activity studied ranging from religion to enculturation to communication to art Each contributor discusses theories and methods and also offers a substantial case study These detailed inquiries span human societies from the Paleolithic to the computer age By moving beyond the usual approach of examining ancient technologies particularly chipped stone and low fired ceramics this volume probes for the construction of meaning in the material world across millennia The authors of these essays find technology to be an inclusive and flexible topic that merges with studies of everything else in human activity A provocative and powerful discussion of the role of technology in human cultures At a time when archaeology has become less focused on theory and archaeology and social anthropology seem to fracture farther and farther apart the book is a breath of fresh air Professor John Douglas University of Montana

Behavior Change Research and Theory Linda Little, Elizabeth Sillence, Adam Joinson, 2016-11-11 Behavior Change Research and Theory Psychological and Technological Perspectives provides a unified account of behavior change theories and broad coverage of application domains and best practices From a psychological and human computer interaction perspective the book puts a strong emphasis on the psychological foundations of behavior change and explores the relationship between technology and behavior change It will cover the major behavior change theories planned behavior health belief model protection motivation transtheoretical and more recent approaches to behavior change like Nudge and Mindspace The section on health research and behavior change will cover interventions like diet and fitness mental health smoking cessation and diabetes management Topics also include financial and security research and behavior change in relation to financial and other forms of sensitive information passwords phishing and financial transactions The last section will highlight the challenges and opportunities afforded by the increasing use of mobile

technology with respect to the design of programs and apps aimed at facilitating behavior change and the role of social media Provides case studies of key theoretical models of behavior change Evaluates the success of key theories Details cost benefit analyses of each particular approach Includes techniques such as implementation intentions self affirmation feedback and social support Offers practical consideration of the impact of technology and design Delves into sustainability issues such as recycling and energy reduction Highlights future directions for research

The Oxford Handbook of Engineering and Technology in the Classical World John Peter Oleson,2008 Nearly every aspect of daily life in the Mediterranean world and Europe during the florescence of the Greek and Roman cultures is relevant to engineering and technology This text highlights the accomplishments of the ancient societies the research problems and stimulates further progress in the history of ancient technology

The Persistence of Sail in the Age of Steam Donna J. Souza,2013-06-29 In Archaeology Under Water 1966 19 pioneer nautical archaeologist George Bass pointed out how much easier it is to train someone who is already an archaeologist to become a diver than to take trained divers and teach them to do archaeology While this is generally true there have also been occasions when well trained and enthusiastic sport divers have been willing to accept the training and discipline necessary to conduct good archaeological science becoming first rate scholars in the process Dr Donna Souza s book is the product of just such a transition It shows how a sport diver and volunteer fieldworker can proceed through a rigorous graduate program to achieve research results that are convincing in their own right and point toward new directions in the discipline as a whole What is new in this book for maritime archaeology Perhaps the most obvious and important feature of Dr Souza s archaeological and historical analysis of the wreck at Pulaski Reef and its contemporaries in the Dry Tortugas National Park Florida is the way it serves as a means to a larger end namely an understanding of the social history of the transition from sail to steam in late nineteenth century maritime commerce in America The relationship between changes in technology and culture is a classic theme in anthropology and this study extends the theme into the domain of underwater archaeology

The Promise of New Technologies in an Age of New Health Challenges A.J. Maeder,K. Ho,A. Marcelo,2016-11-24 There is a changed emphasis in many health services with conventional pressures such as budget and workforce constraints combined with the indirect forces of social change and strategic direction bringing about the need for more flexible approaches for the longer term By enabling different care models and delivery channels telehealth offers demonstrably effective and sustainable solutions for issues such as access to and quality of care This book presents 18 papers delivered at the 5th Global Telehealth Conference held in Auckland New Zealand in November 2016 The theme chosen for Global Telehealth 2016 is The Promise of New Technologies in an Age of New Health Challenges and the papers included here cover a wide variety of topics from

theoretical and abstract contributions through to discussions of practical projects and highly specific applied contributions. The book also includes two invited papers which detail recent contributions to two global issues in which telehealth plays a major role: universal health coverage and personal health monitoring. With papers ranging in scope from computer assisted screening technology for diabetic retinopathy to behavior change through computer games, this book will be of interest to all those involved in the design and provision of healthcare services.

Archaeology Barry W. Cunliffe, Wendy Davies, Colin Renfrew, 2002. Twenty six leading scholars from around the world have come together to celebrate the strengths, the energies and the sheer intellectual excitement of their discipline. They unashamedly proclaim that over the last hundred years archaeology has transformed itself from a genteel antiquarian pursuit deeply rooted in the classical tradition to a rigorous and demanding discipline spanning the humanities and the sciences yet at the same time one widely accessible to the public at large. The contributors show how our understanding of the past has changed, reveal the exciting ideas under current debate and offer their visions of the future. The result is a remarkable overview of world archaeology focusing on new and unexpected themes at the cutting edge of the discipline.

Current and Emerging mHealth Technologies Emre Sezgin, Soner Yildirim, Sevgi Özkan-Yildirim, Evren Sumuer, 2018-04-25. The promise and prospects for mobile technologies in healthcare service delivery, particularly as experienced by patients and other users, are the focus of this forward looking volume. Its detailed sociotechnical perspective takes in factors influencing patient and provider adoption of technological advances in addition to the well known cost and accessibility advantages. Enlightening reports show mobile health technologies in multiple contexts as an impetus for behavioral change, a means of monitoring health changes, a growing trend in service delivery and an emerging health frontier worldwide. Together these chapters point to the continued expansion and global reach of mobile technology in the next stage of healthcare services. Included in the coverage: Behavior change techniques used in mobile applications targeting physical activity; a systematic review: Mobile health integration in pregnancy; Unintended users, uses and consequences of mobile weight loss apps; using eating disorders as a case study: Intention vs perception; understanding the differences in physicians' attitudes towards mobile health applications; HealthGuide: a personalized mobile patient guidance system; Adoption of sensors in mobile health. Current and Emerging mHealth Technologies is salient reading for researchers interested in mobile health development and implementation as well as technology adoption and mobile health system developers and managers who are interested in the implications of mobile health use by patients and/or healthcare professionals. It can also be used for courses in technology adoption and health technologies.

Behavioral Archaeology Michael B. Schiffer, 2016-04-08. Behavioral archaeology offers a way of examining the past by highlighting human engagement with the material culture of the time. Behavioral Archaeology: Principles and Practice offers a broad overview of the methods and theories used in this approach to archaeology. Opening with an overview of the history and key concepts, the book goes on to systematically cover both principles and practice, the philosophy of

science and the scientific method artifacts and human behavior archaeological inference formation processes of the archaeological record technological change behavioral change and ritual and religion Detailed case studies show the relevance of behavioral method and theory to the wider field of archaeological studies The book will be invaluable to students of archaeology and anthropology *Handbook of Research on Green ICT: Technology, Business and Social Perspectives* Unhelkar, B.,2010-10-31 This handbook coalesces worldwide investigations thoughts and practices in the area of Green ICT covering the technical advances methodological innovations and social changes that result in enhancements and improvements in business strategies social policies and technical implementations Provided by publisher *Archaeological Method and Theory* Linda Ellis,2003-12-16 This Encyclopedia brings together the most recent scientific information on a collection of subjects that are too often and inconveniently treated in separate publications It provides a survey of archaeological method and theory as well as the application of physical and biological sciences in archaeological research Every aspect of archaeological work is represented from the discovery process to the ultimate disposition of materials Thus the reader will find entries on subject matter covering disciplinary theory legislation affecting the work of archaeologists pre excavation surveying excavation methodology on site conservation techniques post excavation analysis The rapid evolution of analytical technology is often superficially treated or not covered at all in textbooks or other commonly available sources Here the latest refinements in techniques such as radiometric dating stable isotopic analysis and the PCR technique of DNA analysis are presented clearly and authoritatively The discussion of these techniques is amplified by including results of the work of professionals conducting interdisciplinary research and by covering the methodological enhancements provided by the physical and natural sciences Cultural property legislation regardless of its country of origin has affected how archaeologists conduct their work This encyclopedia covers all major U S legislation developed for the protection of cultural property including the recent Native American Graves Protection and Repatriation Act and offers a substantial article on worldwide legislation concerning the reburial of human remains and its effects on the present and future practice of archaeology Without some sort of conservation program at the point of excavation valuable materials may be inadvertently contaminated or destroyed Many simple and low cost techniques to promote both sample integrity and long term preservation for major classes of materials are described in this volume Traditional treatments of method and theory usually focus on prehistoric periods and are limited in their geographic range This volume includes discussions based on various historical periods on different continents as reflected in entries such as Historical Archaeology Industrial Archaeology Medieval Archaeology and Classical Archaeology *Technology, Anthropology, and Dimensions of Responsibility* Birgit Beck,Michael Kühler,2020-02-19 With great power comes great responsibility In today's world with our growing technological power and the knowledge about its impact we are considered to be responsible for many instances that not long ago would have been deemed a matter of fate At the same time the looming options of e.g. genome editing or neuroprosthetics threaten traditional

notions of responsibility if no longer the person but the technology involved is deemed to be responsible for a specific behaviour The growing ethical debate on the expansion of human responsibility e g when it comes to human machine interaction ambient intelligence or reproductive technologies thus intertwines with the challenge to formulate an appropriate understanding of the concept of personal responsibility and our respective anthropological self understanding in today s technological world The volume brings together both perspectives and aims at illuminating crucial dimensions of responsibility in light of technological innovation and our self understanding as responsible beings

Classic Maya Politics of the Southern Lowlands Damien B. Marken, James L. Fitzsimmons, 2015-11-02 Classic Maya Politics of the Southern Lowlands investigates Maya political and social structure in the southern lowlands assessing comparing and interpreting the wide variation in Classic period Maya polity and city composition development and integration Traditionally discussions of Classic Maya political organization have been dominated by the debate over whether Maya polities were centralized or decentralized With new largely unpublished data from several recent archaeological projects this book examines the premises strengths and weaknesses of these two perspectives before moving beyond this long standing debate and into different territory The volume examines the articulations of the various social and spatial components of Maya polity the relationships strategies and practices that bound households communities institutions and dynasties into enduring or short lived political entities By emphasizing the internal negotiation of polity the contributions provide an important foundation for a more holistic understanding of how political organization functioned in the Classic period

Archaeologies of the Contemporary Past Victor Buchli, Gavin Lucas, 2002-01-04 Archaeologies of the Contemporary Past turns what is usually seen as a method for investigating the distant past onto the present In doing so it reveals fresh ways of looking both at ourselves and modern society as well as the discipline of archaeology This volume represents the most recent research in this area and examines a variety of contexts including Art Deco landfills miner strikes college fraternities an abandoned council house

Psychological and Behavioral Examinations in Cyber Security McAlaney, John, Frumkin, Lara A., Benson,

Vladlena, 2018-03-09 Cyber security has become a topic of concern over the past decade. As many individual and organizational activities continue to evolve digitally, it is important to examine the psychological and behavioral aspects of cyber security. *Psychological and Behavioral Examinations in Cyber Security* is a critical scholarly resource that examines the relationship between human behavior and interaction and cyber security. Featuring coverage on a broad range of topics such as behavioral analysis, cyberpsychology, and online privacy, this book is geared towards IT specialists, administrators, business managers, researchers, and students interested in online decision making in cybersecurity.

Matter, Materiality and Modern Culture Paul Graves-Brown, 2012-11-12 *Matter Materiality and Modern Culture* offers a new approach to the study of contemporary objects to give the reader a new understanding of the relationship between people and their material world. It asks how the very stuff of our world has shaped our societies by addressing a broad array of questions including why do Berliners have such strange door keys, should the Isle of Wight pop festival be preserved, could aliens tell a snail shell from a waste paper basket, why did Victorian England make so much of death and burial.

Innovation in Cultural Systems Michael John O'Brien, Stephen Shennan, 2010 Leading scholars offer a range of perspectives on the roles played by innovation in the evolution of human culture. In recent years, an interest in applying the principles of evolution to the study of culture emerged in the social sciences. Archaeologists and anthropologists reconsidered the role of innovation in particular and have moved toward characterizing innovation in cultural systems not only as a product but also as an evolutionary process. This distinction was familiar to biology but new to the social sciences. Cultural evolutionists from the nineteenth to the twentieth century had tended to see innovation as a preprogrammed change that occurred when a cultural group needed to overcome environmental problems. In this volume, leading researchers from a variety of disciplines including anthropology, archaeology, evolutionary biology, philosophy, and psychology offer their perspectives on cultural innovation. The book provides not only a range of views but also an integrated account with the chapters offering an orderly progression of thought. The contributors consider innovation in biological terms, discussing epistemology, animal studies, systematics, and phylogeny, phenotypic plasticity, and evolvability, and evo devo. They discuss modern insights into innovation, including simulation, the random copying model, diffusion, and demographic analysis, and they offer case studies of innovation from archaeological and ethnographic records, examining developmental, behavioral, and social patterns.
