**Collaboration Systems** Luciano Baresi,Schahram Dustdar,Harald Gall,Maristella Matera,2005-03-01 Over recent years most business processes have changed in various dimensions e g exibility interconnectivity coordination style autonomy due to market conditions organizational models and usage scenarios of information systems Frequently information is relocated within a geographically distributed system according to rules that are only seldom defined as a well codified business process This creates the need for a software infrastructure that enables ubiquitous mobile and collaboration systems UMICS The anywhere anytime any means paradigm is becoming the major challenge in conceiving designing and releasing next generation information systems New technologies like wi networks and 3rd generation mobile phones are offering the infrastructure to conceive of information systems as ubiquitous information systems that is systems that are accessible from anywhere at any time and with any device Ubiquity is not yet another buzzword pushed by emerging technologies but is mainly a means to support new business models and encourage new ways of working This new wave of UMICS will exploit the knowledge developed and deployed for conventional information systems but will also need new concepts models methodologies and supporting technologies to fully exploit the potentials of the enabling infrastructure and to be ready for the challenge Moreover people need to move across organizational boundaries and collaborate with others within an organization as well as between organizations The ability to query the company's distributed knowledge base and to cooperate with co workers is still a requirement but mobility brings new access scenarios and higher complexity

Benatallah,Min-Chien Shan,2003-09-09 E services and in particular Web services are emerging as a promising technology for the effective automation of application integration across networks and organizations The basic technological infrastructure for e services is structured around three major standards SOAP WSDL and UDDI These standards provide building blocks for service description discovery and interaction E service technologies have clearly influenced positively the development of integrated systems by providing programmatic access to e services through SOAP WSDL and UDDI E services are evolving toward being able to solve critical integration issues including security transactions collaborative processes management semantic aspects and seamless integration with existing middleware infrastructures VLDB TES 2003 was the fourth workshop in a successful series of annual workshops on technologies for E services held in conjunction with the VLDB conference The objective of VLDB TES 2003 was to bring together researchers practitioners and users to exchange new ideas developments and experiences on issues related to E services VLDB TES 2003 took place in Berlin Germany It featured the presentation of 16 regular papers In addition to the presentation of research papers the workshop included two invited talks and a panel discussion   **Threats, Countermeasures, and Advances in Applied Information Security** Gupta, Manish,2012-04-30

Organizations are increasingly relying on electronic information to conduct business which has caused the amount of personal information to grow exponentially Threats Countermeasures and Advances in Applied Information Security addresses the fact that managing information security program while effectively managing risks has never been so critical This book contains 24 chapters on the most relevant and important issues and advances in applied information security management The chapters are authored by leading researchers and practitioners in the field of information security from across the globe The chapters represent emerging threats and countermeasures for effective management of information security at organizations   **Известия высших учебных заведений ,2004    Deutsche Nationalbibliographie und Bibliographie der im Ausland erschienenen deutschsprachigen Veröffentlichungen ,2004    Technologies for E-Services**

Alejandro Buchmann (et al.),2002    **Technologies for E-Services** Fabio Casati,Dimitrios Georgakopoulos,Ming-Chien Shang,2003-06-30 Welcome to Free Convection Film Flows and Heat Transfer Free convection flows occur in many industrial processes However engineers still have to deal with many unresolved problems This book systematically summarizes my recent research results that have been referred to and cited by many other researchers in this field

The purpose of this book is to provide a practical guide to university students, graduate students, design engineers, researchers and scientists who wish to further understand the characteristics of free convection flows and heat transfer. I hope this book will serve as a useful tool for them as well as a guide to future research. This book includes three related parts: 1) accelerating convective boundary layers of Newtonian fluids; 2) accelerating film boiling and condensation of Newtonian fluids; and 3) accelerating film flows of non-Newtonian power law fluids. These phenomena are all caused by buoyancy or gravity and can be summed up in terms of the free convection limit. In addition, the free convection limit of Newtonian fluids can be taken as a special case of non-Newtonian power law fluids.
