Technologies Of Landscape From Reaping To Recycling:

Technologies of Landscape David E. Nye, 1999 Interdisciplinary essays on the relationship between technology and landscape **Histories of Technology, the Environment and Modern Britain** Jon Agar, Jacob Ward, 2018-04-09 Histories of Technology the Environment and Modern Britain brings together historians with a wide range of interests to take a uniquely wide lens view of how technology and the environment have been intimately and irreversibly entangled in Britain over the last 300 years It combines for the first time two perspectives with much to say about Britain since the industrial revolution the history of technology and environmental history Technologies are modified environments just as nature is to varying extents engineered Furthermore technologies and our living and non living environment are both predominant material forms of organisation and self organisation that surround and make us Both have changed over time in intersecting ways Technologies discussed in the collection include bulldozers submarine cables automobiles flood barriers medical devices museum displays and biotechnologies Environments investigated include bogs cities farms places of natural beauty and pollution land and sea The book explores this diversity but also offers an integrated framework for understanding these intersections **Landscape in American Guides and View Books** Herbert Gottfried, 2013 Landscape in American Guides and View Books Visual History of Touring and Travel is vested in the American relationship to landscape and the role guidebooks and view books played in touring and travel experiences including immigration Early in the history of the republic the relationship to landscape turns visual that is landscapes inspire artistic responses in the form of written descriptions and visual representations The predominant element is the scene From the 1820s on scenic thinking within an emerging industrial economy characterizes a major cultural and social development As immigration increases within the country and from abroad publishers and trade groups create souvenir guidebooks and view books to facilitate the movement of people and to encourage economic expansion and tourism Guide and view book analysis centers on pictures of landscape transformations and includes the cultural basis of scenes changing from pastoral and picturesque expressions to the documentation of managed views The general acceptance of managed views as replacements for romantic ones illustrates a commitment to landscapes that denote utility and the influence of commercial and industrial urban centers on American life Guidebook and view book imagery composed of durable schemas promotes visual thinking across social classes and time The primary medium for souvenirs is the photograph which printing methods like photolithography transform into printed products The visual history of touring and travel is part of America's first visual culture as well as the social formation of landscape the emergence of a collective vision among souvenir producers and consumers and the role visual information plays in landscape commentary which is the literary context for printed souvenirs *Early Modern English Literature and the Poetics of Cartographic Anxiety* Chris Barrett, 2018-03-23 The Cartographic Revolution in the Renaissance made maps newly precise newly affordable and newly ubiquitous In sixteenth century Britain cartographic materials went from rarity to

household and/or within a single lifetime and they delighted inspired and fascinated people across the socioeconomic spectrum At the same time they also unsettled upset disturbed and sometimes angered their early modern readers Early Modern English Literature and the Poetics of Cartographic Anxiety is the first monograph dedicated to recovering the shadow history of the many anxieties provoked by early modern maps and mapping in the sixteenth and seventeenth centuries A product of a military arms race often deployed for security and surveillance purposes and fundamentally distortive of their subjects maps provoked suspicion unease and even hostility in early modern Britain in ways not dissimilar from the anxieties provoked by global positioning enabled digital mapping in the twenty first century At the same time writers saw in the resistance to cartographic logics and strategies the opportunity to rethink the way literature represents space and everything else This volume explores three major poems of the period Edmund Spenser's *The Faerie Queene* 1590 1596 Michael Drayton's *Poly Olbion* 1612 1622 and John Milton's *Paradise Lost* 1667 1674 in terms of their vexed and vexing relationships with cartographic materials and shows how the productive protest staged by these texts redefined concepts of allegory description personification bibliographic materiality narrative temporality analogy and other elemental components of literary representations *Environment-Space-Place, Volume 3 / Issue 1 (Spring 2011)* Gary Backhaus, 2011-01-01

The Archaeology of the Colonized Michael Given, 2004-07-31 This book investigates the experience of the colonized in their landscape setting and proposes an archaeology of taxation to investigate the relationship between local community and central control *Geographies of Post-Industrial Place, Memory, and Heritage* Mark Alan Rhodes II, William R. Price, Amy Walker, 2020-11-23 All industrialization is deeply rooted within the specific geographies in which it took place and echoes of previous industrialization continue to reverberate in these places through to the modern day This book investigates the overlap of memory and the impacts of industrialization within today's communities and the senses of place and heritage that grew alongside and in reaction to the growth of mines mills and factories The economic and social change that accompanied the unchecked accumulation of wealth and exploitation of labor as the industrial revolution spread throughout the world has numerous lasting impacts on the socioeconomics of today Likewise the planet itself is now reeling The memory and heritage of these processes reach into the communities that owe the industrial revolution their existence but these populations also often suffered adverse impacts to their health and environment through the large scale and rapid extraction of natural resources and production of goods Through the themes of memory community and place working post industrial landscapes and the de romanticization of industrial pasts this book examines the endurance and decline of these communities the spatial processes of industrial byproducts and the memory and heritage of industrialization and its legacies While based in the traditions of geography this collection also draws upon and will be of great interest to students and scholars of cultural anthropology archaeology sociology history architecture civil engineering and heritage memory museum and tourism studies Using global examples the authors provide a uniquely geographic understanding to industrial heritage across the spaces

places and memories of industrial development **The Europeanized Elite in Russia, 1762-1825** Andreas Schönle, Andrei Zorin, Alexei Evstratov, 2016-11-04 This illuminating volume provides a new understanding of the subjective identity and public roles of Russia's Europeanized elite between the years of 1762 and 1825 Through a series of rich case studies the editors reconstruct the social group's worldview complex identities conflicting loyalties and evolving habits The studies explore the institutions that shaped these nobles their attitude to state service the changing patterns of their family life their emotional world religious beliefs and sense of time The creation of a Europeanized elite in Russia was a state initiated project that aimed to overcome the presumed backwardness of the country The evolution of this social group in its relations to political authority provides insight into the fraught identity of a country developing on the geopolitical periphery of Europe In contrast to postcolonial studies that explore the imposition of political social and cultural structures on colonized societies this multidisciplinary volume explores the patterns of behavior and emotion that emerge from the processes of self Europeanization The *Europeanized Elite in Russia 1762 1825* will appeal to scholars and general readers interested in Russian history and culture particularly in light of current political debates about globalization and widening social inequality in Europe *Skiing Into Modernity* Andrew Denning, 2014-11-26 Examines the relationship between skiers and the Alpine environment since the late nineteenth century It argues that skiing and winter tourism modernized the Alps in both material and perceptual terms while the Alpine landscape itself challenged skiers to alter their practices and philosophies of sport leisure and nature harmonizing Alpine skiing with modern cultural values and social practices in the twentieth century Provided by publisher **Agriculture in Capitalist Europe, 1945-1960** Carin Martiin, Juan Pan-Montojo, Paul Brassley, 2016-06-17 In the years before the Second World War agriculture in most European states was carried out on peasant or small family farms using technologies that relied mainly on organic inputs and local knowledge and skills supplying products into a market that was partly local or national partly international The war applied a profound shock to this system In some countries farms became battlefields causing the extensive destruction of buildings crops and livestock In others farmers had to respond to calls from the state for increased production to cope with the effects of wartime disruption of international trade By the end of the war food was rationed when it was obtainable at all Only fifteen years later the erstwhile enemies were planning ways of bringing about a single agricultural market across much of continental western Europe as farmers mechanised motorized shed labour invested capital and adopted new technologies to increase output This volume brings together scholars working on this period of dramatic technical commercial and political change in agriculture from the end of the Second World War to the emergence of the Common Agricultural Policy in the early 1960s Their work is structured around four themes the changes in the international political order within which agriculture operated the emergence of a range of different market regulation schemes that preceded the CAP changes in technology and the extent to which they were promoted by state policy and the impact of these political and technical changes on rural societies in

western Europe **Agriculture: A Very Short Introduction** Paul Brassley, Richard Soffe, 2016-04-28 Agriculture one of the oldest human occupations is practised all over the world using techniques ranging from the profoundly traditional to the most scientifically advanced Without it we would starve Yet how many of us understand what is happening in the fields that we see as we drive through the countryside How often do we think about the origins of the food in our trolley In this Very Short Introduction Paul Brassley and Richard Soffe explain what farmers do and why they do it Beginning with the most basic resource the soil they show why it is important and how farmers can increase its productivity before turning to the plants and animals that grow on it and tracing the connections between their biology and the various ways in which farmers work with them The authors conclude by looking at some of the controversial issues facing contemporary agriculture its sustainability its impact on wildlife and landscape issues of animal welfare and the affect of climate change and the development of genetically modified organisms on farmers ABOUT THE SERIES The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area These pocket sized books are the perfect way to get ahead in a new subject quickly Our expert authors combine facts analysis perspective new ideas and enthusiasm to make interesting and challenging topics highly readable **Travel and the British country house** Jon Stobart, 2017-11-06 Travel and the British country house explores the ways in which travel by owners visitors and material objects shaped country houses during the long eighteenth century It provides a richer and more nuanced understanding of this relationship and how it varied according to the identity of the traveller and the geography of their journeys The essays explore how travel on the Grand Tour and further afield formed an inspiration to build or remodel houses and gardens the importance of country house visiting in shaping taste amongst British and European elites and the practical aspects of travel including the expenditure involved Suitable for a scholarly audience including postgraduate and undergraduate students but also accessible to the general reader Travel and the British country house offers a series of fascinating studies of the country house that serve to animate the country house with flows of people goods and ideas *Environmental Politics for a Changing World* Ronnie D. Lipschutz, Doreen Stabinsky, 2018-07-12 This book argues that environmental problems are first and foremost political and therefore about power Using a framework of political economy and political ecology the authors deconstruct current environmental problems to identify root causes and address those problems through mobilization of collective action and social power The second edition also offers Updated examples and stories of political struggles and the actors involved Explicit attention to various forms of power in environmental politics including structural and social power Local politics and collective action as related to global environmental politics Discussion of emerging issues such as synthetic biology commodification and financialization of nature including carbon markets and geoengineering **Developing the Rivers of East and West Africa** Heather J. Hoag, 2013-09-12 How did rivers contribute to the economic and political development of modern Africa How did African and European notions of nature s value and meaning differ And how have

these evaluations of Africa's rivers changed between 1850 and the present day Drawing upon examples from across the African continent *Developing the Rivers of East and West Africa* explores the role African waterways played in the continent's economic social and political development and provides the first historical study of the key themes in African river history Rivers acted as more than important transportation byways their waters were central to both colonial and postcolonial economic development efforts This book synthesizes the available research on African rivers with new evidence to offer students of African and environmental history a narrative of how people have used and engaged the continent's water resources It analyzes key themes in Africa's modern history European exploration establishment of colonial rule economic development green politics and each case study provides a lens through which to view social economic and ecological change in Africa

The Third Reich in Power Richard J. Evans, 2006-09-26 The acclaimed and comprehensive account of Germany's transformation under Hitler's total rule and the inexorable march to war by the author of *The Coming of the Third Reich* *The Third Reich at War* and *Hitler's People* Evans's three volume history is shaping up to be a masterpiece Fluidly narrated tightly organized and comprehensive *The New York Times* Mr Evans's magisterial study should be on our shelves for a long time to come *The Economist* By the middle of 1933 the democracy of the Weimar Republic had been transformed into the police state of the Third Reich mobilized around the cult of the leader Adolf Hitler In *The Third Reich in Power* Richard J Evans chronicles the incredible story of Germany's radical reshaping under Nazi rule As those who were deemed unworthy to be counted among the German people were dealt with in increasingly brutal terms Hitler's drive to prepare Germany for the war that he saw as its destiny reached its fateful hour in September 1939 This is the fullest and most authoritative account yet written of how in six years Germany was brought to the edge of that terrible abyss The Green and the Brown Frank

Uekötter,2006-08-14 This study provides the first comprehensive discussion of conservation in Nazi Germany Looking at Germany in an international context it analyses the roots of conservation in the late 19th century the gradual adaptation of racist and nationalist thinking among conservationists in the 1920s and their indifference to the Weimar Republic It describes how the German conservation movement came to cooperate with the Nazi regime and discusses the ideological and institutional lines between the conservation movement and the Nazis Uekoetter further examines how the conservation movement struggled to do away with a troublesome past after World War II making the environmentalists one of the last groups in German society to face up to its Nazi burden It is a story of ideological convergence of tactical alliances of careerism of implication in crimes against humanity and of deceit and denial after 1945 It is also a story that offers valuable lessons for today s environmental movement

Nationalism Eric Storm,2024-10-29 A global perspective on the nature and evolution of nationalism from the early modern era to the present The current rise of nationalism across the globe is a reminder that we are not after all living in a borderless world of virtual connectivity In *Nationalism* historian Eric Storm sheds light on contemporary nationalist movements by exploring the global evolution of nationalism beginning with the rise of the nation state in the eighteenth century through the revival of nationalist ideas in the present day Storm traces the emergence of the unitary nation state which brought citizenship rights to some while excluding a multitude of others and the pervasive spread of nationalist ideas through politics and culture Storm shows how nationalism influences the arts and humanities mapping its dissemination through newspapers television and social media Sports and tourism too have helped fashion a world of discrete nations each with its own character heroes and highlights Nationalism saturates the physical environment not only in the form of national museums and patriotic statues but also in efforts to preserve cultural heritage create national parks invent ethnic dishes and beverages promote traditional building practices and cultivate native plants Nationalism has even been used for selling cars furniture and fashion By tracing these tendencies across countries Storm shows that nationalism s watershed moments were global He argues that the rise of new nation states was largely determined by shifts in the international context that the relationships between nation states and their citizens largely developed according to global patterns and that worldwide intellectual trends influenced the nationalization of both culture and environment Over the centuries nationalism has transformed both geopolitics and the everyday life of ordinary people

The Lure of the North Woods Aaron Shapiro,2013-03-30 In the late nineteenth century the North Woods offered people little in the way of a pleasant escape Rather it was a hub of production supplying industrial America with vast quantities of lumber and mineral ore This book tells the story of how northern Minnesota northern Wisconsin and Michigan s Upper Peninsula became a tourist paradise turning a scarred countryside into the playground we know today Stripped of much of its timber and ore by the early 1900s the North Woods experienced deindustrialization earlier than the Rust Belt cities that consumed its resources In *The Lure of the North Woods* Aaron Shapiro describes how residents and visitors reshaped the

region from a landscape of exploitation to a vacationland The rejuvenating North Woods profited in new ways by drawing on emerging connections between the urban and the rural including improved transportation promotion recreational land use and conservation initiatives Shapiro demonstrates how this transformation helps explain the interwar origins of modern American environmentalism when both the consumption of nature for pleasure and the work of the Civilian Conservation Corps in the North Woods and elsewhere led many Americans to cultivate a fresh perspective on the outdoors At a time when travel and recreation are considered major economic forces The Lure of the North Woods reveals how leisure and tourism in particular has shaped modern America
