Technology And The Character Of Contemporary Life A Philosophical Inquiry:

Technology and the Character of Contemporary Life Albert Borgmann, 2024-05-31 Blending social analysis and philosophy Albert Borgmann maintains that technology creates a controlling pattern in our lives This pattern discernible even in such an inconspicuous action as switching on a stereo has global effects it sharply divides life into labor and leisure it sustains the industrial democracies and it fosters the view that the earth itself is a technological device He argues that technology has served us as well in conquering hunger and disease but that when we turn to it for richer experiences it leads instead to a life dominated by effortless and thoughtless consumption Borgmann does not reject technology but calls for public conversation about the nature of the good life He counsels us to make room in a technological age for matters of ultimate concern things and practices that engage us in their own right

Technology and the Character of Contemporary Life Albert Borgmann, 1984-01-01 Blending social analysis and philosophy Albert Borgmann maintains that technology creates a controlling pattern in our lives This pattern discernible even in such an inconspicuous action as switching on a stereo has global effects it sharply divides life into labor and leisure it sustains the industrial democracies and it fosters the view that the earth itself is a technological device He argues that technology has served us as well in conquering hunger and disease but that when we turn to it for richer experiences it leads instead to a life dominated by effortless and thoughtless consumption Borgmann does not reject technology but calls for public conversation about the nature of the good life He counsels us to make room in a technological age for matters of ultimate concern things and practices that engage us in their own right

French Philosophy of Technology Sacha Loeve, Xavier Guchet, Bernadette Bensaude Vincent, 2018-05-28 Offering an overall insight into the French tradition of philosophy of technology this volume is meant to make French speaking contributions more accessible to the international philosophical community The first section Negotiating a Cultural Heritage presents a number of leading 20th century philosophical figures from Bergson and Canguilhem to Simondon Dagognet or Ellul and intellectual movements from Personalism to French Cybernetics and political ecology that help shape philosophy of technology in the Francophone area and feed into contemporary debates ecology of technology politics of technology game studies The second section Coining

and Reconfiguring Technoscience traces the genealogy of this controversial concept and discusses its meanings and relevance. A third section, Revisiting Anthropological Categories, focuses on the relationships of technology with the natural and the human worlds from various perspectives that include anthropotechnology, Anthropocene technological and vital norms and temporalities. The final section, Innovating in Ethics, Design and Aesthetics, brings together contributions that draw on various French traditions to afford fresh insights on ethics of technology, philosophy of design, techno aesthetics and digital studies. The contributions in this volume are vivid and rich in original approaches that can spur exchanges and debates with other philosophical traditions.

The Ethics of Ordinary Technology Michel Puech, 2016-04-28. Technology is even more than our world, our form of life, our civilization. Technology interacts with the world to change it. Philosophers need to seriously address the fluidity of a smartphone interface, the efficiency of a Dyson vacuum cleaner or the familiar noise of an antique vacuum cleaner. Beyond their phenomenological description, the emotional experience acquires moral significance and in some cases even supplies ethical resources for the self. If we leave this dimension of modern experience unaddressed, we may miss something of value in contemporary life. Combining European humanism, Anglophone pragmatism and Asian traditions, Michel Puech pleads for an ethical turn in the way we understand and address technological issues in modern day society. Puech argues that the question of power is what needs to be reconsidered today. In doing so, he provides a three-tier distinction of power: power to modify the outer world, our first intention; method in any case; technology; power over other humans, our enduring obsession; politics and domination; power over oneself, ethics and wisdom.

Thinking about Technology Gil Germain, 2017-08-04. The world we make reflects the way reality is perceived and today the world is perceived primarily in technological terms. So argues Gil Germain in *Thinking About Technology: How the Technological Mind Misreads Reality*. Given the connection between perception and action or thinking and doing, Germain first highlights the central features of technological worldview to better understand the contemporary drive to master the conditions of human existence. He then boldly proposes that the technological worldview seriously misreads the nature of the world it seeks mastery over and shows how this misinterpretation invariably leads to the technologically related challenges currently vexing the contemporary social order: from the drift toward a posthuman future to the anti-globalization backlash. Germain closes *Thinking About Technology* by articulating an alternative worldview to the technological perspective and illustrating how this re-reading of reality might help us inhabit the technological landscape in ways better attuned to the human condition.

Technology and the Good Life? Eric Higgs, Andrew Light, David Strong, 2010-12-15. Can we use technology in the pursuit of a good life or are we doomed to having our lives organized and our priorities set by the demands of machines and systems? How can philosophy help us to make technology a servant rather than a master? *Technology and the Good Life* uses a careful collective analysis of Albert Borgmann's controversial and influential ideas as a jumping off point from which to address questions such as these about the role and significance of technology in our lives. Contributors, both sympathetic and

critical examine Borgmann's work especially his device paradigm apply his theories to new areas such as film agriculture design and ecological restoration and consider the place of his thought within philosophy and technology studies more generally Because this collection carefully investigates the issues at the heart of how we can take charge of life with technology it will be a landmark work not just for philosophers of technology but for students and scholars in the many disciplines concerned with science and technology studies

Mimetic Posthumanism, 2024-10-21 It is tempting to affirm that on and about November 2022 post human character changed The revolution in AI simulations certainly calls for an update of the ancient realization that humans are imitative animals or homo mimeticus But the mimetic turn in posthuman studies is not limited to AI from simulation to identification affective contagion to viral mimesis robotics to hypermimesis the essays collected in this volume articulate the multiple facets of homo mimeticus

20 Challenging rationalist accounts of autonomous originality internal to the history of Homo sapiens this volume argues from different artistic philosophical technological perspectives that the all too human tendency to imitate is paradoxically central to our ongoing process of becoming posthuman

This Mortal Flesh Brent Waters, 2009-09-01 Although a proper concern for health is compatible with Christian faith recent and anticipated advances in extending human longevity are often based on philosophical presuppositions and religious values that are adverse to core Christian beliefs and convictions In this solid text theologian and ethicist Brent Waters reflects on the formation practice and meaning of the Christian moral life in light of selected bioethical issues Theologically grounding his reflections on the doctrine of the incarnation Waters considers issues such as biotechnology and physical cognitive enhancement reproductive technology human genetics embryonic stem cell research and regenerative medicine He also examines the posthuman project exploring what it means to be human in light of the denial of mortality

Wilderness and the Heart Edward F. Mooney, 1999 In this essential companion to the classic *The Inward Morning* sixteen distinguished contemporary philosophers celebrate Henry Bugbee's remarkable philosophy The essays trace his explorations of thought emotion and the need for a sense of place attuned to wilderness Representing a range of traditions the thinkers included here touch on an equally broad spectrum of inquiry including existential philosophy religion and environmental studies The essays progress from general introductions to considerations of more specific themes in Bugbee's philosophy to reflections on the man as teacher mentor and friend Provocative in their own right these contributions provide a commentary on *The Inward Morning* This volume thus becomes a valuable tool for the careful reader seeking to fully appreciate the vivid text that has inspired it while at the same time offering insight into contemporary issues in the philosophy of nature

BOOK JACKET Technology and Place Steven A. Moore, 2011-01-20 Developing sustainable architectural and agricultural technologies was the intent behind Blueprint Farm an experimental agricultural project designed to benefit farm workers displaced by the industrialization of agriculture in the Rio Grande Valley of Texas Yet despite its promise the very institutions that created Blueprint Farm terminated the project after just four years 1987 1991 In this book Steven Moore demonstrates how the various stakeholders competing definitions of sustainability technology and place ultimately doomed Blueprint Farm He reconstructs the conflicting interests and goals of the founders including Jim Hightower and the Texas Department of Agriculture Laredo Junior College and the Center for Maximum Potential Building Systems and shows how ironically they unwittingly suppressed the self determination of the very farm workers the project sought to benefit From the instructive failure of Blueprint Farm Moore extracts eight principles for a regenerative architecture which he calls his nonmodern manifesto

Thinking through Technology Carl Mitcham, 2024-05-31 What does it mean to think about technology philosophically Why try These are the issues that Carl Mitcham addresses in this work a comprehensive critical introduction to the philosophy of technology and a discussion of its sources and uses Tracing the changing meaning of technology from ancient times to our own Mitcham identifies the most important traditions of critical analysis of technology the engineering approach which assumes the centrality of technology in human life and the humanities approach which is concerned with its moral and cultural boundaries Mitcham bridges these two traditions through an analysis of discussions of engineering design of the distinction between tools and machines and of engineering science itself He looks at technology as it is experienced in everyday life as material objects from kitchenware to computers as knowledge including recipes rules theories and intuitive know how as activity design construction and use and as volition knowing how to use technology and

understanding its consequences By elucidating these multiple aspects Mitcham establishes criteria for a more comprehensive analysis of ethical issues in applications of science and technology This book will guide anyone wanting to reflect on technology and its moral implications

Broad and Narrow Interpretations of Philosophy of Technology P.T. Durbin,2012-12-06 BACKGROUND DEPARTMENTS SPECIALIZATION AND PROFESSIONALIZATION IN AMERICAN HIGHER EDUCATION For over half of its history U S higher education turned out mostly cler gymen and lawyers Looking back on that period we might be tempted to think that this meant specialized training for the ministry or the practice of law That however was not the case What a college education in the U S prepared young men almost exclusively for from the founding of Harvard College in 1636 through the founding of hundreds of denominational colleges in the first two thirds of the nineteenth century was leadership in the community Professionalization and specialization only began to take root and then became the dominant mode in U S higher education in the period roughly from 1860 1920 In subsequent decades that seemed to many critics to signal the end of what might be called education in wisdom the preparation of leaders for a broad range of responsibilities Professionalization specialization and departmentalization of higher education in the U S began in the last quarter of the nineteenth century

Modern Technology and the Human Future Craig M. Gay,2018-12-11 Technology has always shaped human life and our understanding of what it means to be human But does it actually encourage human flourishing By exploring the doctrine of the incarnation and what it means for our embodiment Craig Gay raises concerns about the theological implications of modern technologies and movements such as transhumanism offering

an alternative vision to the path of modern technology Philosophers of Technology Stig Børsen Hansen, 2020-09-07 Technology is increasingly subject of attention from philosophers Philosophical reflection on technology exhibits a wide and at times bewildering array of approaches and modes of thought This volume brings to light the development of three schools in the philosophy of technology Based on thorough introductions to Karl Marx Martin Heidegger's and John Dewey's thought about technology the volume offers an in depth account of the way thinkers in the critical the phenomenological and the pragmatic schools have responded to issues and challenges raised by the works of the founders of these schools Technologies in almost any aspect of human life is potentially subject of philosophical treatment To offer a focused demonstration of key arguments and insights the presentation of each school is concluded with a contribution to discussions of educational technologies In addition to philosophers seeking a valuable and clear structuring of a still burgeoning field the volume is of interest to those working with educational philosophy and value sensitive design Stig Børsen Hansen's book is a must for all interested in understanding the development of the philosophy of technology and the relation of thoughts of thinkers that have shaped the area The author presents a new and refreshing take on the ideas from Marx to Marcuse from Dewey to Latour and Heidegger to Borgmann It will engage and hopefully provoke Dr Jan Kyrre Berg Frieis University of Copenhagen

Predictive Technology in Social Media Cristina Fernández-Rovira, Santiago Giraldo-Luque, 2022-07-07 Can behaviour on social media predict future purchase patterns Can what we click on social media foresee which political party will we vote for Can the information we share on our wall foretell the next series I might want to watch Can the likes on Instagram and Facebook predict the time one will spend on digital platforms in the next hour The answer is no longer science fiction It points to the ability of mainstream social media platforms such as Facebook and Twitter to be able to deliver specialised advertising services to highly targeted audience segments controlled by the billions of devices that flood our daily lives At the same time it highlights a more relevant problem can social media guide suggest or impose a certain behaviour or thought Everything seems to indicate that they can do it Predictive Technology in Social Media comprises 10 essays that reflect on the power of the predictive technology of social media in culture entertainment marketing economics and politics It shows from a humanistic and critical perspective the predictive possibilities of social media platforms as well as the risks this entails for cultural plurality everyday consumption the monopolistic concentration of the economy and attention and democracy The text is an invitation to think as citizens about the unbridled power we have ceded to digital platforms A new voice to warn about the greatest concentration of communicative power ever seen in the history of humanity
