Technology And The Human Condition:

Technology and the Human Condition Bernard Gendron,1976-11-01 The Techno-Human Condition Braden R. Allenby,Daniel Sarewitz,2011-04-22 A provocative analysis of what it means to be human in an era of incomprehensible technological complexity and change In The Techno Human Condition Braden Allenby and Daniel Sarewitz explore what it means to be human in an era of incomprehensible technological complexity and change They argue that if we are to have any prospect of managing that complexity we will need to escape the shackles of current assumptions about rationality progress and certainty even as we maintain a commitment to fundamental human values Humans have been co evolving with their technologies since the dawn of prehistory What is different now is that we have moved beyond external technological interventions to transform ourselves from the inside out even as we also remake the Earth system itself Coping with this new reality say Allenby and Sarewitz means liberating ourselves from such categories as human technological and natural to embrace a new techno human relationship Contributors Boris Barbour Mario Biagioli Paul S Brookes Finn Brunton Alex Csiszar Alessandro Delfanti Emmanuel Didier Sarah de Rijcke Daniele Fanelli Yves Gingras James R Griesemer Catherine Guaspare Marie Andr e Jacob Barbara M Kehm Cyril Labb Jennifer Lin Alexandra Lippman Burkhard Morganstern Ivan Oransky Michael Power Sergio Sismondo Brandon Stell Tereza St ckelov Elizabeth Wager Paul Wouters Illusions of Freedom Jeffrey M. Shaw,2014-06-02 Illusions of Freedom examines the opinions and ideas of two twentieth century writers Thomas Merton a Catholic monk living in the United States and Jacques Ellul a French Protestant Contemporaries they never met or corresponded with each other but their critique of the influence that technology was beginning to have on the human condition is strikingly similar Both Merton and Ellul drew upon the ideas of others in formulating their worldview to include Karl Barth Soren Kierkegaard Aldous Huxley and Karl Marx Jeffrey Shaw examines the influence that these other philosophers had on Merton and Ellul as they formulated their own ideas on technology s impact on freedom Tracing the similarities and in some cases the differences between their critiques of technology and the idea that progress is always to be seen as something inherently good one finds that they bring a unique perspective to the debate and offer readers an alternative avenue for reflecting on the meaning of technology and its impact on our lives in the twenty first century

Homo Faber Paolo Benanti,2018-12-07T10:18:00+01:00 In Homo Faber Paolo Benanti seeks to provide a philosophical and theological understanding of the technological phenomenon by casting light contemporaneously on the ethical dimensions connected to it In constructing a holistic vision of technique technology he asks himself how to look at the technological artifacts how it was possible that the West has undergone an incomparable technological development in respect to any other human culture and what this reveals and means for technology and what is the context in which technology is implemented and understood today As a result of his journey Benanti shows how Technology is not a simple human activity but human nature is a techno human condition Technology and the Spirit Ignacio L. Götz,2001-08-30 Most

contemporary accounts of the role of technology in world culture are alarmist and at times condemn many uses of technology without much effort to get beyond the surface of this worldwide phenomenon. Technological innovations that might rightly be critiqued are taken as representative of the entire field of technology. On the other hand there are those including some scientists for whom technology and its uses pose no questions at all and who seem to delight in predictions of a future totally dominated by technology. They prey on the human delight in newness and innovation and on our readiness to be surprised by what may someday come to be. Gtz takes the position that so called technology problems are really our problems not the fault of technology. Technology is an integral part of what we are as human beings a significant aspect of our evolution. Gtz also advances the thesis that technology may be viewed from the perspective of the human capacity to grow and that when we do so we are in effect spiritualizing technology and rendering it more meaningful to ourselves. Gtz suggests several models that may be employed to achieve this spiritualization. This provocative analysis will be of interest to general readers as well as scholars students and researchers concerned with contemporary social and religious issues.

Technology and Cultural Values Peter D. Hershock, Marietta Stepaniants, Roger T. Ames, 2003-10-31 Recent history makes clear that the quantum leaps being made in technology are the leading edge of a groundswell of paradigm shifts taking place in science politics economics social institutions and the expression of cultural values. Indeed it is the simultaneity and interdependence of these changes occurring in every dimension of human experience and endeavor that makes the present so historically distinctive. The essays gathered here give voice to perspectives on the always improvised relationship between technology and cultural values from Africa the Americas Asia Australia Europe and the Pacific. Technology and Contemporary Life P.T. Durbin, 2012-12-06 Nearly everyone agrees that life has changed in our technological society whether the contrast is with earlier stages in Western culture or with non Western cultures. Modernization is just one of various terms that have been applied to the process by which we have arrived at the peculiar lifestyle typical of our age whatever the term for the process almost all analysts agree in finding technology to be one of its key ingredients. This is the judgment of critics of all sorts anthropologists historians literary figures sociologists theologians. Volume 4 in the Philosophy and Technology series brings the perspectives of philosophers to bear on the issue of characterizing contemporary life mainly in high technology societies. Some of the philosophers look at the issue directly. Others focus on work life or on the living arrangements that surround or condition or offer refuge from work life in

technological society Still others reflect on particular technologies especially biotechnology and computer technology that are increasingly affecting both work and family life There is also a paper on the nature of thinking in technological praxis along with two papers on whether it is appropriate to export this sort of thinking to Third World countries and another paper on the issue of responsibility in technology which would have fit better in volume 3 of the series entitled Technology and Responsibility 1987 Finally volume 4 closes with a broad ranging bibliography that takes work and technology as its focus

Community in the Digital Age Andrew

Feenberg, Darin Barney, 2004-07-19 Is the Internet the key to a reinvigorated public life Or will it fragment society by enabling citizens to associate only with like minded others Online community has provided social researchers with insights into our evolving social life As suburbanization and the breakdown of the extended family and neighborhood isolate individuals more and more the Internet appears as a possible source for reconnection Are virtual communities real enough to support the kind of personal commitment and growth we associate with community life or are they fragile and ultimately unsatisfying substitutes for human interaction Community in the Digital Age features the latest most challenging work in an important and fast changing field providing a forum for some of the leading North American social scientists and philosophers concerned with the social and political implications of this new technology Their provocative arguments touch on all sides of the debate surrounding the Internet community and democracy

Security, Technology and Global Politics

Mark Lacy, 2014-02-05 This book analyses some of the key problems explored in Paul Virilio's theorising on war and security Paul Virilio has developed a provocative series of writings on how modern societies have shaped the acceleration of military security technologies and how technologies of security and acceleration have transformed society economy and politics His

examination of the connections between geopolitics war speed technology and control are viewed as some of the most challenging and disturbing interventions on the politics of security in the twenty first century interventions that help us understand a world that confronts problems that increasingly emerge from the desire to make life safer faster networked and more efficient Security Technology and Global Politics examines some of the key concepts and concerns in Virilio s writings on security society and technology endo colonization fear and the war on terror cities and panic cinema and war ecological security and integral accidents universities and ideas of progress Critics often point to an apocalyptic or fatalistic element to Virilio s writings on global politics but this book challenges this apocalyptic reading of Virilio s work suggesting that while he doesn t provide us with easy solutions to the problems we face the political force in Virilio s work comes from the questions he leaves us with about speed security and global politics in times of crisis terror and fear This book will be of interest to students of critical security studies political theory sociology political geography cultural studies and IR in general

The Ethics of Ordinary Technology Michel Puech, 2016-04-28 Technology is even more than our world our form of life our civilization Technology interacts with the world to change it Philosophers need to seriously address the fluidity of a smartphone interface the efficiency of a Dyson vacuum cleaner or the familiar noise of an antique vacuum cleaner Beyond their phenomenological description the emotional experience acquires moral significance and in some cases even supplies ethical resources for the self If we leave this dimension of modern experience unaddressed we may miss something of value in contemporary life Combining European humanism Anglophone pragmatism and Asian traditions Michel Puech pleads for an ethical turn in the way we understand and address technological issues in modern day society Puech argues that the question of power is what needs to be reconsidered today In doing so he provides a three tier distinction of power power to modify the outer world our first intention method in any case technology power over other humans our enduring obsession politics and domination power over oneself ethics and wisdom

Reconsideration of Science and Technology I Liu Dachun, Wang Bolu, Ding Junqiang, Liu Yongmou, 2022-09-30 This volume analyzes Karl Marx s understanding of science and technology and how it is associated with his focus on the perspective of history and human practice seeking to illuminate a renewed understanding of science and technology from a Marxist angle As the first volume of a three volume set that proposes to reconsider science and technology and explores how the philosophy of science and technology responds to an ever changing world the book delves into Marx s analysis of scientific and technological problems and phenomena across five chapters The authors explain the positioning of science and technology and the Marxist theoretical perspective of history and practice from which Marx s views on science and technology derive before an examination of three focal dimensions pertaining to science and technology productivity technological alienation and liberty Not always viewed as central to Marx s works discussions on science and technology are often underdeveloped but a reinterpretation of Marx s thoughts on the issues corroborates the efficacy of Marxism in terms of understanding today s world and especially the development of

science and technology The volume will appeal to scholars and students interested in Marxist philosophy the philosophy of science and technology and topics related to scientific culture SCARY ROBOTS Lawrence J. Terlizzese, 2020-09-20

Technophobia causes us to reflect to stop and ask what for Why are we doing this and could there be negative consequences to our actions Technophobia is not anti technology if we are honest no one is really anti technology that would be a rejection of life itself But neither does technophobia give the green light to all things technical An altogether too common position these days is to accept technology as manna from heaven as if just the very use of it will inherently lead us in the right direction All use is good use Technophobia does not allow us such an easy conscience **Persuasive Technology** Yvonne

de Kort, Wijnand IJsselsteijn, Cees Midden, Berry Eggen, B.J. Fogg, 2007-11-24 This book constitutes the thoroughly refereed post proceedings of the Second International Conference on Persuasive Technology for Human Well Being PERSUASIVE 2007 held in Palo Alto CA USA in April 2007 The 37 revised full papers presented were carefully reviewed and selected from numerous submissions for inclusion in the book The papers are organized in topical sections and cover a broad range of subjects Confronting Technology Matthew T. Prior, 2020-03-16 We are living through a digital revolution which already

touches every area of life and will continue to shape the future in as yet unforeseen ways Digital technologies are an ordinary part of daily life and yet they also present an unprecedented challenge to Christians to articulate a biblical theological framework to navigate times of rapid change The work of the French theologian Jacques Ellul is a theological time bomb primed for times like these Accounts of Ellul s career often divide off his sociology and theology but this book argues that Ellul conceived a single project of bringing technology into confrontation with the Word of God tackling the phenomenon he named technique the pursuit of maximal power and efficiency implicit in the technological enterprise with a profound depth of biblical and ethical insight Centering himself on the apocalypse or revelation of Jesus Christ in history Ellul offers a monumental timely though far from flawless contribution to contemporary ethical debates about the uses and abuses of technologies His work blazes a trail that Christians and all concerned for the future would do well to follow as we avoid both the naivety of technological neutrality and the dread of technological determinism *New Technology and Education*

Anthony Edwards, 2012-01-26 *New Technology and Education* explores the benefits and dangers of the increasing use of technology in education drawing on different cultural perspectives from across the globe to consider a variety of viewpoints The reader is encouraged to engage with each facet of the debate considering the philosophical psychological and sociological implications of the relationship between technology and education Recent debates and developments are considered including What is the relationship between creativity education and new technology Are subject boundaries blurred by the use of new technologies How do we plan for technologies becoming redundant Reflective exercises interviews chapter summaries and useful websites encourage and support student learning and the application of new concepts

Midson,2020-06-25 This volume explores love in the context of today s technologies It is difficult to separate love from romanticist ideals of authenticity intimacy and depth of relationship These ideals resonate with theological models of love that highlight the way God benevolently created the world and continues to love it Technologies which are designed in response to our desires do not necessarily enjoy this romanticist resonance and yet they are now remodelling the world Are technologies then antithetical to love In this volume leading theologians have brought together themes of theology technology and love for the first time exploring different areas where notions of love and technology are problematized In a world where algorithms and artificial intelligences interact with us and shape our lives in ever more intricate and even intimate ways we might feel attachments to and through machines that suggest sentiments of love while also changing how we think about love Does love always have to be reciprocal How can we enact love and care for others with technologies Whose desires do technologies serve consumers corporations creatures This volume offers a systematic review of the challenges of living in a technologically saturated world by means of critical application of as well as reflection on theological discussions about love *Information and Technology Literacy: Concepts, Methodologies, Tools, and Applications*
