Technology Transfer And The University:

Technology Transfer and the University Gary W. Matkin, 1990 **University Technology Transfer** Tom Hockaday, 2020-04-07 Demystifying technology transfer an increasingly important but little understood aspect of research universities mission How do we transfer the brilliance of university research results into new products services and medicines to benefit society University research is creating the technologies of tomorrow in the fields of medicine engineering information technology robotics and artificial intelligence These early stage technologies need investment from existing and new businesses to benefit society But how do we connect university research outputs with business and investors This process Tom Hockaday explains is what university technology transfer is all about identifying protecting and marketing university research outputs in order to shift opportunities from the university into business In this detailed introductory book a comprehensive overview of and guide to the subject Hockaday an internationally recognized technology transfer expert offers up his insider observations opinions and suggestions about university technology transfer He also explains how to develop strategically operate and fund university technology transfer offices while behaving in accordance with the central mission of the university Aimed at people who work in or with university technology transfer offices as well as anyone who wants to learn the basics of what is involved *University Technology Transfer* speaks to a global audience Tackling a complex topic in clear language the book reveals the impressive scale of patenting licensing and spin out company creation while also demonstrating that university technology transfer is a commercial activity with benefits that go well beyond the opportunity to make money **Trends in Technology Transfer at Universities** Clearinghouse on University-Industry Relations, 1986 *The Effectiveness of University Technology Transfer* Phillip Hin Choi Phan, Donald S. Siegel, 2006 *The Effectiveness of University Technology Transfer* reviews the numerous studies of the effectiveness of university technology transfer and presents recommendations on how to enhance effectiveness **University Technology Transfer** Shiri M. Breznitz, Henry Etzkowitz, 2017-09-19 Universities have become essential players in the generation of knowledge and innovation Through the commercialization of technology they have developed the ability to influence regional economic growth By examining different commercialization models this book analyses technology transfer at universities as part of a national and regional system It provides insight as to why certain models work better than others and reaffirms that technology transfer programs must be linked to their regional and commercial environments Using a global perspective on technology commercialization this book divides the discussion between developed and developing countries according to the level of university commercialization capability Critical cases as well as country reports examine the policies and culture of university involvement in economic development relationships between university and industry and the commercialization of technology first developed at universities In addition each chapter provides examples from specific universities in each country from a regional national and international comparative perspective This book includes articles by leading

practitioners as well as researchers and will be highly relevant to all those with an interest in innovation studies organizational studies regional economics higher education public policy and business entrepreneurship *The Effectiveness of University Technology Transfer* Phillip Phan, Donald S. Siegel, 2013 In recent years there have been numerous studies of the effectiveness of university technology transfer Such technology transfer mechanisms include licensing agreements between the university and private firms science parks incubators and university based startups We review and synthesize these papers and present some pointed recommendations on how to enhance effectiveness Implementation of these recommendations will depend on the mechanisms that universities choose to stress based on their technology transfer strategy For example institutions that emphasize the entrepreneurial dimension of technology transfer must address skill deficiencies in technology transfer offices reward systems that are inconsistent with enhanced entrepreneurial activity and the lack of training for faculty members post docs and graduate students in starting new ventures or interacting with entrepreneurs Universities will also have to confront a set of issues related to ethics and social responsibility as they more aggressively pursue technology commercialization Finally we suggest some possible theoretical frameworks for additional research
