**Technology Transfer** George K. Manning, 1974      **Technology Transfer** G. K. Manning, 1972      **International Technology Transfer by Small and Medium-Sized Enterprises** Peter J. Buckley, Jaime Campos, Eduardo White, 2016-07-27 The book is the culmination of a research effort which spanned all continents and involved a large number of research teams from both the industrialised and developing countries The book addresses a number of key issues related to technology transfer by small and medium sized enterprises most especially whether such companies are more effective transferors than larger transnational corporations A key aspect of the research was the fact that firms in source and host countries were matched to assure a degree of consistency in the firm coverage and their responses      *Technology and the Wealth of Nations* , 1992-10 Most discussions of U S economic competitiveness focus on the creation of new technologies but the abundant evidence presented in this timely book indicates that the key factor underpinning U S competitiveness is not the development of technology itself but the factors that influence the commercialization of technology The importance of effective management and performance in the commercialization of new technologies reflects today s changing environment The post war decades of undisputed U S scientific and technological hegemony have been replaced by a period in which U S firms are challenged by foreign competitors in some fields and struggling to regain their former positions in others Although the U S scientific research establishment arguably has lost little if any of its post war preeminence the same cannot be said with respect to the performance of U S firms as developers adapters and managers of new technologies largely because government policies have not been conducive to successful commercialization of technology As we enter the last decade of the twentieth century economic policy and performance are being linked more and more closely to technology related issues Technology commercialization is now recognized as critical to this linkage and this book constitutes a state of the art analysis of this vital but often overlooked aspect of technological innovation The sixteen papers in this volume contribute to three important tasks First they draw on new developments in theoretical and empirical analysis to integrate the macro and microeconomic dimensions of technological innovation and commercialization Second they extend and enrich the macroeconomic analysis of growth capital formation and international economic interactions to highlight the influences of macroeconomic variables on technology commercialization Technology and capital investment are shown to be complementary inputs to the growth process which means that favorable investment conditions are prerequisites for higher growth rates Third they also extend and enrich the microeconomic analysis of technological innovation and commercialization in the process providing guidance for managers seeking to improve performance in both of the areas

Nagadevara,Gopal Naik,Anil Suraj,2014-04-03 The collection of papers brings out the complexities in PPP in terms of types conceptualization structure institutions and financing It covers a broad sweep ranging from infrastructure to services and utilities and from global to Indian states The methodology is primarily empirical but the thrust is on conceptualization of PPP in its various forms and frameworks PPP is still a practitioner s field but is growing in size and significance and as a solution to failures of public system and the consequent privatization It is a major attraction to policy makers and funding agencies given its middle of the road approach It is likely to gain currency but it is important that we get deeper understandings of this form before we place more faith in this The papers in this book selected from a conference on PPP held at the Indian Institute of Management Bangalore in 2008 raise several important conceptual issues and seek to address some of them

**Problems of Communism** ,1978 **Information Society** Karamjit S. Gill,2012-12-06 Human centredness A Challenge to Post industrial Europe The key power in industrial society has been linked to the possession of capital and factory In the information society it could be rather different If one accepts that that the key power in the information society will be linked not so much to the ownership of information but to human creativity nourished by that information the productive force of today and tomorrow could be more and more the human brain Making use of one s intelligence is always accompanied by positive emotion which in turn further activates the intelligence But unfortunately under present conditions workers of all levels live in fear anxiety and stress rather than desire and motivation The question of basic human ecology quality of life is therefore a major strategic factor It is precisely the opposite to the mechanisms of

exclusion that currently dominate our society exclusion of young people through joblessness but also exclusion through technology as with the helplessness of older people or the poorly educated confronted with ticket dispensing machines or other automats This is not idle theorizing it corresponds to concrete facts It is for example how some observers interpret the crisis at IBM Because its programs were less human friendly it was shaken to its foundations by Apple and Microsoft though it seems since to have learnt its lesson *East-West Trade and Technology Transfer* United States.
