Technology War A Case For Competitiveness:

Future Survey Annual 1988-1989 Michael Marien, Lane Jennings, 1990-01-01 BMW Z cars have carved a huge reputation for themselves in a very short time From the revolutionary and innovative Z1 of the late 1980s to the beautiful and exclusive Z8 of more recent times via the popular Z3 and its controversial replacement the Z4 the family has made BMW's name in the increasingly competitive sports car market Cases in Competitive Strategy Michael E. Porter, 1983 Though the cases in *Cases in Competitive Strategy* may be informative when studied on their own they are designed to be read and analyzed in combination with the companion volume *Competitive Strategy* The conceptual materials and the cases are designed to reinforce each other showing the connection between the theory and the practice of competitive strategy formulation *NASA Technical Memorandum*, 1991 **Tech Wars** Daniel M. Gerstein, 2022-09-13 This book explores the evolution of the current U S research and development enterprise asks whether this organization remains appropriate to the challenges we face today and proposes strategies for better preparing for the global technology race shaping our future Across the globe nation states and societies as well as corporations technology developers and even individuals find themselves on the front lines of a global technology race In the third decade of this century the outlines of the contest have become clear R D spending new methods such as innovation centers and powerful technologies in governments and society are rapidly proliferating Technology winners and losers are emerging How did we arrive at this global technology fight How and where will it be waged What can we do to prepare for the future *Tech Wars* examines the conditions that have led us to this point and introduces new strategies organizational changes and resource allocations that will help the United States respond to the challenges on the horizon *NASA DoD aerospace knowledge diffusion research project. Report number 6, The relationship between the use of U.S. government technical reports by U.S. aerospace engineers and scientists and selected institutional and sociometric variables*, 1991 A study was undertaken that investigated the relationship between the use of U S government technical reports by U S aerospace engineers and scientists and selected institutional and sociometric variables Survey research is the methodology used for the study Data were collected by means of a self administered mail questionnaire The approximately 34 000 members of the American Institute of Aeronautics and Astronautics AIAA served as the study population The response rate for the survey was 70 percent A dependent relationship was found to exist between the use of U S government technical reports and three of the institutional variables academic preparation years of professional aerospace work experience and technical discipline The use of U S government technical reports was found to be independent of all of the sociometric variables The institutional variables best explain the use of U S government technical reports by U S aerospace engineers and scientists **The Role of Science and Technology in Competitiveness** United States.
