Technology Age Classroom:

Teaching and Learning in the Digital Age Louise Starkey, 2012-07-26 Teaching and Learning in the Digital Age is for all those interested in considering the impact of emerging digital technologies on teaching and learning. It explores the concept of a digital age and perspectives of knowledge pedagogy and practice within a digital context. By examining teaching with digital technologies through new learning theories cognisant of the digital age, it aims to both advance thinking and offer strategies for teaching technology savvy students that will enable meaningful learning experiences. Illustrated throughout with case studies from across the subjects and the age range, key issues considered include how young people create and share knowledge both in and beyond the classroom and how current and new pedagogies can support this level of achievement. The use of complexity theory as a framework to explore teaching in the digital age, the way learning occurs, one way exchanges online and face to face interactions, learning within a framework of constructivism and in communities, what we mean by critical thinking, why it is important in a digital age and how this can occur in the context of learning, how students can create knowledge through a variety of teaching and learning activities and how the knowledge being created can be shared, critiqued and evaluated. With an emphasis throughout on what it means for practice, this book aims to improve understanding of how learning theories currently work and can evolve in the future to promote truly effective learning in the digital age. It is essential reading for all teachers, student teachers, school leaders, those engaged in Masters Level work as well as students on Education Studies courses.

Teaching in the Digital Age for Preschool and Kindergarten Brian Puerling, 2018-04-03 Across the curriculum Teaching in the Digital Age for Preschool and Kindergarten will guide teachers toward integrating technology so it has an authentic, meaningful and developmentally appropriate impact on children's exploration and learning. By discipline, including science, math, literacy, art, social studies, health and safety, physical education and music, it will motivate teachers to dig deeper into each content area to see the various ways technology and digital media can support and strengthen children's learning as well as documentation and assessment.

The Technology Age Classroom Terence R. Cannings, LeRoy Finkel, 1993-01-01

Beyond Technology David Buckingham, 2013-04-17 Beyond Technology offers a challenging new analysis of learning, young people and digital media. Disputing both utopian fantasies about the transformation of education and exaggerated fears about the corruption of childhood innocence, it offers a level-headed analysis of the impact of these new media on learning, drawing on a wide range of critical research. Buckingham argues that there is now a growing divide between the media-rich world of children's lives outside school and their experiences of technology in the classroom. Bridging this divide, he suggests, will require more than superficial attempts to import technology into schools or to combine education with digital entertainment. While debunking such fantasies of technological change, Buckingham also provides a constructive alternative, arguing that young people need to be equipped with a new form of digital literacy that is both critical and creative. Beyond Technology will be essential reading for all students of the media or

education as well as for teachers and other education professionals Advanced Teaching Methods for the Technology Classroom Petrina, Stephen, 2006-09-30 This book provides a comprehensive critical approach to meeting the new challenges of technology in the classroom It gathers together research on technology methods principles and content acting as a reference source for proven and innovative methods It presents an introduction to teaching educational technology design and engineering and contains strategies for innovation in technology education Provided by publisher *Overcoming Barriers to the Utilization of Technology in the Classroom* Constance A. Morella, 2001-04 Hearing held by the House of Representatives Witnesses include Dr George O Strawn Executive Officer Computer and Information Science and Engineering Directorate National Science Foundation Alan Spoon President The Washington Post on behalf of the CEO Forum Dr Elizabeth Glowa Director for Instructional Technology Support Team Office of Global Access Technology Montgomery County MD Public Schools and Dr James J Fallon Jr Superintendent of Schools East Hartford School District

Overcoming Barriers to the Utilization of Technology in the Classroom United States. Congress. House. Committee on Science.
