NATIONAL SECURITY. Pauline Kusiak, 2022 **Nuclear Weapons and Cooperative Security in the 21st Century**

Stephen J. Cimbala, 2009-09-10 This book looks at the prospects for international cooperation over nuclear weapons proliferation in the 21st century Nuclear weapons served as stabilizing forces during the Cold War or the First Nuclear Age on account of their capability for destruction the fear that this created among politicians and publics and the domination of the nuclear world order by two superpowers the United States and the Soviet Union The end of the Cold War the dissolution of the Soviet Union and the potential for nuclear weapons acquisition among revisionist states or even non state actors including terrorists creates the possibility of a wolves eat dogs phenomenon in the present century In the 21st century three forces threaten to undo or weaken the long nuclear peace and fast forward states into a new and more dangerous situation the existence of large US and Russian nuclear weapons arsenals the potential for new technologies including missile defenses and long range precision conventional weapons and a collapse or atrophy of the nuclear nonproliferation regime and the opening of the door for nuclear weapons to spread among more than the currently acknowledged nuclear states This book explains how these three weakening forces interact with one another and with US and Russian policy making in order to create an environment of large possibilities for cooperative security but also of considerable danger Instead the choices made by military planners and policy makers will create an early twenty first century story privileging nuclear stability or chaos The US and Russia can and should make incremental progress in arms control and nonproliferation This book will be of much interest to students of nuclear proliferation and arms control strategic studies international security and IR in general Stephen J Cimbala is Distinguished Professor of Political Science at Pennsylvania State University He is the author of numerous works in the fields of international security defense studies nuclear arms control and other topics He has consulted for various US government agencies and defense contractors **Israel's National Security Towards the 21st Century**

Security Webs and 21st Century Threats Isaac M. Castellano, 2025-08-29 This book introduces a new framework of Security Webs which unifies the traditional state security approach with the human security approach and applies this framework to emerging security concerns in the 21st century Security Webs offers a framework to examine security threats responses and second and third order consequences across a range of actors and the structure to draw in existing findings theories and other frameworks into a universal and holistic approach to security At its core it clarifies the interconnected nature of security across time and space Borrowing the concept of food webs from the field of ecology which maps out how animals and plants gain energy and food the Security Webs framework allows for an examination of the security of an actor be it a nation state non state actor or an individual where each actor gains strength and security but likewise is also threatened The book profiles several of the emerging security threats and illustrates how the Security Webs framework can help us study these these threats include climate change weak state capacity and political extremism which all pose significant threats to states non state actors and individuals alike Bridging the divide between the traditionalist and the human security camps the book embraces the complexity that not only is international security and offers a framework applicable to every actor but also when applied creates a clear picture of security threats and arrangements This book will be of interest to students of security studies human security environmental security and International Relations

Cyber Security in the Age of Artificial Intelligence and Autonomous Weapons Mehmet Emin Erendor, 2024-11-19 Although recent advances in technology have made life easier for individuals societies and states they have also led to the emergence of new and different problems in the context of security In this context it does not seem possible to analyze the developments in the field of cyber security only with information theft or hacking especially in the age of artificial intelligence and autonomous weapons For this reason the main purpose of this book is to explain the phenomena from a different perspective by addressing artificial intelligence and autonomous weapons which remain in the background while focusing on cyber security By addressing these phenomena the book aims to make the study multidisciplinary and to include authors from different countries and different geographies The scope and content of the study differs significantly from other books in terms of the issues it addresses and deals with When we look at the main features of the study we can

say the following Handles the concept of security within the framework of technological development Includes artificial intelligence and radicalization which has little place in the literature Evaluates the phenomenon of cyber espionage Provides an approach to future wars Examines the course of wars within the framework of the Clausewitz trilogy Explores ethical elements Addresses legal approaches In this context the book offers readers a hope as well as a warning about how technology can be used for the public good Individuals working in government law enforcement and technology companies can learn useful lessons from it
