## **Technology Forecast 20022004 Volume 1:**

**Technology Forecast** Eric Berg, 2003-04 Technology Forecast 20032005 is the latest in a series that the PricewaterhouseCoopers Global Technology Centre has published annually for more than a dozen years. This year's book provides in-depth coverage of enterprise applications and enabling software and forecasts significant developments in those areas over the next three years. It also contains information of particular interest to senior executives including CFO Perspectives for each of the chapters and a chapter on business reporting and XBRL. As the pace of business quickens, companies must eliminate information lag and make more timely decisions. Business intelligence technologies, business activity monitoring, event notification, and digital dashboards provide executives with real-time information about the status of key business processes, including their relations with customers and suppliers. New business integration technologies, including increased use of XML-based Web services, are making end-to-end automation of business processes easier to accomplish. Meanwhile, the incorporation of analytic capabilities into virtually all enterprise applications, as well as advances in knowledge management and collaborative technologies, increase the speed and effectiveness of decision making. Technology Forecast 20032005 discusses these and other changes under way in enterprise IT. It is divided into three sections, each highlighting a different area of enterprise software that together comprise ten chapters providing detailed coverage of specific technologies and applications. Enterprise Applications contains chapters on enterprise suites, including enterprise suite architectures, supply chain, event and performance management, and enterprise resource planning; customer-facing applications; and business intelligence and enterprise analytics, including real-time business intelligence and business activity monitoring. Information Management comprises chapters on enterprise content management, knowledge management, and e-learning and collaborative technologies. Enabling Software includes chapters on XML and Web services, component frameworks, including J2EE and Microsoft .NET, application and portal servers, and business integration technologies, including business process modeling, monitoring, and management. In addition, the book features interviews with three leading figures in IT: Vivek Ranadiv, Founder, chairman, and CEO of TIBCO Software. A recognized industry leader, Ranadiv was selected by InfoWorld as one of the top ten technology innovators in 2002. He was also recognized by Ernst & Young as a 2002 software entrepreneur of the year. His book, *The Power of Now: How Winning Companies Sense and Respond to Change Using Real Time Technology*, McGraw-Hill, 1999, has been widely used as a business school textbook. Tony Scott, CTO for General Motors Information Systems and Services organization, where he is responsible for defining the enterprise architecture and standards across all of GM's global business. His work at GM has included the development of its employee portal and wireless strategy, and he directs the company's involvement in IT standards bodies and technology consortium organizations. Ronald Weissman, a venture partner with Apax Partners, a leading international private equity and venture capital firm with offices throughout Europe, the United States, Israel, and Japan. Apax manages more than 12 billion on behalf of major

institutional investors in the United States and abroad His focus is on U S and international opportunities in enterprise and infrastructure software and on Apax portfolio company development      Encyclopedia of Internet Technologies and Applications Freire, Mario,Pereira, Manuela,2007-10-31 Provides the most thorough examination of Internet technologies and applications for researchers in a variety of related fields For the average Internet consumer as well as for experts in the field of networking and Internet technologies      **Enterprise Information Systems: Concepts, Methodologies, Tools and Applications** Management Association, Information Resources,2010-09-30 This three volume collection titled Enterprise Information Systems Concepts Methodologies Tools and Applications provides a complete assessment of the latest developments in enterprise information systems research including development design and emerging methodologies Experts in the field cover all aspects of enterprise resource planning ERP e commerce and organizational social and technological implications of enterprise information systems      **Information Communication Technologies: Concepts, Methodologies, Tools, and Applications** Van Slyke, Craig,2008-04-30 The rapid development of information communication technologies ICTs is having a profound impact across numerous aspects of social economic and cultural activity worldwide and keeping pace with the associated effects implications opportunities and pitfalls has been challenging to researchers in diverse realms ranging from education to competitive intelligence      **Managing Information Communication Technology Investments in Successful Enterprises** Lubbe, Sam,2007-01-31 This book reports accounting and other information about business processes to assess performance It discusses the impact of the IT revolution on the accounting function and indicates the process of IT investment its advantages and limitations It is a revolutionary explanation of the purpose of IT investment and its role in organizations Provided by publisher      *International Encyclopedia of Hospitality Management 2nd edition* Abraham Pizam,2012-06-25 The International Encyclopedia of Hospitality Management is the definitive reference work for any individual studying or working in the hospitality industry There are 185 Hospitality Management degrees in the UK alone This new edition updates and significantly revises twenty five per cent of the entries and has an additional twenty new entries New online material makes it the most up to date and accessible hospitality management encyclopedia on the market It covers all of the relevant issues in the field of hospitality management from a sectoral level lodging restaurants food service time share clubs and events as well as a functional one accounting and finance marketing strategic management human resources information technology and facilities management Its unique user friendly structure enables readers to find exactly the information they require at a glance whether they require broad detail that takes a more cross sectional view across each subject field or more focused information that looks closely at specific topics and issues within the hospitality industry today      **International Encyclopedia of Hospitality Management** Abraham Pizam,2005 Covers the relevant issues in the field of hospitality management organized by sector such as lodging restaurants clubs time shares and conventions and function such as accounting finance marketing human
