Syed Ali Fazal<sup>1</sup> and Sazali Abdul Wahab<sup>2</sup>

### ABSTRACT

*Since the world has evolved as a Global Village, new technological innovation has become crucially important for sustaining market competition and gaining competitive edge irrespective of size and sector of any organization. Multinational Corporations mostly enjoying technologically advanced positions play vital role in disbursing technological knowledge throughout firms globally. This paper would enrich existing literature by observing different aspects related to technology transfer and outlining the relationship between multinational corporations and technology transfer that is, the role played by MNCs in relocating technological knowledge worldwide. This review would stimulate plots for prospective researchers to recognize and explain technology transfers by multinational corporations specially focusing on the parties and the process involved in intra inter-firm and intra-firm transfer of technology at the same time.*

**Keywords:** Multinational corporations, technology transfer, intra-firm.

### 1. INTRODUCTION

Technology plays the role of a vital mechanism in economic achievement and national income expansion (Millman, 2001). Doz, Santos and Williamson (2001) found escalating knowledge and technology based competition coupled with the capability of multinational corporations to outperform their expertise across diverse affiliates is progressively more significant basis of aggressive performance. According to Dunning, (1993) MNCs not only own, but also manufacture and manage most of technology worldwide. They are responsible for almost 80% of non-government Research and Development (R&D) spending globally.

The main interest of MNCs has always revolved around technology transfer from developed countries to the emerging markets (Tihanhi & Roath, 2002) since emerging nations highly rely on FDI (Foreign Direct Investment) from different multinational firms as the developing nations lack basics in resource capabilities
