Select Committee on Population, 1978 **Teenage Marriages** John Robert Weeks, 1976-10-12 **Population Index Bibliography: 1975-1977: Author index, subject index, geographical index** Princeton University. Office of Population Research, 1984 *Mortality of Hispanic Populations* Ira Rosenwaike, 1991-06-30 Hispanics in the United States numbering 22.4 million at the 1990 census are the nation's second largest and fastest growing minority population. Although recent studies have increased our knowledge of the demographic characteristics and culture of this multiethnic population, until now there has been no comprehensive discussion of the Hispanic mortality experience, a potential key to assessing the relative health status of Spanish origin subgroups in American society. Addressing the pressing need for more accurate current and comprehensive data for specific ethnic groups, this volume presents coherent research on the mortality patterns of the three largest Hispanic subgroups and, in the process, helps dispel many anecdotal or romanticized notions about Hispanic health and illness. The experts represented in this book present mortality data in five basic categories: mortality in the countries of origin; comparative mortality among Spanish origin groups in the United States; specific causes of mortality among Spanish origin populations; analysis of mortality data based on surname statistics; and an overview of mortality among migrants to this country as compared to patterns of death in the countries of origin. They suggest a Hispanic pattern of mortality characterized by relatively low rates for the three leading causes of death and relatively high rates for selected causes such as cirrhosis of the liver and homicide. The contributors also examine cultural and demographic intragroup differences. Their findings indicate that lifestyle, environmental, and social factors and genetic influences must all be considered in accounting for mortality differences between the Mexican born, Puerto Rican born, Cuban born, and non-Hispanics. Of the more than 80 tables in this book, many are based on unpublished vital statistics tabulations and are presented for the first time. The quantity and quality of data, the range of comparisons and analyses together with the demographic overview offer researchers an important resource for further studies on the interrelationship of migration, acculturation, minority status, and mortality. At the same time, the findings indicate trends and patterns in mortality among Hispanic subgroups in the United States that have important implications for

Demography and Family Welfare Mr. Rohit Manglik,2023-05-23 In this book we will study about population studies fertility rates family planning and demographic changes It also examines government policies and welfare programs designed to promote family well being *Lone Motherhood in Twentieth-Century Britain* ,1998-05-07 During the 1990s lone mothers reached the top of the political agenda viewed as both a drain on public expenditure and a moral threat What has been missing from the debate is an understanding of how we have got to where we are This timely new study by three leading experts in the field sets out first to investigate the demographics of lone motherhood how the pathways into lone motherhood have changed and whether the changes of the last quarter of a century are as dramatic as they appear Second it looks at the wider context for the changes in lone motherhood in terms of ideas about marriage and the changes in the construction of the never married mother from victim in the 1950s to parasite in the late 1980s Finally it examines the way in which policies have defined the problem of lone motherhood over time and the way in which lone mothers have been treated with regard to housing social security and employment The study concludes that there is little possibility of putting the genie back in the bottle in terms of reducing the number of lone mothers efforts to do so by reducing public expenditure on them may be effective but at the expense of the children involved Instead the authors urge policy makers to change focus again and pay more attention to investing in children Mate Selection in China Sampson Lee Blair,Timothy J. Madigan,Fang Fang,2022-04-21 This book examines the changing nature of dating and mate selection in contemporary China and addresses a wide array of both causes and consequences concerning mate selection including economic change traditional cultural norms evolving gender roles and both marriage and fertility aspirations The Future of Economics Alexander J. Field,2020-03-10 Originally published under the title *The Future of Economic History* this book attempts to chart a new course for the intellectual discipline known as economic history and determine its contributions to the study of economics The authors suggest new and potentially fruitful areas and approaches for research and at the same time analyze the weaknesses in past efforts to chart a course for the future **Chinese Marriages in Transition** Xiaoling Shu,Jingjing Chen,2023-09-15 Outdated models of Chinese gender roles marriage and family transitions portray these changes as streamlined and unidirectional from traditional to modern public to private collective to individual Chinese Marriages in Transition documents the complex nuanced and multidirectional nature of these cultural transformations Using complex and large scale historical national data as well as comprehensive data from multiple countries Xiaoling Shu and Jingjing Chen demonstrate that while the second demographic transition is unfolding in many advanced Western societies it is not necessarily a normative form of societal transition Working instead from a framework of new familism Shu and Chen show that Chinese new familism consists of both old and new values including the persistence of some traditional beliefs and

practices accompanied by a transition to modern perceptions of gender and adaption to some modern forms of family formation This book is freely available in an open access edition thanks to TOME Toward an Open Monograph Ecosystem a collaboration of the Association of American Universities the Association of University Presses and the Association of Research Libraries and the generous support of the University of California Davis Learn more at the TOME website available at openmonographs.org Download the open access book here **Government-sponsored Research on Foreign Affairs**, 1977
