Teilhard's Mysticism Of Knowing:

Teilhard's Mysticism of Knowing Thomas Mulvihill King,1981 **Teilhard's Mysticism of Knowing** Thomas Mulvihill King (s.j.),1981 *Teilhard's Mysticism* Duffy, Kathleen ,2014-06-30 Pierre Teilhard de Chardin 1881 1955 a French Jesuit priest and scientist charted a new path in reconciling Christian theology with evolutionary science Here a theologian scientist examines Teilhard s mysticism showing how science can illuminate the mystical path while also demonstrating the compatibility between Teilhard s thought and current frontiers in scientific exploration **A Companion to Jesuit Mysticism** Robert Aleksander Maryks,2017-03-06 In A Companion to Jesuit Mysticism Robert A Maryks provides thirteen unique essays discussing the Jesuit mystical tradition a somewhat neglected aspect of Jesuit historiography that stretches as far back as the order s co founder Ignatius of Loyola his spiritual visions at Manresa and ultimately the mystical perspective contained in his Spiritual Exercises The volume s contributions on the most significant representatives of the Jesuit mystical tradition from Baltasar lvarez to Louis Lallemant to Hugo Makibi Enomiya Lassalle aim to fill this lacuna in Jesuit historiography Although intended primarily as a handbook for scholars seeking to further their own research in this area the volume will undoubtedly be of interest to scholars and students of Jesuit studies more broadly *The Phenomenon of Teilhard* David H. Lane,1996 New Age writer of the popular Aquarian Conspiracy Marilyn Ferguson observed that many of the leading lights of the New Age movement claim Teilhard as one of the most influential persons in their lives Other influences acknowledged include C G Jung Aldous Huxley Swami Muktananda Thomas Merton Werner Erhard and Maharishi Yogi Indeed of the 185 New Age leaders surveyed Teilhard was the most frequently mentioned of any person who had most influenced their thinking If this is the case then if we are to understand the New Age movement properly it behooves us to take a careful and critical look at Teilhard de Chardin David Lane has done precisely this in a clear well documented and penetrating way In this crucial book David Lane lays bare the philosophical theological and scientific failures of Teilhard s New Age enterprise In a highly documented and insightful scrutiny of Teilhard s cosmic evolution Lane unveils the apostate Christian roots of one of the most important forerunners of the New Age movement This is one of the most significant and serious treatments of the modern roots of the New Age in print **Christian Mysticism** Harvey D. Egan,1998-09-16 Christian mysticism is unique in its view of Jesus death and resurrection as the very cause and exemplar of the mystical life in all its purity Jesus saving death on the cross exemplifies the mystical letting go of everything consoling tangible and finite in order to surrender totally to the mystery of the Father s unconditional love In this introduction to Christian mysticism Reverend Harvey Egan S J presents four Christian mystics as paradigms of the classical tradition St Ignatius of Loyola St Teresa of Avila St John of the Cross and the unknown author of the Cloud of Unknowing From this foundation he moves to two contemporary figures Thomas Merton and Pierre Teilhard de Chardin each of whom reflects a contemporary transposition of the two mystical traditions the apophatic which emphasizes the radical difference between God and

creatures and the kataphatic which emphasizes the similarity between God and creatures **Teilhard De Chardin and Eastern Religions** U. M. King,1977 **Teilhard de Chardin and Eastern Religions** Ursula King,2011 Teilhard de Chardin and Eastern Religions is in part an update of the 1980 classic *Toward a New Mysticism* Author Ursula King has extensively revised this work adding new material as she traces Teilhard s encounter with Eastern thought It includes an extensive bibliography and annotated study guide Book jacket *The Unbearable Wholeness of Being* Ilia Delio,2013 A quantum leap in our understanding of the universe one that reveals the whole consciousness that is active in every part and how every part participates in the whole The award winning author of *Christ in Evolution* and *The Emergent Christ* breaks new ground with this capstone in a trilogy that opens our eyes to the everywhere active all powerful all intelligent Love that guides and directs our new awareness of interrelatedness and interbeing She writes We all have a part to play in this unfolding Love we are wholes within wholes persons within persons religions within religions We are one body and we seek one mind and heart so that the whole may become more whole more personal and unified in love This is our Christian vocation to live in the Christ who is rising up from the ashes of death to become for us the God of the future **Pierre Teilhard De Chardin on People and Planet** Celia Deane-Drummond,2017-07-05 Humanity s relationship to nature is central to the work of Pierre Teilhard de Chardin an influential priest and scientist of the twentieth century Teilhard believed that spiritual development must be viewed alongside material development and that evolutionary theory lies at the heart of humanity s understanding of its place in the world Pierre Teilhard de Chardin on People and Planet argues that Teilhard s cosmic mysticism and intense interest in both cosmological and evolutionary sciences are highly relevant to current debates about how best to construct a meaningful spirituality The book offers a critical revision of Teilhard s thought in the light of current debates in evolutionary science eco theology and environmental ethics The essays present fresh interpretations of Teilhard s work and point to the significance of his thought in the contemporary study of science and religion **Whitehead and Teilhard** Delio, Ilia,Davis, Andrew M.,2025-03-05 *The Not-Yet God* Delio, Ilia,2023-09-15 A Christian theological engagement with evolutionary theory quantum theory and relational holism through the works of Teilhard de Chardin and Carl Jung Teilhard Lexicon Sion Cowell,2004-06-01 Written to enable researchers and students to better understand the specialised language of Teilhard s transdisciplinary approach which he found himself compelled to develop as a means of expressing that extraordinary vision of a universe in process of convergence towards a cosmic centre of unity he identifies with the Cosmic Christ **Re-Enchanting the Earth** Delio, Ilia ,2020-09-16 Artificial Intelligence AI the new frontier of human evolution holds the promise of reuniting religion and science **Techno-Sapiens in a Networked Era** Ryan K. Bolger,Kutter Callaway,2020-11-09 Techno Sapiens gathers together leading scholars of technology theology and religion in order to explore the ways in which modern technology is neither solely a dehumanizing force in the world nor a mere instrument for evangelizing the world but rather the very means by which incarnation happens the media in and through

which humans love the digital other The essays explore the question of how technology encourages and or inhibits the human capacity to love our neighbor through asking the following questions Who is my digital neighbor How does social media in particular allow us to love our digital neighbor How does one become a digital neighbor

Astrophilosophy, Exotheology, and Cosmic Religion Andrew M. Davis, Roland Faber, 2024-01-22 Astrophilosophy Exotheology and Cosmic Religion Extraterrestrial Life in a Process Universe applies Alfred North Whitehead's process philosophy and the associated process philosophies of Henri Bergson Teilhard de Chardin and others to the interdisciplinary layers of astrobiology extraterrestrial life and the impact of discovery This collection edited by Andrew M Davis and Roland Faber asks questions such as How have process thinkers imagined universal creative evolution and its implications for philosophies theologies and religions beyond earth and How might their claims as to the primacy of organism temporality novelty value and mind enrich current discussions and debates across disciplines As experts in their fields the contributors are informed by but not limited to process conceptualities The chapters not only advance recent discussions in astrobiology cosmology and evolution but also consider a constellation of philosophical topics from shared extraterrestrial knowledge and values to the possibilities or limitations afforded by AI technology the Fermi Paradox the Drake Equation and the increasing need to nurture the cosmic dimensions of theological and religious traditions

Artificial Earth J Daniel Andersson, 2023-10-24 Artificial Earth A Genealogy of Planetary Technicity offers an intellectual history of humanity as a geological force focusing on a prevalent contradiction in the Anthropocene discourse on global environmental change on the one hand it has been argued that there are hardly any pristine environments anymore to the degree that the concept of nature has lost its meaning while on the other that anthropogenic environmental change has become so prevailing that it

ought to be conceived of as a force of nature in the literal sense of the expression Artificial Earth argues that to fully grasp the stakes of this discourse we need not only understand the contemporary scientific and technological transformations behind the Anthropocene but also explore the history of an ontological concern tied up with it In order to do so Artificial Earth examines reflections on the ontological dualism between nature and artifice within the history of earth science from the late eighteenth century onwards Paying particular attention to its consequences for how human subjectivity has been conceptualized in the Anthropocene it then enrolls these resources in an effort to problematize attempts since the 1980s to formalize earth science in systems theoretical terminology In sum the aim is to investigate the historical conditions for the possibility of conceiving human artifice as an integral part of the earth's terrestrial environment with the conviction that such an investigation may assist in resolving the aforementioned contradiction or at least to understand it better by tracing its historical lineage

J Daniel Andersson is a post doctoral researcher at the Department for Thematic Studies Linköping University His research interests lie at the intersection between the technical cultures political imaginaries and historical processes that have shaped the ways in which the global environment has been understood and valued A general fascination with how concepts and discursive vocabularies become solidified in scientific modes of organization has consistently informed his theoretical and methodological approaches He has previously written about for instance the relationship between future orientation and valuation in integrated assessment models climate engineering as a sociotechnical imaginary and the intellectual history of risk management in global change science His writing has appeared in journals such as Environment Planning Anthropocenes and Cosmos History
