

# Den digitala teknikens sociala landskap

Välkommen att delta i ett kostnadsfritt webinarie kring digitalisering och dess konsekvenser med Jonas Stier den 19 februari kl 12:30-13:15

Digitaliseringen är en produkt av oss människor, samtidigt som vi alltmer blir produkter av digitaliseringen. Digital teknik har i grunden förändrat vår vardag och syn på oss själva samt förutsättningarna för demokrati, debatt, delaktighet, konsumtion och personlig integritet. I denna föreläsning tar Jonas med dig på en resa genom den digitala teknikens sociala landskap. Med såväl kritiska ögon som en hoppfull blick mot framtiden belyser han ansvarfrågor, etik och teknikens oanade konsekvenser för människor och samhälle.

Jonas Stier är sociolog och professor i socialt arbete vid MDH. Han är också en av grundarna till policy-initiativet oddat.org med fokus på frågor rörande AI. Han har även skrivit boken (Vår)modernitet och identitet och är tillsammans med Daniel Almström redaktör för antologin "AI och människor".

Webinariet arrangeras av Tillväxtnätet, Mälardalens högskolas ledarskapsprogram, i samverkan med Sörmlandskontraktet.

## **Teknikens Landskap:**

Digital Histories Mats Fridlund, Mila Oiva, Petri Paju, 2020-12-07 Historical scholarship is currently undergoing a digital turn. All historians have experienced this change in one way or another by writing on word processors applying quantitative methods on digitalized source materials or using internet resources and digital tools. *Digital Histories* showcases this emerging wave of digital history research. It presents work by historians who on their own or through collaborations with e.g. information technology specialists have uncovered new empirical historical knowledge through digital and computational methods. The topics of the volume range from the medieval period to the present day including various parts of Europe. The chapters apply an exemplary array of methods such as digital metadata analysis, machine learning, network analysis, topic modelling, named entity recognition, collocation analysis, critical search and text and data mining. The volume argues that digital history is entering a mature phase, digital history in action, where its focus is shifting from the building of resources towards the making of new historical knowledge. This also involves novel challenges that digital methods pose to historical research, including awareness of the pitfalls and limitations of the digital tools and the necessity of new forms of digital source criticism. Through its combination of empirical, conceptual and contextual studies, *Digital Histories* is a timely and pioneering contribution taking stock of how digital research currently advances historical scholarship.

*Understanding the Oceans* Dr Margaret Deacon, Margaret Deacon, Tony Rice, Colin Summerhayes, 2013-10-16 *Understanding the Oceans* brings together an internationally distinguished group of authors to explore the enormous advances in marine science made since the voyage of HMS Challenger a century ago. The book draws inspiration from the seminal contributions stemming from that voyage and individual chapters show how succeeding generations of scientists have been influenced by its findings. Covering the whole spectrum of the marine sciences, the book has been written and edited very much with the non-specialist reader in mind. Marine scientists, whether students or researchers, will welcome this authoritative comprehensive overview of their subject and its history; other scientists will find the book to be an accessible and informative introduction to marine science and its historical roots.

**Changes in the Technological Landscape** Svante Lindqvist, 2011 Recipient of the 2010 Leonardo da Vinci Medal of the Society for the History of Technology among numerous accomplishments, he is particularly cited for a remarkable ability to build enduring institutions while also pursuing original scholarship and pioneering ventures in education. Book Jacket.

*Explorations in Technology Education Research* P. John Williams, David Barlex, 2019-01-28 This volume brings together significant international research in technology education by focusing on contemporary postgraduate research, elaborating on the findings with the aim of making the content relevant to researchers, teachers and other potential researchers in the field. The book shares with readers what the research means for classroom teachers through understanding different motivations for teaching technology in schools and observing the model of learning supported by the research. Each chapter in the book includes references to the digital edition of the respective full thesis, allowing readers to

consult the research in detail if necessary This book continues the work done by 2017 s Contemporary Research in Technology Education by the same editors      **Technology and Culture** ,2001      History of Oceanography ,2000
