Telecom Mosaic Assembling The New International Structure:

Implementing Reforms in the Telecommunications Sector Bjorn Wellenius, Peter A. Stern, 1994-01-01 Presents a compilation of information from a worldwide pool of experts on their practical experiences in telecommunications sector reform This study compiles a wealth of information from a worldwide pool of experts on their practical experiences in telecommunications sector reform It provides an up to date account of approaches to the major policy and structural issues and describes developments in Latin America Asia and the Pacific and Europe The study also examines issues related to investment regulation and implementation While each of the eight parts centers on a particular aspect of telecommunications sector reform the study highlights several recurring themes and looks at a number of country experiences from the perspective of policymakers regulators investors operators the international development community and other industry specialists This volume provides valuable information on how to implement telecommunications reforms offers insights into the effectiveness of these reforms and identifies critical areas in which further discussion of related policy and implementation issues in this increasingly important economic sector **Leapfrogging Development?** J. P.

Singh, 1999-07-27 Telecommunications restructurings are now seen as important barometers in the shift among developing countries toward market based economies They are often posited as helping developing countries leapfrog or accelerate their pace of development and connect with the world economy This book shows that most states in developing countries are unable to resolve the myriad pressures they face in restructuring important sectors like telecommunications to effect accelerated or leapfrogging development The scope pace and sequencing of restructuring varies according to how different types of states respond to micro sub sectoral pressures or to macro level pressures from coalitions of groups After examining seven generalizable cases Singapore South Korea Mexico Malaysia China Brazil Myanmar the book examines India as an in depth most likely case Leapfrogging Development proposes a unique framework that shows how groups and coalitions articulate development preferences and how different types of states respond to or shape these preferences

Telecommunications Update , *Global Telecommunications* Raymond Akwule, 2023-12-22 Global

Telecommunications 1992 clarifies the complex politically charged arena of international telecommunications By understanding both the demands created by dynamic Western countries in the grips of deregulation and the needs of developing nations readers acquire an appreciation for the challenges facing global telecommunications users developers and policymakers This book stresses the growing need for sophisticated management of satellite and communication resources The emerging global information society is propelled by technological innovations and these developments are shaping the way the world's population receives information **The Telecom Mosaic** Robert R. Bruce, Jeffrey P.

Cunard, Mark D. Director, 1988 The Political Economy of Communications Kenneth Dyson, Peter Humphreys, 2023-10-20

First published in 1990 The Political Economy of Communications explores the central theme of the relationship between politics and markets in policy development The contributors show how governments have been drawn into increasing interdependency by technological and market developments with international institutions like the European Community becoming more important in these policy areas They argue that neither government ideologies nor market and technological forces offer an adequate account of the processes of change in communications policy These conclusions lead to a critique of central theories of international political economy notably neo liberalism and the authors advocate instead a neo pluralist perspective for the study of political economy of communications an approach that takes institutions much more seriously as a central unit of analysis The book will be of interest to students of international relations European studies and media and telecommunication studies as well as to political scientists and economists concerned with public policy Global
